25 CONTRACT PRICE ADJUSTMENT

25.1 Formula

- 25.1.1 Prices submitted for this bid will be regarded as non-firm and may be subject to adjustment(s) in terms of the following formula, defined areas of cost and defined periods of time.
- 25.1.2 Applications for price adjustments must be accompanied by documentary evidence in support of any adjustment claim.
- 25.1.3 The following price adjustment formula will be applicable for calculating contract price adjustments (CPA).

Table 5: Contract Price Adjustment Formula

$Pa = (1 - V)Pt \left(D1 \frac{R1t}{R1o} + D2 \frac{R2t}{R2o} + D3 \frac{R3t}{R3o} + \dots + Dn \frac{Rnt}{Rno} \right) + VPt$		
Pa	=	The new adjusted price to be calculated
V	=	Fixed portion of the bid price (15% or 0.15)
Pt	=	Original bid price. Note that Pt must always be the original bid price and not an adjusted price
(1-V)Pt	=	Adjustable portion of the bid price (85% or 0.85)
D1 – Dn	=	Each factor (or percentage) of the bid price, e.g., material, labour, transport, overheads, etc. The total of the various factors (or percentages) D1 – Dn must add up to 1 (or 100%)
R1t – Rnt	=	End Index. Index figure obtained from the index at the end of each adjustment period.
R1o–Rno	=	Base Index. Index figure at the time of bidding.
VPt	=	15% (or 0.15) of the original bid price. This portion of the bid price remains fixed, i.e. it is not subject to price adjustment

25.2 Formula component definitions

25.2.1 Adjustable amount

The adjustable amount is the portion of the bid price which is subject to adjustment. In this bid the adjustable amount is 85% of the original bid price. For example, if the bid price is R1000, then only R850 will be subject to adjustment.

25.2.2 Fixed portion

The fixed portion represents those costs which will not change over the adjustment period and DOES NOT represent the profit margin. In this bid the fixed portion is 15% of the original bid price. Using the same example as above, it would amount to R150 which will remain fixed over the contract periods.

25.2.3 Cost components and proportions

The cost components of the contract price usually constitute the cost of materials (raw material or finished product), cost of direct labour, cost of transport and those other costs which are inclined to change. The proportions are the contribution to the contract price of each of these cost components. In this bid the following cost components will be used to calculate contract price adjustments.

Bidders are requested to submit the cost breakdown of the bid price for each item with their bid. Should the cost breakdown be the same for all items on the bid, please indicate it clearly in the bid document. Bidders will not be allowed to change the cost breakdown of bid prices during the tenure of the contract.

Successful bidders that are direct importers of raw material / finished product can apply for RoE adjustment under cost element D1. If the successful bidder is not a direct importer of raw material / finished product, cost component D1 would not be applicable and only local cost components (D2 - Dn) would be applicable.

Table 6: Contract Price Adjustment Cost Components

Cost Component	% Contribution
D1 – Imported Raw Material / Finished product	
D2 - Local Raw Material / Finished product (if applicable)	
D3 – Labour	
D4 – Transport	
TOTAL (Cost components must add up to 100%)	

25.2.4 Applicable indices/references

The applicable index refers to the relevant market index, which is a true reflection of price movement(s) in the cost over time. In this bid the following indices or reference will be applicable:

**Table 7: Applicable Indices/References**

Cost component	Index Publication	Index Reference
D1 – Imported Finished product (if applicable);	Reserve bank ROE publication/ Supplier / Manufacturer invoice(s) and remittance advice. ¹	Documentary evidence to accompany claim and ROE
D2 - Local Finished product (if applicable):	Specify (STATS SA Index)	STATS SA Table (Specify)
D3 – Labour	STATS SA P0141 (CPI), Table E; OR Labour agreement ²	Table E - All Items (CPI Headline) OR Labour agreement to be provided/ Regulated Pricing Adjustment
D4 – Transport	Stats SA P0141 (CPI) Table E	Transport – Other Running Cost
D6 – Other	Specify (STATS SA Index)	STATS SA Table (Specify)

25.2.5 Base index date

The base index date applicable to the formula is defined as the date at which the price adjustment starts. In this bid the base index date is **November 2021**

25.2.6 End index date

The end index dates are the dates at predetermined points in time during the contract period. In this bid the end indices are defined in the next paragraph (Price Adjustment Periods).

25.2.7 Price adjustment periods

Price adjustment shall be applied on an annual basis at the anniversary of the transversal contract from commencement date of the contract date.

¹ In cases where invoices are supplied as documentary evidence, it is advised that invoices closest to the Base Index date and the End Index date be submitted. It should ideally reflect the adjustment period.

² In the absence of a labour agreement, the labour cost component will be adjusted with CPI Headline inflation.

1.1.1 Rates of exchange (RoE) – Base and average rates

In the event where material and/or finished products are imported the following will apply:

- 1.1.1.3 The imported cost component (D1) will be adjusted together with all the other cost components indicated in paragraph above and at the predetermined dates indicated in paragraph above.
