SECTION 7: SCOPE AND SPECIFICATION OF REQUIRED SUPPLY / SERVICES

7.1 BACKGROUND

- 7.1.1 Waste Management Directorate (CSW) is responsible for waste management from collection to safe disposal of eThekweni's municipal solid waste/domestic waste. This essential service must further satisfy the legislative compliances as set out in the National Environmental Waste Management Act.
- 7.1.2 The rapid growth of cities in the developing world coupled with growing urban sprawl and population increases are a few pressures faced with in trying to achieve a sustainable city. With such pressures comes the increase in waste generation placing added strain on existing waste management systems to become resilient and sustain current demands.
- 7.1.3 Recent local landfill experience has shown that apart from legislative requirements and environmental standards that continue to become more restrictive, there has also been an uprising from local communities calling for closure of landfill sites linked to environmental pollution and harm to human health. Moreover, the combination of these reactions has resulted in the city's proposed new landfill site i.e. the Shongweni Landfill Site been negatively affected from abnormal delays in the licencing process. The significant delay has resulted in two out of the four city owned landfill sites reaching imminent closure (Bisasar Road and Mariannhill Landfills).
- 7.1.4 Whilst the new proposed Western Waste Management Facility in Shongweni has been recently licensed, it is some 2-3 years away from implementation owing to Water Use License Applications, Biodiversity Offsets, work stoppages, still has to be tendered and then construction.
- 7.1.5 The restrictions on Bisasar and the closure for Mariannhill Landfill sites to domestic waste has by default **increased the city's operational cost** in alternatively managing the waste through transfers stations and direct transfer to the remaining outer lying city owned landfill sites i.e. Buffelsdraai Landfill in the North and Lovu Landfill in the South. The impact at current is that the two remaining city owned landfill sites with capacity i.e. Lovu in the south and Buffelsdraai in the north are overwhelmed with waste both from a lining capacity (disposal area) and operationally to process the incoming waste. Transfer Stations result in backlogs daily with waste on the floor conditions.
- 7.1.6 The ripple effect is that **there is a reduced level of service to the ratepayer as collection crews are traveling further to outer lying landfills** or waiting in abnormal queues at Transfer Stations. Ratepayer's waste is as a result not being timeously collected and Collectively this **has increased CSWs three (3) big cost drivers namely Overtime, Maintenance and Hire.**
- 7.1.7 The resultant impact to the ratepayers of Durban has been a significant increase on the overall cost on safely managing the waste mainly due to the existing Mariannhill and Bisasar landfills ceasing disposal of municipal solid waste. The order is to further mitigate the negative impacts to the ratepayers as well as the receiving environment from pollution.
- 7.1.8 As a result, **WMD in the interest containing the increasing operational costs** to the ratepayers of eThekweni **requires to secure an alternative waste disposal service** / final disposal point from other licensed waste management facilities within the eThekweni area that could be considered for accepting eThekweni's domestic waste from central and western areas where the existing landfills sites have closed to accepting this waste stream.

7.2 EMPLOYER'S OBJECTIVES
