## 1 Responses to RFQ

Responses to this RFQ [**Quotations**] must not include documents or reference relating to any other quotation or proposal. Any additional conditions must be embodied in an accompanying letter.

## 2 Formal Briefing

A formal briefing session will not be held but should Respondents have specific queries they should email these to the Transnet employee(s) indicated in paragraph 5 [*Communication*] below:

## 3 Compulsory Local Content Threshold

In terms of section 8(1) of the Preferential Procurement Regulations, 2017, and the Instruction Note issued by National Treasury on the "Invitation and Evaluation of Bids based on a stipulated minimum threshold for local content and production for the **Rail Permanent Way Sector**," Transnet is required to set a stipulated minimum threshold be set for this RFQ.

### 3.1 Local Content Threshold

A Local Content threshold of **100%** [percent] will be required for the goods specified in SBD 6.2 to be manufactured by a successful Respondent for **once-off of the contract period** for the remainder of the contract term.

Only locally produced or locally manufactured **ballast** with a minimum threshold for local production and content will be considered. If the quantity of materials and/or products required cannot be wholly sourced from South African based manufacturers and/or at the designated local content threshold at any particular time, a bidders should obtain written approval from the dtic to supply the remaining portion at a lower local content threshold. Such approval application should be submitted and obtained prior to the closing of the bid. The dtic, in consultation with Transnet, will grant such approval on a case-by-case basis and will consider the following:

- required volumes in the particular bid;
- available collective South African industry manufacturing capacity at that time;
- delivery times;
- availability of input materials and components;
- technical considerations including operating conditions;
- materials of construction; and
- Security of supply and emergencies.

### 3.2 Local Content Notes

3.2.1. The exchange rate to be used for the calculation of local production and content must be the exchange rate published by the South African Reserve Bank (SARB) on the date of the advertisement of the tender;

3.2.2. Only the South African Bureau of Standards (SABS) approved technical specification number SATS 1286:2011 must be used to calculate local content;

3.2.3. The local content (LC) expressed as a percentage of the bid price must be calculated in accordance with the following formula which must be disclosed in the bid documentation:

$$LC = [1 - x/y] * 100$$

Where

- x is the imported content in Rand
- y is the bid price in Rand excluding value added tax (VAT)

Prices referred to in the determination of x must be converted to Rand (ZAR) by using the exchange rate published by the SARB at 12:00 on the date of advertisement of the bid.

- 3.2.4. The SABS approved technical specification number SATS 1286:2011 and the Guidance on the Calculation of Local Content together with the Local Content Declaration Templates [Annex C (Local Content Declaration: Summary Schedule), D (Imported Content Declaration: Supporting Schedule to Annex C) and E (Local Content Declaration: Supporting Schedule to Annex C)] are accessible to all potential tenderers on the DTI's official website; [http://www.the.dti.gov.za/industrial\\_development/ip.jsp](http://www.the.dti.gov.za/industrial_development/ip.jsp) at no cost.
- 3.2.5. The rates of exchange quoted by the tenderer in paragraph 4.1 of Returnable Schedule (the Declaration Certificate for Local Production and Content for Designated Sectors) will be verified for accuracy.
- 3.2.6. Declaration Certificate for Local Production and Content (SBD 6.2) together with the Annex C (Local Content Declaration: Summary Schedule) must be completed, duly signed and submitted at the closing date and time of the bid;
- 3.2.7. Tenderers must familiarise themselves with all the information provided in the Local Content instruction notes with particular reference to paragraph 4 of the instruction notes.
- 3.2.8. Respondents are to ensure that they complete the local content annexures in line with the provisions made in the Guidance Document for the calculation of Local Content. Failure to comply will lead to disqualification.

### 3.3 **Mandatory RFQ Annexures**

The regulatory and mandatory RFQ Annexures, which must be completed by all Respondents in order to declare Local Content, are as follows:

- Annexure B – Declaration Certificate for Local Production and Content [SBD 6.2]
- Annexure C – Local Content Declaration: Summary Schedule
- Annexure B and C must be completed and submitted even if a complete Local Content exemption letter from DTI has been obtained.
- To the extent that an exemption from Local Content has been granted by the DTI, the exemption letter from DTI will be a mandatory returnable document.
- Annexures D and E are Supporting Schedules to Annexure C. They are named as follows:
  - Annexure D – Imported Content Declaration: Supporting Schedule to Annexure C
  - Annexure E – Local Content Declaration: Supporting Schedule to Annexure C
- Annexure F - Guidance Document for the calculation of Local Content

After completing Declaration D, bidders should complete Declaration E and then consolidate the information on Declaration C. Declaration C should be submitted with the bid documentation at the closing date and time of the bid. Declarations D and E should be kept by Respondents for verification purposes for a period of at least 5 years. The successful Respondent is required to continuously update Declarations C, D and E with the actual values for the duration of the contract. In addition to what is stated above regarding Annexures D and E, please note that these declarations are to be submitted as part of the Essential Returnable Documents - See Section 3 of RFQ.

### 3.4 **Challenges meeting the Local Content Threshold**

Should, after the award of a Bid, the Supplier experience challenges in meeting the stipulated minimum threshold for Local Content, Transnet is required to inform the DTI accordingly in order for the DTI to verify the circumstances and provide directives in this regard.

### 3.5 **Exchange Rate Verification**

The rate of exchange quoted by the Respondent in the declaration certificates (Annexure B – Declaration Certificate for Local Production & Content [SBD 6.2] and Annexure C – Local Content Declaration: Summary Schedule) will be verified for accuracy as per the requirement of National Treasury Instruction Notes and Circulars.

### 3.6 **Local Content Obligations**

Respondents are to note that the Local Content commitments made by the successful Respondent(s) will be incorporated as a term of the contract and monitored for compliance. Should the successful Respondent fail to meet its Local obligations, non-compliance penalties shall be applicable as per the contract or Standard RFQ Terms and Conditions for the Supply of Goods and Services. Breach of Local Content obligations also provide Transnet cause to terminate the contract in certain cases where material non-compliance with Local Content requirements are not achieved.

## **14 Background**

Earthworks material of good quality, engineering properties including strength and long term durability has been used by Transnet during rehabilitation and design of newly built track sections for safe passage of trains and reduction in maintenance.

The engineering selection of the railway formation material according to Railway Earthworks classification has been developed based on theoretical and empirical evaluation and analysis over the years. With the aim of the formation and the subgrade to optimally performs its function of safe superstructure bearing capacity support under all harsh conditions including resilient loading, resistance to ingress of moisture, chemical weathering due to increasing axle loading and should be readily available or sourced from natural material resource.

## **15 Order of work**

 (o) Strengths in brackets apply in place of CBR values where sub-ballast is stabilised  
 + Increase to 45 in the absence of Layer SSB unless otherwise specified (Increase not normally required in dry areas.)

**Note:-** See Appendix A for comparable road materials. The classifications shown may be used by the Contractor at his discretion when preparing preliminary assessments of availability of materials for use in the listed layers.

#### 9.5. In Table 1

- 9.5.1. The SAR Index is the sum of the Liquid Limit, the Plastic Limit and the percentage passing the 0,075mm sieve, expressed as a number (the sum of Liquid Limit and Plastic Limit shall be taken as 45 if tests for these limits cannot be performed by virtue of the nature of the material);
- 9.5.2. The grading modulus is the sum of the cumulative percentages of material retained on the 2.00; 0.425 and 0.075mm sieves divided by 100;
- 9.5.3. The maximum CBR swell is determined at 100% of modified AASHTO density;
- 9.5.4. The strength after compaction of stabilised layers is the unconfined compressive strength (UCS) determined when applying the curing times and methods as shown in Table 2;
- 9.5.5. Activity of the formation material SSB, SB, A and B layers should always be less than 1.2.

**Table 2: Recommended stabilising procedures**

<b>Stabilising Agent</b>	<b>Type of Cure</b>	<b>Curing time</b>	<b>Reference</b>
Cement or cement/slag	Normal	7 d	TMH1 method A14
Lime or lime/slag	Accelerated	48 h	Appendix C of M5, except that curing temperatures shall be 50°C

9.6. For bulk earthworks, the severity of the material in terms of collapse potential and dispersiveness should be evaluated where material is to be utilised in embankments. Problematic materials in terms of collapse potential and dispersiveness should be avoided at all costs.

9.7. For bulk earthworks, where material has activity greater than 1.2 and CBR less than 5%, undercut or insertion of appropriate geotextile for separation, reinforcement and control of change in moisture content should be done and approved by the Engineer.

9.8.2. The maximum passing the 0,075mm sieve for sub-ballast is increased to 25%.

9.8.3. The maximum PI for all materials is increased by 25%.

9.8.4. The compaction and CBR requirements remain unaltered.

9.9. Where the sub-ballast layers are stabilised, the requirements given in Table 1 are modified as follows: -

9.9.2.2. After compaction to the specified in situ density, the percentage loss shall not exceed 14 when tested in accordance with SANS 3001-GR55. Samples of the Layers SB material shall be brushed only

after the final cycle.

9.10. Where used without stabilisation in the sub-ballast layers, all rock, and especially residual fine-grained sedimentary rock material shall comply with the following 10% FACT requirements when tested in accordance with SANS 3001-AG10:-

### SPECIFICATION FOR STONE

#### APPENDIX A

#### TEST FOR SOUNDNESS OF STONE (SODIUM SULPHATE METHOD)

##### A1 TEST SOLUTION

Prepare a saturated solution of anhydrous Na SO or crystalline Na SO. 10H O is distilled or demineralised water between 33 °C and 35 °C. Use sufficient of the salt to give excess crystals after thorough stirring. Cool to between 22 °C and 24 °C and keep at this temperature for at least 16 h. Stir thoroughly before use.

##### A2 PREPARATION OF TEST SPECIMEN

From a representative sample of stone take a random specimen of at least 500 g passing a 19 mm and retained on a 13,2 mm sieve. Wash the specimen to remove all adhering material. Dry at 105 °C in a well ventilated oven and determine the mass after cooling. Continue drying until the decrease in mass after each of 2 successive drying periods of 4 h does not exceed 0,1 % of the total mass. Let this mass be M1.

##### A3 PROCEDURE

A3.1 Place the specimen in a porcelain dish and cover fully with test solution between 20 °C and 25 °C for 7 h. Decant the solution taking care that no stone is lost.

A3.2 Dry the specimen for 15 h at 105 °C. Allow the specimen to cool for 2 h. This completes one cycle of the soundness test.

A2.3 Repeat the cycle described in A3.1 and A3.2 as often as specified. After every fifth cycle, wash the specimen on a 1,70 mm sieve with hot water until no crystalline sodium sulphate is visible and continue the test with material retained on a 1,70 mm sieve.

A3.4 After completion of the final cycle, wash the specimen in hot water until the washings are free of sodium sulphate. Dry the specimen to constant mass and screen on a 1,70 mm sieve. Let the mass retained on the sieve be M2.

##### A4. LOSS

Calculate the percentage loss in mass from the formula.

$$\frac{(M1 - M2) \times 100\%}{M1}$$

## *APPENDIX B*

### **DURABILITY TEST FOR BALLAST STONE**

#### B1. Preparation of test specimens

From a representative sample of ballast stone take at random 100 stones passing a 53.0 mm and retained on a 26.5 mm sieve. Wash the stones to remove all adhering material. Dry the stones at 105<sup>o</sup>C in a well ventilated oven and determine the mass after cooling. Continue drying until the decrease in mass after each of 2 successive drying periods of 4 h does not exceed 0.1% of the total mass.

#### B2. Procedure

Place the 100 stones in a suitable container and cover with ethylene glycol between 18<sup>o</sup> and 25<sup>o</sup>C for 20 days. Determine the number of stones that have broken, or can be broken by hand.

## *APPENDIX C*

### **Mill abrasion test**

#### 1. Test method

- 1.1 Prepare a test sample of the ballast under test, consisting of 1.5 kg each of the following two particle sizes:

<37.5 mm >26.5 mm and <26.5 mm >19 mm.

The particles shall be washed and oven-dried to a constant weight before it is weighed and tested.

( $W_o$  = the total weight of sample)

- 1.2 Place the sample in the porcelain mill pot and add 3 litres of distilled water. Ensure that the cork washer is correctly in position before tightening the lid securely.

- 1.3 The mill pot is placed in a horizontal position on the two rollers of the test apparatus with the lid on the side of the electric motor in order that the counter's sensor is activated with each revolution of the mill pot.
- 1.4 The mill pot shall be rotated at 33 r.p.m. for a total of 10 000 revolutions.
- 1.5 The sample shall then be wash-sieved through a 9.5 mm sieve placed on top of a 0.075 mm sieve and then oven-dried to a constant weight.
- 1.6 Record the dry mass of the material on the sieves:  
  
W1 = mass of material on 9.5 mm sieve.  
  
W2 = mass of material on 0.075 mm sieve
2. Evaluation method

Calculate the following abrasion value:

$$MA = \frac{W_0 - W_1 - W_2}{W_0} * 100 = \text{Mill Abrasion value.}$$

### 1.5 STEP SIX: Post Tender Negotiations (if applicable)

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
  - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
  - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

- Otherwise, a final contract will be concluded and entered into with the successful Bidder at the acceptance of a letter of award by the Respondent.

## 2 Validity Period

Transnet requires a validity period of **90 [Ninety]** Business Days from the closing date of this RFQ, excluding the first day and including the last day.

Bidders are to note that they may be requested to extend the validity period of their bid, on the same terms and conditions, if the internal evaluation process has not been finalised within the validity period. However,

once the adjudication body has approved the process and award of the business to the successful bidder(s), the validity of the successful bidder(s)' bid will be deemed to remain valid until a final contract has been concluded.

## 1. PURPOSE

- 1.1 The purpose of this circular is to regulate the environment within which accounting officers (AOs) and accounting authorities (AAs) may procure Rail Permanent Way Sector which have been designated as a sector for local production and content.

## 2. BACKGROUND

- 2.1 The Preferential Procurement Regulations, 2017 ('the regulations') made in terms of section 5 of the Preferential Procurement Policy Framework Act, 2000 (Act No 5 of 2000) which came into effect on 01 April 2017 make provision for the Department of Trade and Industry (the dti) to designate sectors in line with national development and industrial policies for local production.
- 2.2 Regulation 8(1) and 8(2) of the Preferential Procurement Regulations 2017 prescribe that in the case of a designated sector, an organ of state must advertise the invitation to tender with a specific condition that only locally produced services or goods or locally manufactured goods with a stipulated minimum threshold for local production and content, will be considered.
- 2.3 To this end, the dti has designated and determined the stipulated minimum threshold for the Rail Permanent Way sector for local production and content.

## 3. SECTOR DESIGNATION

- 3.1 A permanent way is the structure consisting of the rails, fasteners, railroad ties (sleepers) and ballast or slab track, plus the underlying subgrade. It enables trains to move by providing a dependable surface for their wheels to roll.
- 3.2 In this circular, the Rail Permanent Way sector system/subsystem and components have been recommended for designation.
- 3.3 Rail permanent way sector system/subsystem and components refers to:
  - 3.3.1 Rails which are widely used in the making of rail tracks and consist of two parallel steel tracks and lies steadily on the railway sleepers. These will also include rail joints.
  - 3.3.2 Ballasts refer to gravel or coarse stone used to form the bed of a railway track.
  - 3.3.3 Ballastless track consists of steel rail resting on concrete supports via rubberised cork absorption pads with galvanised steel tie beams which wrap around the concrete members rather than being cast into the concrete as with other ladder tracks.

- 3.34 Turnouts, crossings and accessories comprise of mechanical installations enabling railway plays an important role is as afar as safety is concerned, it allows the train to switch from one track to another. This will also include frogs and blades.
- 3.3.5 Railway sleepers support and restrain the rails. They transfer and spread the vertical load from the bottom of the rail to the ballast. Sleepers can be made of steel, concrete or wood, plastics or other materials.
- 3.3.6 Rail fastening system and accessories is used to fix rails to railway sleeper or railroad ties, which is usually comprised of rail anchors, rail tie plates, fishplate, chairs, fasteners, spikes, track bolt, nut and bolt, oval neck, diamond neck, button-head, cast iron shoulders, pressed mild steel shoulders, elastic clips, gage tie bar, check rail, screw & track spike, etc.
- 3.3.7 Maintenance of way plant & equipment includes railway track maintenance and construction machines for 1067mm and 1435mm gauge, both rail-bound and road rail. These include track maintenance equipment (i.e. sleeper, rail drilling, rail grinding, ballast tamping, ballast screener, ballast regulator and drain cleaning machines) as well as conditioning monitoring machinery, track safety equipment and track lubricators, cranes and material handlers.

3.4 Table 1 indicates the stipulated minimum local content rail permanent sector

This is to support and sustain the existing local steelmaking capacity.

3.7 All castings and forgings related products made of ductile iron; aluminium; stainless steel; and mild steel, relating to the assembly and manufacture of Rail permanent way sector (system/subsystem and

components as indicated in paragraph 3.2 to 3.5) are included in this designation and must be manufactured and sourced locally. This is to support and sustain the existing local foundry industry and the creation of additional castings and forging capabilities.

## 4 SUBMITTING OF BID DOCUMENTS

## 5 USE OF BID FORMS

- 5.1 Where special forms and/or formats are issued by Transnet for the submission of Bids, Respondents are required to submit their Bids by completion of the appropriate sections on such official forms and/or formats and not in other forms and/or formats or documents bearing their own terms and conditions of contract. ## **8 SITE VISITS / BRIEFING SESSIONS**

Respondents may be requested to attend a site visit or briefing session where it is necessary to view the site in order to prepare their Bids, or where Transnet deems it necessary to provide Respondents with further information to allow them to complete their Bids properly. Where such visits or sessions are indicated as compulsory in the RFX Document, Respondents are obliged to attend these meetings as failure to do so will result in their disqualification.

## **9 CLARIFICATION BEFORE THE CLOSING DATE**

Should clarification be required on any aspect of the Bid before the closing date, the Respondent must upload questions onto the Transnet e-Tender Submission Portal or direct such queries to the contact person listed in the RFX Document in the stipulated manner.

A Bid, in respect of which any such unauthorised communication has occurred, may be disqualified.

## **17 EXCHANGE AND REMITTANCE**

- 17.1 The Respondent should note that where the whole or a portion of the contract or order value is to be remitted overseas, Transnet shall, if requested to do so by the Supplier/Service Provider, effect payment overseas directly to the foreign principal or manufacturer of such percentage of the contract or order value as may be stipulated by the Respondent in its Bid Documents.
- 17.2 It is Transnet's preference to enter into Rand-based agreements. Transnet would request, therefore, that the Respondent give favourable consideration to obtaining forward exchange cover on the foreign currency portion of the Agreement at a cost that is acceptable to Transnet to protect itself against any currency rate fluctuation risks for the duration of any resulting contract or order.

- 17.3 The Respondent who desires to avail itself of the aforementioned facility must at the time of bidding furnish the information called for in the Exchange and Remittance section of the Bid Documents and also furnish full details of the principals or manufacturer to whom payment is to be made.
- 17.4 The South African Reserve Bank's approval is required before any foreign currency payments can be made to or on behalf of Respondents.

- 25.3 Such security, if required, shall be an amount which will be stipulated in the Bid Documents.
- 25.4 For the purpose of clause 25.125.1 above, Transnet will supply a Deed of Suretyship form to the successful Respondent for completion and no guarantee in any other form will be accepted. A copy of such form will be supplied to Respondents on request. For this purpose a Deed of Suretyship form will be provided which shall be completed and returned to Transnet or a designated official by the successful Respondent within 30 [thirty] calendar days from the date of the letter of acceptance. No payment will be made until the form, duly completed, is delivered to Transnet. Incomplete and/or incorrect Tax Invoices shall be returned and the conditional period will be recalculated from the date of receipt of the correct documentation.

### **37 CONTRACT QUANTITIES AND DELIVERY REQUIREMENTS**

37.1 Contract Quantities

**38** It must be clearly understood that although Transnet does not bind itself to purchase a definitive quantity under any contract which may be entered into pursuant to this Bid, the successful Respondent nevertheless undertakes to supply against the contract such quantities as may be ordered against the contract, which orders are posted or delivered by hand or transmitted electronically on or before the expiry date of such contract.

**39** It is furthermore a condition that Transnet will not accept liability for any material/stocks specially ordered or carried by the Respondent with a view to meeting the requirements under any such contract.

**40** The estimated planned quantities likely to be ordered by Transnet per annum are furnished in relevant section of the Bid Documents. For avoidance of doubt the estimated quantities are estimates and Transnet reserves the right to order only those quantities sufficient for its operational requirements.

#### **41** Period Contracts and Fixed Quantity Requirements

It will be a condition of any resulting contract/order that the delivery period embodied therein will be governed by the provisions of the Terms and Conditions of Contract.

#### **42** Progress Reports

The Supplier/Service Provider may be required to submit periodical progress reports with regard to the delivery of the Goods/Services.

#### **43** Emergency Demands as and when required

If, due to unforeseen circumstances, supplies of the Goods/Services covered by the Bid are required at short notice for immediate delivery, the Supplier/Service Provider will be given first right of refusal for such business. If it is unable to meet the desired critical delivery period, Transnet reserves the right to purchase such supplies as may be required to meet the emergency outside the contract if immediate delivery can be offered from any other source. The *Total or Partial Failure to Perform the Scope of Supply* section in the Terms and Conditions of Contract will not be applicable in these circumstances.

### **44 PLANS, DRAWINGS, DIAGRAMS, SPECIFICATIONS AND DOCUMENTS**

#### 44.1 Copyright

Copyright in plans, drawings, diagrams, specifications and documents compiled by the Supplier/Service Provider for the purpose of contract work shall be governed by the Intellectual Property Rights section in the Terms and Conditions of Contract.

#### 44.2 Drawings and specifications

In addition to what may be stated in any Bid Document, the Respondent should note that, unless notified to the contrary by Transnet or a designated official by means of an official amendment to the Bid Documents, it is required to tender for Goods/Services strictly in accordance with the drawings and/or specifications supplied by Transnet, notwithstanding that it may be aware that alterations or amendments to such drawings or specifications are contemplated by Transnet.

#### 44.3 Respondent's drawings

Drawings required to be submitted by the Respondent must be furnished before the closing time and date of the Bid. The non-receipt of such drawings by the appointed time may disqualify the Bid.

#### 44.4 Foreign specifications

The Respondent quoting for Goods/Services in accordance with foreign specifications, other than British and American standards, is to submit translated copies of such specifications with the Bid. In the event of any departures or variations between the foreign specification(s) quoted in the Bid Documents, full details regarding such departures or variations must be furnished by the Respondent in a covering letter attached to the Bid. Non-compliance with this condition may result in disqualification.

### 45 BIDS BY OR ON BEHALF OF FOREIGN RESPONDENTS

45.1 Bids submitted by foreign principals may be forwarded directly by the principals or by its South African representative or agent to the designated official of Transnet according to whichever officer is specified in the Bid Documents.

45.2 In the case of a representative or agent, written proof must be submitted to the effect that such representative or agent has been duly authorised to act in that capacity by the principal. Failure to submit such authorisation by the representative or agent shall disqualify the Bid.

45.3 When legally authorised to prepare and submit Bids on behalf of their principals not domiciled in the Republic of South Africa, representatives or agents must compile the Bids in the names of such principals and sign them on behalf of the latter.

45.4 South African representatives or agents of a successful foreign Respondent must when so required enter into a formal contract in the name of their principals and must sign such contract on behalf of the latter. In every such case a legal Power of Attorney from their principals must be furnished to Transnet by the South African representative or agents authorising them to enter into and sign such contract.

**46** Such Power of Attorney must comply with Rule 63 (Authentication of documents executed outside the Republic for use within the Republic) of the Uniform Rules of Court: Rules regulating the conduct of the proceedings of the several provincial and local divisions of the Supreme Court of South Africa.

**47** The Power of Attorney must be signed by the principal under the same title as used in the Bid Documents.

**48** If a Power of Attorney held by the South African representative or agent includes matters of a general nature besides provision for the entering into and signing of a contract with Transnet, a certified copy thereof should be furnished.

**49** The Power of Attorney must authorise the South African representative or agent to choose the *domicilium citandi et executandi*.

49.1 If payment is to be made in South Africa, the foreign Supplier/Service Provider [i.e. the principal, or its South African agent or representative], must notify Transnet in writing whether, for payment by electronic funds transfer [EFT]:

**50** funds are to be transferred to the credit of the foreign Supplier/Service Provider's account at a bank in South Africa, in which case the name and branch of such bank shall be furnished; or

**51** funds are to be transferred to the credit of its South African agent or representative, in which case the name and branch of such bank shall be furnished.

- 51.1 The attention of the Respondent is directed to clause 25 above [Securities] regarding the provision of security for the fulfilment of contracts and orders and the manner and form in which such security is to be furnished.

**52 DATABASE OF RESTRICTED SUPPLIERS**

The process of restriction is used to exclude a company/person from conducting future business with Transnet and other organs of state for a specified period. No Bid shall be awarded to a Bidder whose name (or any of its members, directors, partners or trustees) appear on the Register of Tender Defaulters kept by National Treasury, or who have been placed on National Treasury's List of Restricted Suppliers. Transnet reserves the right to withdraw an award, or cancel a contract concluded with a Bidder should it be established, at any time, that a bidder has been restricted with National Treasury by another government institution.

**53 CONFLICT WITH ISSUED RFX DOCUMENT**

- 53.1 Should a conflict arise between these General Bid Conditions and the issued RFX document, the conditions stated in the RFX document shall prevail.
