PROJECT SPECIFICATIONS

FOR THE APPOINTMENT OF A PANEL OF SERVICE PROVIDERS TO DESIGN, MANUFACTURE, CONFIGURE, SUPPLY, DELIVER AND OFF-LOADING OF VARIOUS ELECTRICAL SMART METER FOR A PERIOD OF THREE (3) THREE YEARS.

1. Electricity meter specifications

Various customers within Mogale City are supplied with electricity at various voltages. Electricity consumers are supplied at either 11 kV, 6.6 kV, 400V as three phase low voltage supply or 230V as single-phase supply. The supply voltage to a customer is dependent on the intended use e.g. industrial, domestic, commercial etc. depending on the supply voltage and the required capacity as well as the tariff charged.

In that case, there are different kind of meters for different customer connection capacity and voltage. Besides capacity and voltage, there also connectivity and communication priorities required depending on the economy of scale. Mogale City will procure the four main types of meters and a Data Concentrating Unit, although some may not necessarily have communication devices installed. There four kind of meters and the Data Concentrating Unit are listed as follows:

- Low Voltage Single Phase Meter with Split Customer Interface Unit (CIU)
- Low Voltage dual-phase or three-phase Phase Meter with/without Split Customer Interface Unit
- High Voltage and Low Voltage Poly-phase Meter configurable for either Direct or Current Transformer Connection
- High Voltage Poly-phase Meter suitable for Current Transformer Connection
- Data Concentration Unit

Mogale City is striving to establish a smart grid system and as such it is building up its metering infrastructure towards advanced metering infrastructure for remote measurement monitoring and control. The main principle behind the smart grid is communication and interoperability between devices in the system.

Since each manufacturer have their propriety design framework, there is however industry standards that are intended to ensure that devices from various manufacturers in one system are able to communicate and operate with each other to ensure that the objective of the smart grid is achieved. Mogale City will therefore enforce compliance with **the International Telecommunication Union Telecommunication Standardization Sector (ITU-T)** standard on G3 PLC network (the G3-PLC) and the standard smart device language that complies with the

DLMS/COSEM specification for data exchange for smart metering (IEC 62056), smart energy management and related fields.

Each of the main types of the meters will have specific requirements by Mogale City in regard to the following:

- | | |
|-----------------------------------|--------------------------|
| 1. Type of Connection | 6. Mechanical Properties |
| 2. Power Rating | 7. Data Handling |
| 3. Measurement Accuracy | 8. Software and security |
| 4. Optical interface | 9. Training and Support |
| 5. Communication and Connectivity | |

The minimum specification required for each of the main types of electricity meters and other common specification are presented hereinafter.

1.1. Low Voltage Single Phase Meter with Split Customer Interface Unit (CIU)

2. Technical Evaluation of Suppliers

- The below mentioned criteria regarding Functionality is required for responsiveness and therefore eligibility for the next stage of evaluation. This is done to determine the ability of each bidder to successfully execute the contract according to specifications.
- These criteria shall only determine whether a tender will further be evaluated and will not influence the points scored on price.
- The service provider should at least score the minimum of 45 points out of the 65 points in order to be considered to the next evaluation phase.

Item no.	Criteria	Weight	Minimum

- If any total minimum score for any criteria is zero rated the tenderer will be rejected, even if the required **45** out of **65** points are achieved.
- The purpose of the comparison is to ensure a meaningful evaluation; bidders are requested to furnish detailed information of substantiation of compliance to the evaluation criteria.
- All information and particulars necessary to properly evaluate the tender must be furnished on submission. Incomplete particulars and documents required substantiating or insufficient documentary proof thereof will be construed to mean that the service provider is forfeiting the evaluation points in that regard.
