Due to load shedding, Dawid Kruiper Municipality faces a decrease in income as customers increasingly install solar panels, reducing their dependence on municipal power. In addition, several industrial customers were forced to shut down due to the lack of availability of electricity. The municipality also faces challenges in maintaining a constant electricity supply for the water works, which supply water to approximately 160 farms in the Mier area and surrounding areas of Dawid Kruiper Municipality. To address these issues, the municipality decided to lease portions of Klipkraal land for a period of 25-30 years specifically for solar energy use. They intend to lease this land to various Independent Power Producers (IPPs) and plan to select only one IPP with whom they will enter into a Power Purchase Agreement (PPA) for the duration of 25-30 years.

Tenderers should take note that any adjudication or award processes pursuant to this tender are contingent upon the necessary regulatory conditions being in place to make the generation and sale of energy in terms of the tender lawful and possible.

2. SCOPE OF WORK

The Dawid Kruiper Municipality is inviting competitive proposals from eligible independent power producers (IPP's) who are interested in leasing specific portions of Klipkraal land. Additionally, the municipality is seeking one IPP to engage in a Power Purchase Agreement (PPA).

This bid will follow a single-stage process where bidders are required to submit one technical proposal that meets the specified eligibility requirements. The proposals will undergo evaluation, and successful bidders who meet the eligibility requirements will be granted preferred bidder status. Preferred bidders will then receive an invitation to submit a financial and detailed technical proposal.

During this stage, the pricing for network connection will be determined by the Municipality's Electrical Services department in collaboration with the Finance department. This information will be communicated to qualifying bidders, who must take it into consideration when submitting their final bid price for evaluation.

Upon completion of the final evaluation, all successful bidders will be considered to finalize a 25-year land lease agreement; and only one bidder will enter a Power Purchase Agreement (PPA) with Dawid Kruiper Municipality.

The Municipality retains the authority to select multiple bidders for a 25-year land lease agreement, specifically for energy generation purposes. It should be noted that the lessee is not obligated to sell to the Municipality. However, only one bidder will be chosen to enter into a Power Purchase Agreement (PPA) with the Municipality. The objective of this tender is to lease various sections of Klipkraal land to different Independent Power Producers (IPP's) and

exclusively award a Power Purchase Agreement to the preferred IPP.

The Municipality maintains the authority to decrease the land area in accordance with the proposed plans from IPP's.

2.1 FUNCTIONAL REQUIREMENTS

The proposal needs to confirm, demonstrate and quantify that it meets the following functional requirements:

(a) The proposal must include only one power generation plant using various technologies, which will be situated at Klipkraal land. However, any component plant owned by Dawid Kruiper Municipality or any other municipality must not be included in the proposal, as it will lead to rejection of the bid.

(c) The selected bidder in terms of the Power Purchase agreement should guarantee that their power generation facility is linked directly to the Municipality's network. The Municipality will not entertain the procurement of wheeled energy from other Independent Power Producers (IPPs) connected to grids outside of its own grid.

(d) The successful bidders must finance all aspects of each project proposal including:

- Obtaining of land use rights
- Obtaining permission from the minister of energy to purchase electricity
- Design,
- procurement,
- construction,
- Upgrading the Municipal electrical network to facilitate grid connection import from the solar plant,
- commissioning,
- operation, maintenance and decommissioning as appropriate for each of the proposed plant.

(e) The power generation project should improve energy security and it is required to provide comprehensive information on the annual supply characteristics such as energy, capacity, time of supply, and dispatch-ability. These details must be included in the Power Purchase Agreement (PPA).

(f) The power generation project proposal must contribute to reduced carbon emissions and the total combined CO₂/kWh of energy supplied must be specified.

The types of low carbon generation technologies that will be considered, inter alia:

- Solar PV
- Organic Waste to energy
- Battery Energy Storage Solutions (BESS)
- Any of the above combined with storage

Any project that requires a fuel / feedstock agreement with another Municipality department (waste water, solid waste etc.) will not be considered and is explicitly excluded from this tender.

Innovative technologies will also be considered. However, the proposed generation methodology must have been successfully implemented at utility scale, either locally or internationally, with an operational track record in the last 5 years. **Technologies that have not been successfully implemented in the last 5 years and without a proven track record will not be considered in this bid and will result in bid rejection. Proof of operation must be provided in the tender**

proposal submissions.

2.2 SITE LOCATION AND ACCESS

The generation plant must connect to the Dawid Kruiper Municipality's network. The following information must be supplied at the first bid stage:

Table 1: Project generation information

Generator information	Comments
Peak Generation Capacity (MW ac):	50MW is required
Location of site specifying point of power evacuation / connection:	Delta Substation (Rosedale)
The required land area for the installation of the solar plant shall be expressed in hectares.	
Type of Technology e.g Waste to energy, Solar etc	

The proposal submission must include a comprehensive explanation of the technology's functioning, as well as a project timeline encompassing authorizations and license approval stages, construction, and commissioning. Failure to provide these requirements will lead to bid rejection.

The bidders shall be granted a timeframe of up to three years, starting from the date of signing the Power Purchase Agreement (PPA) or lease agreement of the land, to finalize the design, execute construction activities, and successfully commission the plant.

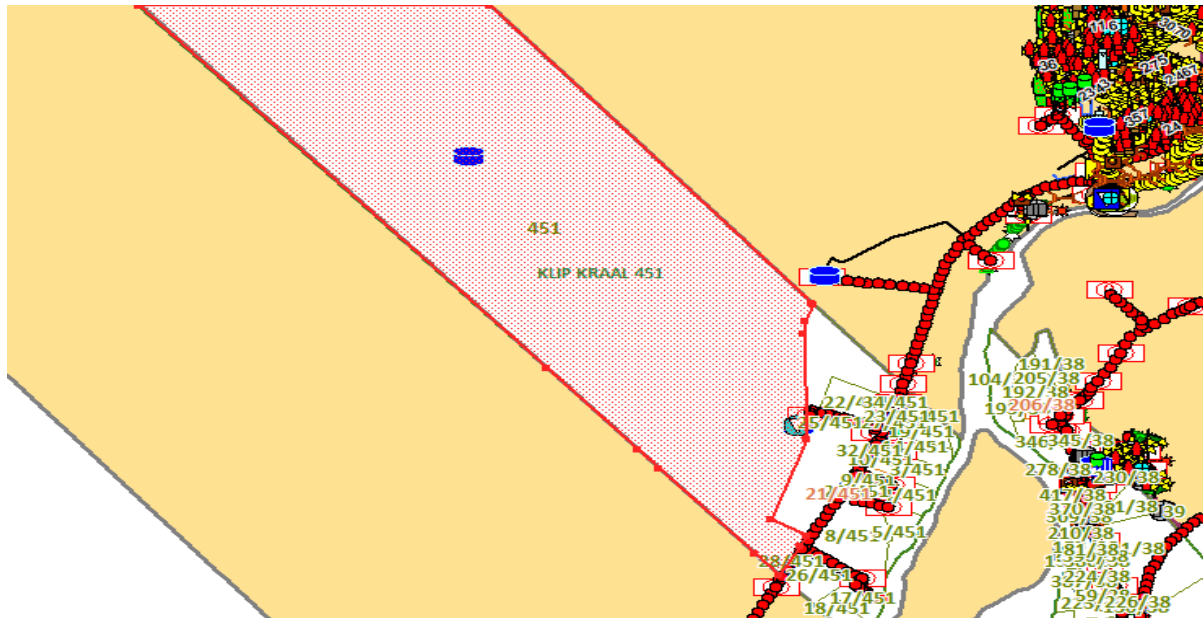

2.3 AUTHORISATIONS AND LICENCES

The Bidder must assess and include in the bid all necessary authorizations and licenses for various aspects of the proposed facility, such as environmental, air quality, waste, water, electricity generation, and land use. The anticipated processes and timeframes for obtaining these authorizations and licenses should also be clearly outlined in the bid document. It is important to note that if any of these authorizations or licenses are refused or become unobtainable for any reason, it may result in termination of the awarded contract through this tender process.

2.4 PLANT LOCATION

The Municipality has determined that the Klipkraal farm (located at coordinates 28.4755528°S, 21.1334146°E) is the most suitable land for locating the plant.

The preferred bidder who enters into a Power Purchase Agreement (PPA) with the municipality will have the advantage of leasing the portion of land closest to the existing electrical infrastructures. In case other Independent Power Producers (IPPs) are awarded portions of the land to lease, the municipality reserves the right to determine which portion of land may be available and its location.

2.5 TRADE NAMES OR PROPRIETARY PRODUCTS

Bid specifications must refrain from mentioning any specific trade mark, name, patent, design, type, specific origin or producer unless there is no other adequately precise or comprehensible manner of describing the work's characteristics. In such cases, if a reference is necessary, it should be accompanied by the phrase "or equivalent".

2.6 EMPLOYMENT OF SECURITY PERSONNEL

All security staff employed by the supplier on behalf of the Dawid Kruiper Municipality or at any Dawid Kruiper Municipality property must be registered with Private Security Industry Regulatory Authority (PSiRA). Proof of such registration must be made available to the Dawid Kruiper Municipality's agent upon request.

2.7 FORMS FOR CONTRACT ADMINISTRATION

The supplier shall complete, sign and submit with each invoice, the following:

- a) Monthly Project Labour Report
- b) B-BBEE Sub-Contract Expenditure Report
- c) Joint Venture Expenditure Report

The Monthly Project Labour Report must include details of all labour (including that of sub-contractors) that are South African citizens earning less than R350.00 per day, as adjusted from time to time (excluding any benefits), who are employed on a temporary or contract basis on this contract in the month in question.

In addition to the Monthly Project Labour Report the Supplier shall simultaneously furnish

the Municipality's Agent with copies of the employment contracts entered into with such labour, together with certified copies of identification documents, proof of attendance in the form of attendance register or timesheets as well as evidence of payments to such labour in the form of copies of payslips or payroll runs. If the worker is paid in cash or by cheque, this information must be recorded on the envelope and the worker must acknowledge receipt of payment by signing for it and proof of such acknowledgement shall be furnished to the Municipality's Agent.

The Monthly Project Labour Reports shall be completed and submitted in accordance with the instructions therein. The **B-BBEE Sub-Contract Expenditure Report** is required for monitoring the supplier's compliance with the sub-contracting conditions of the **Preference Schedule**.

The Joint Venture Expenditure Report is required for monitoring the joint venture's/consortium/partnership compliance with the percentage contributions of the partners as tendered, where the joint venture/consortium/partnership has been awarded preference points in respect of its consolidated B-BBEE scorecard.

2.8 LOCAL PARTICIPATION

It is recommended that bidders employ local people/contractors during the construction and/or operational stages of the project as far as possible.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
