1. PURPOSE

- 1.1. To appoint a service provider to assist the Waste Management Bureau (WMB) in reviewing, calculating, and recommending processing fees per category of technologies utilized in Waste Tyre processing for a period of two (2) months. The categories of technologies to be assessed for the processing fee are the following:
 - 1.1.1. Energy recovery (TDF)
 - 1.1.2. Pyrolysis
 - 1.1.3. Material recycling (crumbing)
 - 1.1.4. Product recycling (reuse)

2. INTRODUCTION AND BACKGROUND

- 2.1. The WMB has been established in terms of the National Environmental Management: Waste Amendment Act, 2014 (Act No. 26 of 2014) (NEMWAA) and is mandated to *inter alia* promote and facilitate minimisation, reuse, recycling, and recovery of waste.
- 2.2. Since 2017, WMB has been managing the waste tyre operations across the entire value chain of waste tyres. The final stage of the value chain is the processing of waste tyres. There are several technologies used in processing of waste tyres – these include Energy Recovery, Pyrolysis, Material recycling (crumbing) and Product recycling (reuse).
- 2.3. A processing fee is provided by the WMB for certain technologies to incentivise and increase the processing capacity in the country. However, despite this incentive, several processing plants have closed in recent years which has resulted in the increase of waste tyre stockpiles in the temporary storage facilities. The current Tyre Processing fee is a blanket rate of 31c per kilograms. The fee has remained unchanged since 2013.
- 2.4. In November 2019, the Minister of Forestry, Fisheries, and the Environment commissioned the Council for Scientific and Industrial Research (CSIR) - in terms of section 29 of the Waste Act - to develop an Industry Waste Management Plan for the waste tyre sector. The current legislative framework as contained in the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008): Tyre Regulations, 2017 and the Pricing Strategy for Waste Management Charges, 2016 provides the setting for this plan.
- 2.5. A primary focus of the plan is to support the establishment of a waste tyre processing sector in South Africa which will reduce the negative environmental impacts of waste tyres and support Small, Medium and Micro Enterprise (SMME) development and job creation in a circular economy. A key pillar of increasing processing capacity in the country is providing economically sound incentives to get the industry sustainable and creating jobs.

- 2.6. Therefore, as a mechanism to stimulate the processing industry and to attract new players in the industry as per the objectives of the Waste Tyre Management Plan, a review and recalculation of the processing fee for each processing technology is required.

3. OBJECTIVES OF THE PROJECT

- 3.1. The Waste Management Bureau (WMB) would like to appoint a service provider to assist the WMB in evaluating and putting forward recommended processing fee for each technology utilized in the processing of waste tyres. The evaluation should use the waste tyre hierarchy and circular economy principles as guiding parameters.

4. SCOPE AND EXTENT OF WORK

- 4.1. The WMB intends to appoint an experienced and reputable service provider to develop an incentive model that will determine an economically sound processing fee for each category of processing technology; these processing fees will act as an incentive to the waste tyre processing industry. Over and above using the waste hierarchy and circular economy principles as the guiding parameters, the variables that the model needs to consider for each technology include, amongst others:

- Capital expenditure
- Operational costs
- Research and Development related costs
- Continued re-investments necessary for the sustainability and scaling of plants
- Supply prices
- Macroeconomic indicators relevant for the industry
- Any other micro economic variables specific to the technology type

- 4.2 A view and an analysis of the barriers to entry is also required.

- 4.3 The Service Provider must have the following experience and knowledge:

- a) Have clear knowledge and understanding of the National Environmental Management Waste Act, Act No.59 of 2008 and its Regulations and related legislation.
- b) Have experience in developing pricing and costing models across various industries
- c) Have scientific understanding and knowledge of the process involved in processing of waste tyres or have access to resources that have this knowledge

- 4.4 Be able to communicate effectively both verbally and in writing so that the model/s developed are well understood. The WMB intends to appoint an experienced and reputable service provider to develop an incentive model that will determine an economically sound processing fee for each category of processing technology; these processing fees will act as an incentive to the waste tyre processing industry. Over and above using the waste hierarchy and circular economy principles as the guiding parameters, the variables that the model needs to consider for each technology include, amongst others:
