DESIRED OUTCOMES

The project will ensure that Park station has a standby power supply that will continue to supply power to Park Station operational and commercial areas in case of emergency or during power interruption. The standby power plant will cover all areas of the station and ensure continues operations for a period of 72 hours without interruptions. The plant will have be synchronized operate according to power consumption during peak and off peak hours.

○ **PROJECT BENEFITS TO PRASA**

- Park Station will have continuous power supply even when there are power outages from Eskom.
- Park Station tenants will continue to trade during power interruptions.
- Operational areas will have continuous power supply.
- Limit unsafe areas due to darkness such as Metrorail platforms 1 to 12.
- Improve safety of commuters, tenants, and workers at Park Station.

○ **CURRENT MECHANISMS IN PLACE TO ADDRESS THE PROBLEM**

The current mechanism in place is one generator 1000KVA only supplying certain section of the station with power during power outages. Most part of the station operational areas are not covered by this existing 1000KVA generator. Rail operations and commercial areas are not covered.

- Hub No 2 will feed standby power to the existing Sub Stations D, E and F
- The cluster of generators in each hub will be controlled so that generators would only operate according to load demand
- One of the existing generators will be properly serviced and re-used in Hub No 1. A total of eight new, 1000 kVA generators will thus be required.
- Each Hub will be provided with a Bulk Fuel supply reservoir sufficiently sized to ensure a running time of 72 hours @ 80% load
- Power distribution will be via Aluminum Busbars. The busbars will be fully impregnated with a resin material
- The use of copper cables will be minimized to discourage distribution damage due to theft
- The existing Main Distribution boards will be modified for the connection of busbars
- The transformer capacity in Sub Station E is insufficient to carry the load

and the existing transformer will be replaced with 3 new 800 kVA transformers

- All damaged and redundant equipment will be stripped out and be disposed off
- A centralized power monitoring and control system will be installed in a suitable control room. Generator operating status, fuel volume and other parameters will be monitored

16. EVALUATION METHODOLOGY

The evaluation of Bids will be based on the information contained in Bids received in RFP and, which may be further supplemented by presentations and clarification information provided, if required. All Bids shall be equally evaluated by various committees involved in the evaluation process in accordance with stated Evaluation Criteria. Procurement integrity and fairness, transparency, competitiveness and full accountability will always be paramount.

16.1 TRANSFORMATION PROCUREMENT

PRASA may transform its procurement spend by utilising the following:

- i. PPPFA allows organs of state to utilize prequalification criteria for preferential procurement.
- ii. PPPFA allows organs of state to use objective criteria and stipulate same in the tender document.

NB: Tenderers are required to meet minimum stipulated threshold for local production and content for designated sectors for construction in accordance with the Preferential Procurement Regulation, 2017.

All annexures relating to local content are stipulated in SBD 6.2 form

The PPPFA Regulations, 2017, prescribe how Local Production and Content is to be measured in public sector Bids. In terms of these regulations when issuing bids involving designated sectors, PRASA must advertise such bids with a specific bid condition that only locally produced or manufactured Goods or Services which meet a stipulated minimum threshold for local production and content will be considered. For example, if the stipulated minimum threshold for LOCAL CONTENT is 70%, this means that 70% of the bid price must be spent on LOCAL CONTENT (i.e. everything that is not included in Imported Content.)

- i. Designated sectors, sub-sector or industry or product, are those sectors which in accordance with national development and industrial policies have been designated by the DTI in consultation with National Treasury, for Local Production and Content. The National Treasury must inform organs of state of any designation made through a circular / instruction note. The circulars/instructions issued by NT on designated

sectors must always be strictly adhered to when bids in these sectors are issued. Refer to NT's website for the latest list of designated sectors. Further please refer to the circulars/instructions issued by NT as certain sectors have designated sub-sectors/components in addition to the overall thresholds.

- ii. PRASA, its Divisions and Subsidiaries are to note that local content is applicable to all designated products irrespective of the value unless indicated otherwise in the specific Instruction/Circular.
- iii. PRASA, its Divisions and Subsidiaries must be aware that certain Bidders may have approach the DTI to be exempted from meeting all LOCAL CONTENT requirements. Where such exemption has been received by a Bidder, Procurement must request a copy of such exemption from the Bidder with their Bid submission.
- iv. Based on the results above the GCPO must engage the DTI to seek exemption from the LOCAL CONTENT requirement. The application for an exemption must be accompanied by a report of the outcome from the above exercise, as proof of the status of the market. Should an exemption be granted, the exemption must be referred to in the Bid document.
- v) Where, after the contract has been awarded, a bidder can no longer meet the LOCAL CONTENT requirements, Procurement and the end user must deal with such a bidder in terms of the contractual terms and conditions relating to non-performance. However, there are National Treasury Instruction Notes that were issued with a clause which affords bidders an opportunity to approach the DTI with a request for exemption. In this regard, Procurement and the end-user must always verify if exemption is applicable against that specific Instruction Note.

LOCAL CONTENT Requirements in Bid Documents

It is a requirement that the following documents be listed as mandatory returnable documents, whenever a minimum threshold for LOCAL CONTENT is required:

- i. Declaration Certificate for Local Production and Content [SBD 6.2]; and
- ii. Annexure C – Local Content Declaration: Summary Schedule.

- iii. The following documents are supporting schedules and may be requested as essential returnable documents if PRASA would like to verify them for a bid:
- iv. Annexure D – Imported Content Declaration: Supporting Schedule to Annexure C; and
- v. Annexure E – Local Content Declaration: Supporting Schedule to Annexure C.

16.2 Subcontracting

are required to select suppliers to subcontract to from a list that PRASA will make available listing all suppliers registered on the approved CSD database of National Treasury for the required goods/services in respect of the applicable designated groups.

PRASA requires Proof of the subcontracting arrangement or confirmation in writing of both parties' intention to enter into a sub-contracting agreement of 30% of the value of the contract should they be awarded business by PRASA

Respondents are required to submit proof of the subcontracting arrangement between themselves and the subcontractor. Proof of the subcontracting arrangement must include a subcontracting agreement or submit confirmation in writing of their intention to enter into a sub-contracting agreement should they be awarded business by PRASA through this RFP process.

Where no tenderer meets sub-contracting criteria, institutions must cancel the tender & investigate reasons for tenderers failing to meet compulsory sub-contracting

In the event of uncertainty with regard to information provided by the tenderer and the CSD is unable to verify such information at that stage, PRASA may request necessary proof to substantiate the information provided.

Where a tenderer was awarded the contract on the basis of subcontracting EMEs or QSEs or designated groups in terms of regulations 4 and 9, the tenderer may not change the subcontractor without approval of PRASA.

PRASA should obtain representations or input from the initial subcontractor who was part of the tender process whose credentials were used to win the tender.

PRASA should make informed decision after considering input from all parties concerned, the subcontracting arrangement or contract remains between the main contractor and the subcontractor.

The responsibility to sub-contract with competent and capable subcontractors' rests with the main contractor/ supplier.

The contract will be concluded between the main contractor and PRASA therefore, the main contractor and not the sub-contractor would be held liable for performance in terms of its contractual obligations.

Main contractors/ suppliers are discouraged from subcontracting with their subsidiary companies as this may be interpreted as subcontracting with themselves and / or using their subsidiaries for fronting. Where primary contractor subcontracts with a subsidiary this must be declared in tender documents.
