Transnet pipelines  
274 Alwyn Street  
Waltloo  
Pretoria

6 April 2018

Attention: Mr. Andrew Martin

#### **RE: INDUSTRIAL EFFLUENT DISPOSAL INTO THE MUNICIPAL SEWERAGE SYSTEMS**

Your request of the 01/02/18 to discharge industrial effluent into the Municipal sewer refers.

You are hereby granted permission to discharge industrial effluent into the above mentioned systems based on the City of Tshwane Municipality Sanitation By-laws **section 33 (1) – (7)** (*Permission to discharge industrial effluent*), **section 34 (1) – (3)** (*Control of industrial effluent*), **section 35 (1a-1j) – (2a-2c)** (*Prohibited discharge*), **section 40 (7c) – (7f)** (*Metering and assessment of the volume and composition of industrial effluent*) and **ISO 14001** regulations.

The City of Tshwane Municipality is an authorized Water Service Provider (Authority). The Municipality will provide water according to conditions as promulgated in the Water Services Act and the Water by-laws.

NB\* - Application for industrial effluent discharge into the Municipal sewer systems should be renewed yearly (i.e. every twelve months). Any alterations to the sewer systems should be brought under the attention of this section.

It is expected from Transnet pipelines Waltloo to conform at all times with the requirements of no pollutants to enter the storm water drains of the City Tshwane Metropolitan Municipality as mentioned in the by-laws, section 32(1) and (2).

- 32 (1) The owner or occupier of any piece of land on which steam or any liquid, other than potable water, is stored, processed or generated shall provide all facilities necessary to prevent any discharge, leakage or escape of such liquid to any street, storm water drain or watercourse, except where, in the case of steam, the Municipality has specifically permitted such a discharge.

*(2) Where the hosing down or flushing by rainwater of an open area on any private premises is, in the opinion of the Municipality, likely to cause the discharge of objectionable matter into any street gutter, storm water drain, river, stream or other watercourse, whether natural or artificial, or to contribute towards the pollution of any such watercourse, the Municipality may instruct the owner of the premises to execute, at his cost, whatever measures by way of alteration or the drainage installation or roofing of the area it may consider necessary to prevent or minimize such discharge or pollution.*

Toxic wastes whether it is a liquid or solids, should be removed from the premises by an authorized /registered waste disposal group.

Your cooperation in this regard will be highly appreciated.

Regards

S R Notoane
