1. PURPOSE

- 1.1. To appoint the service provider(s) to undertake environmental impact assessment studies for afforestation in KwaZulu-Natal and Eastern Cape, for a period of twenty-four (24) months.

2. INTRODUCTION AND BACKGROUND

- 2.1. The Department of Forestry, Fisheries, and the Environment (DFFE) completed the development of the Forestry Sector Masterplan in November 2020. The master plan is essentially a framework for investment in the sector and promotes growth and inclusivity.
- 2.2. Part of the growth of the sector emanates from opportunities that exist for Afforestation in KwaZulu-Natal and Eastern Cape. New Afforestation refers to the establishment of new plantations mostly on virgin land.
- 2.3. Afforestation is regarded as a Stream Flow Reduction Activity by the National Water Act, of 1998, and in addition, the National Environmental Management Act, of 1998 requires one to undertake the Environmental Impact Assessment studies, especially when this is done on virgin land. Therefore, a licence is required before afforestation can take place.
- 2.4. Most of the land that has potential for Afforestation is owned by communities or historically disadvantaged individuals who do not have the resources and means to develop the land.
- 2.5. As such the DFFE will then facilitate the Environmental Impact Assessment on behalf of these communities and individuals so that licences for afforestation can be issued and the land can be developed for planting purposes and expansion of the resource in line with the Masterplan.

3. OBJECTIVES

- 3.1. The main objective of this project is to streamline and facilitate the licensing process on behalf of communities and individuals in KwaZulu-Natal and Eastern Cape to develop their land.

The secondary objectives include the following:

- 3.1.1. Ensure the afforestation of areas in KwaZulu-Natal and Eastern Cape.
- 3.1.2. Facilitate the entrance of small growers into the market.
- 3.1.3. Create employment and economic opportunities, especially in rural areas where there are high levels of poverty.
- 3.1.4. Ensure that there is timber for downstream processing industries thereby retaining and expanding jobs and economic opportunities in the sector.

4. SCOPE AND EXTENT OF WORK

The following is only a guideline for the appointed Service Provider(s):

- 4.1. The appointed Environmental Assessment Practitioner/s (EAP) would be required to identify all applicable listed activities and obtain Environmental Authorisation.
- 4.2. The EAP would be required to conduct Environmental Impact Assessment Studies and obtain environmental authorisation for the financial year 2023/24 to 2025.
- 4.3. The Environmental Impact Assessment Studies (Full Scoping EIA) will be conducted in the KwaZulu-Natal and Eastern Cape Provinces, on land that has been identified as having potential for afforestation.
- 4.4. The projects identified amount to an estimated 47 000 ha.
- 4.5. The appointed service provider(s) would be required to conduct a compulsory site visit before the work commences.
- 4.6. The project will include a pre-application meeting with the competent authorities, detailed soil surveys, land use plans, other specialist studies as required by the DFFE screening tool, public participation process up until Environmental Authorisation (EA) is obtained.
- 4.7. At the end of the EIA process, it is expected that an EA / Record of Decision is issued.
- 4.8. Detailed project implementation plan and methodology.
- 4.9. Milestones and date of completion of the service.

Milestones	Date of Completion
Project Management plan / Submission of Project Schedule to the Project Manager	Month 1
Screening / Scoping report	Month 3
Site visits	Month 4
Soil surveys and plans	Month 5
