unemployment, inequality, and poverty. These provide the frameworks for the departments economic planning, development of policies, organisational structure and operational functioning of various programmes and units. The strategic focus of the department is based on the following key policy principles of: Economic transformation, Advancement of Rural and Township economies, Spatial Economic Transformation, Economic Modernization and renewal, Localisation of economic value chains, Beneficiation and value addition, Export focused industrial development, Commonality of Purpose/ Goal Congruence, Innovation and Fourth Industrial revolution, Research and Development, Black industrialization, Building Robust Public Private Partnerships, Investment Promotion; and Entrepreneurship development (small business and cooperative development).

Within the structures of KZN EDTEA is a programme called Trade and Industry Development. Its Purpose is to stimulate economic growth through the promotion of trade and investment in prioritized economic growth sectors and the implementation of strategic initiatives to advance industrial development. The strategic focus of the programme is to increase the manufacturing capabilities of the province and to support our industries to remain globally competitive and sustainable. Key to the work of the programme includes assisting industries to access local value chains, global value-chains and international markets.

Included in this programme is a subprogramme called Strategic Industrial Interventions whose purpose is to provide and facilitate the development of strategic industrial interventions and catalytic infrastructure initiatives with particular focus on the Maritime, Aerotropolis, Industrial Economic Hubs, Techno Hubs, and Special Economic Zones.

In keeping with the focus on Techno Hubs, Innovation and Fourth Industrial Revolution, the KwaZulu-Natal Provincial government has embarked on an initiative to establish Technology Parks/Hubs that will spur economic growth of the province and serve as a catalyst for job creation, investment attraction and innovation. These Techno Hubs are vehicles for the development of an ecosystem that will consist of technology-oriented players. It provides appropriate infrastructure and an enabling environment for job creation and to stimulate industrial competitiveness in technology-oriented sectors. KZN EDTEA (hereinafter referred to as the department) facilitates the growth of technology-oriented sectors.

With innovation being such a critical pillar for economic growth and the advancement of a knowledge economy, it will cut across the other activities in these innovation-oriented Technology Hubs (Parks). While innovation will be a major focus, the technology park/hub will consist of appropriate precincts that will form a hybrid technology park for the dominant and emerging sectors of the region/municipalities, nationally and globally. It will house businesses, R&D & Innovation facilities such as Technology Innovation Support Centres, Incubators, Technology Commercialization Facilities, Fourth Industrial Revolution Centres, Agencies, Local and Foreign Companies, and Investors.

These technology parks/hubs have been established in Newcastle (Newcastle Municipality), Richards Bay (Umhlatuze Municipality) and Shelley Beach (Ray Nkonyeni Municipality). The size of each of these sites is 200

000 square metres (20 hectares). Phase One of each of these Techno Parks/ Hubs has already been constructed with a single building. Each building occupies an area of 400 square metres. Furniture and ICT equipment have been installed in each of the Techno Hubs to kick-start a Technology Innovation Support programme at each of these Techno Hubs, with a Technology Innovation Support Centre already being one component of the Techno Hubs that has been established with programmes in place.

The ever-increasing acceleration of the emergence of new technologies and transformation of varying segments of society, compels all actors to integrate the new class of high-end technologies in a systemic manner into vertical and horizontal cyber-physical systems. It is imperative that all role players recognize the acceleration of innovation and the velocity of disruption. This occurrence behooves the need to act in a manner to comprehend and anticipate this pervasive super- disruption. These drivers should not constitute a source of constant surprise. The impact on income and quality of life of these new technologies on society, has led to the clustering of these emergent generational technologies and coining them as the Fourth Industrial Revolution (4IR) technologies.

The Fourth Industrial Revolution(4IR), a new 3rd millennium revolution, is being manifested through the emergence of new technologies and investments, and crucially, the change of people's mentality. It is characterised by increased automation of working practices, effecting both low and middle skill jobs, greater connectivity, machine learning and developments in new and emerging technologies. This increased automation is transpiring at a considerably faster pace than in preceding industrial revolutions.

Due to the Fourth Industrial Revolution's(4IR) potential to raise income levels and improve the quality of human life, it consequently affects and has a major impact on business, government, and people's lives. Its objective is the fusion of technologies that link the physical world closer to the biological and digital world, propagated by technical-scientific discoveries, the magnitude and profound impact of the transformations generated on production, and the management and governance system.

Some of the Technologies that have been clustered into fourth industrial revolution technologies are advanced robotics, drones, new materials, digital e.g., Internet of Things (IoT), Blockchain, Bitcoin, genetic sequencing, synthetic biology, genetic modification / engineering / editing, 3D printing, embedded devices and Reality Technology e.g., Virtual and Augmented.

The realization of this new revolution that crept upon us, impels the Techno Hubs initiative to integrate and engender the fusion and utilization of the Fourth Industrial Revolution(4IR) technologies into its programmes. Hence KZN EDTEA has embarked on an initiative to source the provision of Drones, to enable the integration of 4IR into the Techno Hubs programmes in the initial stages.

DRONES

Drones, also referred to as unmanned aerial vehicle (UAV) or unpiloted aerial vehicle and a remotely piloted aircraft (RPA), is an aircraft without a human pilot aboard. Its flight is controlled either autonomously by onboard computers or by the remote control of a pilot on the ground or in another vehicle.

Drones are used in a growing number of civil applications, such as policing and firefighting, and non-military security work, such as inspection of power or pipelines, aerial surveying of crops, acrobatic aerial footage in filmmaking, search and rescue operations, counting wildlife, delivering medical supplies to remote or otherwise inaccessible regions, border patrol missions, forest fire detection, surveillance, coordinating humanitarian aid, detection of illegal hunting, land surveying, fire and large-accident investigation ,landslide measurement, illegal landfill detection, crowd monitoring, livestock monitoring, wildfire mapping, home security, road patrol and anti-piracy.

The trend for the use of drone technology in civil and commercial aerial surveillance is expanding rapidly with increased development of automated object detection approaches.

3. PURPOSE OF THE TOR

The purpose of this document is to solicit the services of Drone providers who could assist KZN EDTEA and beneficiaries in implementing the project. The TOR specifies the requirements of KZN EDTEA to be responded to by potential bidders. Potential bidders can include a firm or consortium of firms or a consortium of individual experts. The Department is looking for service providers who can effectively demonstrate how they will deliver these objectives, whilst providing value for money. It is therefore important that prospective bidders, clearly and concisely describe their plans for each of the specific outcomes, timeframes, resource allocations, deliverables, and risk management strategies.

The Service Providers will have to provide the following services for the project:

- Supply, deliver and install (ready to use) the required Drones as indicated in the table below at the Techno Hubs in Newcastle (Newcastle Municipality and Shelley Beach (Ray Nkonyeni Municipality) and Richards Bay (Umhlatuze Municipality)

4. PROJECT OBJECTIVES

The global labour market is increasingly adopting new exponential technologies. As these technologies continue to become more mainstream, one must consider how these technologies become a key competitive differentiator and the impact in utilizing these new technologies will have on our society and workforce. Hence a broad spectrum of responsibilities emerges for government and other stakeholders to utilize these exponential technologies, commonly referred to as fourth industrial revolution technologies, to drive transformational change and social impact. These technologies lead to the creation of open platforms and new business ideas in innovative technological industries.

Thus, KZN EDTEA is called upon to support the province's participation in the Fourth Industrial Revolution and pursue programs to support such efforts. One such programme is the Techno Hubs which is a key vehicle to help businesses overcome entry barriers to existing business ecosystems established by big technological players in the growing field of Drone technology. Equipping the Techno Hubs with this technology would spur entrepreneurship and job creation. It would inculcate modernization and appropriate infrastructure to upgrade skills required for 4IR-induced and ICT-based job opportunities, initiated by the Techno Hubs programme.

As innovative concepts change with technology, integrating the Techno Hubs with Drone technologies will give rise to possibilities that generate abundant opportunities for new products and services, better ways to serve customers, new types of jobs and wholly new business models. Thus, **KZN EDTEA needs to harness the full potential of integrating Drone technologies into the techno hubs programmes to enable citizens and society to better participate in the exponential, 3rd millennium technological revolution, coined as the fourth industrial revolution.** This effort can be accomplished by adding on with the provision of Drone technology at the 3 Techno Hubs in Newcastle, Ray Nkonyeni, and Umhlatuze Municipalities respectively.

The following points contribute to the strengths of implementing the project.

- KZN has decided to develop the province into a smart, leading edge, innovative, technologically enhanced region.
- Phase One of the 3 Techno Hubs (Technology Parks) have been constructed in Newcastle (Newcastle Municipality and Shelley Beach (Ray Nkonyeni Municipality) and Richards Bay (Umhlatuze Municipality).
- Furniture and ICT equipment have already been installed at the Techno Hubs with the commencement of Technology Innovative Support programmes.
- There are several youth and new generation up-starts that have the capability of acquiring fourth industrial revolution skills. This capability extends to create, inaugurate and implement applications across techno-economic paradigms, utilizing Drone technologies.
- There are several individuals/companies and organizations with innovative ideas that can be integrated into 4IR technology domains and who require support from the Techno Hub within a particular ecosystem to propel them to commercialization.

The project will provide the following opportunities:

- Enable the commercialization of innovative ideas utilizing Drone technologies.
- Provide inhabitants in the Techno Hubs region with access to Drone resources required for technology innovation support.
- Attainment of Drone Handling skills required for technology development and application.
- Mold KZN into a technology enhanced fourth industrial revolution region that is globally competitive.

- Enable the adoption and diffusion of innovative products enhanced with the application of Drone technologies.
- Create new era jobs that are required for the fourth industrial revolution.

This project is aligned to the KZN EDTEA's strategic objective of

- To promote a conducive environment for the creation of sustainable jobs (i.e., skills development, access to resources and infrastructure provision).

4.1 OVERALL OBJECTIVE

The **overall objective** of the project is to enable new technology and innovations underpinned by the integration of ICT and fourth industrial revolution technologies (viz Drones) to grow an innovation-based knowledge economy that will create jobs and enhance technology-oriented industrial competitiveness of KZN.
