Bed cleaning

Clean and maintain all beds (flowers/plants) from foreign objects to achieve neatness; cleanliness and having a pleasing appearance (favourable conditions).

Beds have different characteristics based on size, shape and quantity plant material. This requires different cleaning methods to achieve favourable conditions. The *Contractor* must align his/her activities to the various conditions in the beds. Exposed soil will be weed free and levelled. Where beds are covered with mulch (bark / covering protection) or any other soil additive this must be also free of weed and foreign objects. Beds totally covered with flowers / plants must be cut back periodically to keep the species localised and stimulate growth. Thin out overgrown areas and remove dead leaves.

Irrigation

Maintain all existing irrigation systems for effectivity. Ensure control valves and timing schedules are efficiently setup.

Water all fauna and flora (flower beds) in such a manner to uphold and improve on the present conditions - by utilising a manual process (water hoses connected to defined George Airport water points). Where available - the *Contractor* can utilise the existing irrigation system.

Water all pot plants which is located on the outside and the inside of the Airport buildings and in walk-way canopies as well as at the car rental returns.

The water feature located in section E must be maintained on an annual basis. Clean the stainless-steel flowers. Empty the pond and clean it with high pressure from all debris, grime and mould. The Contractor should obtain guidance and information on the treatment and/or eradication techniques required from the Department of Forestry, Fisheries and the Environment (DFFE). The contractor is required to conduct annual surveys to determine the relevant species, their distribution and extent on an annual basis to identify areas requiring intervention as well as to determine success rates of the eradication programme.

Examples of eradication techniques may include:

- Spot treatment of applicable herbicide on newly formed species – removal after it died completely
- Cut-off and stump treatment of established species
- Etcetera

Weed and Pest control

The eradication of weeds whether manually, mechanically or by chemical means - is the responsibility of the *Contractor* who must determine the most effective method. Ensure that applied herbicides will cause no long-term soil imbalance / or detrimental effect as a result of the indiscriminate use of such herbicides. An Environmental clause might be stipulated on the MSDS or alternatively the product must be accompanied by a report from the Service provider relating to probable impacts.

Application of herbicides must adhere to all safety, environmental and health legislation and regulations. A suitably qualified person who is registered in terms of the Chemicals Control Act (Act 36 of 1947) must handle the application of these chemicals. The *Contractor* must obtain and capture valuable data on the present conditions against herbicide application treatments. The data must disclose the following minimum information on a three-monthly basis:

- Rate of growth in the various seasons
- Impact of applicable herbicide to the natural growth rate
- Progress in the eradication of unwanted vegetation in specific areas
- Etcetera

Within the 3-meter band strip of Areas J & K, non-selective herbicide must be applied on the fence line (approximately 2 to 3 cm in width) in order to prevent vegetation growth into the fence.

All herbicide application events must be diligently documented and filed.

The control of pests applies to outdoor areas only on lawns, in beds, on trees, shrubs and other foliage. The *Contractor* will perform pest control measures as and when required and or when their appearance becomes evident or in the interests of the plants affected so as not to detract from the general appearance of the contracted areas. A provisional sum is made available in the BOQ for this purpose. The *Contractor* must advise where lawn/grass sods must be planted. Alternatively hydro-seeding may be applied.

Cleaning and Litter picking of Paved area activities – clear soil, weeds, growth

Clean and maintain all paved areas from unwanted grass, weeds and rubbish. Ensure that all paved areas are clear from sand and soil.

Clean and maintain all storm-water and sewer infrastructure from unwanted vegetation growth and soil built-up. This will prevent flooding, blockages and congestion of the said infrastructure.

Grass cutting (include fire break and landside perimeter and security fences)

Conditions will be dependent on the season of the year. The end result must achieve an acceptable clean cut, groomed and "finished off" look. The optimum length of the cut grass may differ from place to place and the method of mowing and trimming may also vary according to the type of grass and the standard of finish required.

The contractor shall ensure that mowing, trimming and cleaning activities is performed uniformly during all site visits, in order to achieve a uniform grass length and acceptable aesthetic appearance.

All lawns should be edged at the same time as the grass cutting operations where such areas adjoining buildings, paving, manholes, storm water infrastructure, trees, beds, sidewalks, fences, poles or any other obstacle in the lawn areas. Edging is performed mechanically only. No chemicals should be used.

Mowing and brush cutting must be done with full awareness of how the flying debris will impact passengers; installed equipment; vehicles, walkways and roads. Consider the following:

- Present wind direction
- Direction of how the mechanical cutting action of the equipment throws the waste trimmings and loose debris aside
- Apply a moving shield (net/canvas) where required.

Grass cutting on both sides of the perimeter fence must maintain a 3-meter band from the fence outwards. Grass length within this band must be maintained as short as possible. Any obstacles within this band must be removed as per ACSA AVSEC legislation and the holes must be closed and compacted.

Garden refuse (requirement: municipal dumping licence)

Garden refuse is generated by the *Contractor* during the course of his normal activities and does not include refuse from any other source. This refuse may include branches, leaves and other plant matter but may also consist of other objects that need to be disposed of from the contract maintenance areas according to the service agreement. The resources must be adequately experienced to perform the required services and will be interviewed by the Employer prior to the start of the services. The CV of the Supervisor will be evaluated under the functionality criteria as part of the procurement process. The resources will be required to obtain airside permits. This implies that a criminal check will be conducted accordingly.

The *Contractor* must establish a temporary office / container (staff facility) with an ablution facility on the airport premises for the resources to operate from. A provisional sum is included in the Bill of Quantities (BOQ) for this purpose. This facility will be procured by the *Contractor* and installed at the agreed location. The below definitions are in relation to the above requirement.

1. Definitions

The below terms are not defined in the VAT Act and as such, the ordinary meaning has been taken into account:

AIRPORTS COMPANY

SOUTH AFRICA

- 1.2 **Consortium or Joint Venture** - an arrangement between two or more persons based on an agreement to generally operate a single, limited or defined project. The parties to such an agreement will generally share control of the arrangement and share the product or output of the venture
- 1.3 **Partnership** - an arrangement between two or more persons based on an agreement. The parties to that arrangement should have the intention to be partners and the essential elements for a partnership being the partners' contributions, a profit objective and joint benefit for the partners must be evident from the agreement.

2. The Law

Section 51 of the VAT Act states that:

- (1) *Subject to the provisions of section 46, where any body of persons, whether corporate or unincorporate (other than a company), carries on or is to carry on any enterprise-*
- a. *such body shall be deemed to carry on such enterprise as a person separate from the members of such body;*
 - b. *registration of that body as a vendor shall be effected separately from any registration of any of its members in respect of any other enterprise;*
 - c. *liability for tax in respect of supplies by that body shall be determined and calculated in respect of the enterprise carried on by it as an enterprise carried on independently of any enterprise carried on by any of its members, and any refund relating to that body's enterprise which is payable in terms of section 44 shall be made to that body; and*
 - d. *the duties and obligations imposed by this Act on any vendor or other person shall, as respects the enterprise carried on by that body, be performed by it separately from the duties and obligations imposed on any of its members.*

Should the joint venture or partnership or consortium not be registered for VAT, **VAT cannot be levied on any invoice** that will be issued out to Airports Company South Africa for services rendered.
