## SECTION 2: BACKGROUND, PURPOSE, AND SCOPE OF WORK

### 2.1 Background and/or Purpose of this Bid

As a world-class airport and a National Key Point, KSIA has many accolades and continues to accumulate accolades which illustrate the commitment to maintaining the high standards of a world-class airport facility. Airport cleanliness is a key contributor to the provision of world-class facilities as it has a direct impact on the experience we create for our passengers at our airports.

The airport serves as the front-end interface with passengers coming into the province/country, therefore it is important that we make a good first impression at all times to ensure that passengers continue to visit South Africa well into the future.

Running clean airports is of paramount importance to ACSA, therefore, it should come as no surprise that cleaning services are regarded as critical services to the operations of any airport. Cleaning staff are regarded as ambassadors of the airport as they are on the ground interacting with passengers while executing their services to ensure that the facilities are kept clean at all times. Airports Company South Africa has a benchmarking programme measuring passengers' satisfaction whilst they are travelling through an airport. Airport cleanliness is regarded a key driver of this benchmark, therefore, maintaining a high rating is of great importance to KSIA.

It is not a substitute for common sense or comprehensive cleaning manuals and skills development programmes from recognised suppliers of mechanised cleaning systems.

“Cleaning is the removal of unwanted dirt / matter”.

Abbreviations: M = Machinery

E = Equipment and Consumables

C = Chemicals

P = Preparation

A = Action

### DEFINITIONS

**Dressing:** Usually a dry bright or buffable polymer and synthetic wax emulsion, applied to resilient floors to protect and/or enhance their aesthetics and ease the cleaning process.

**Polish:** Usually a petroleum wax or synthetic wax high solid paste or liquid, best suited to porous or semi-porous floors e.g. wood, quarry tile, slasto, concrete, etc. (Must be buffed to shine).

**Sealer:** Either polyurethane or acrylic based. Used to make porous floors e.g. wood, concrete, stone, etc. essentially non-porous and washable.

**Stripper:** A detergent that will chemically unlock the binding molecules in dressings and polishes and allow them to be removed from the floor. (Strippers are effective on sealers).

### BURNISH

(Used on resilient and hard floors)

M -High speed rotary floor polisher (1 000 r.p.m. or more)

E -Ultra or high speed floor pad. Spray bottle.

C - Floor maintenance spray cleaning detergent.

P - Floor to be dust free and dry.

A - Spay a fine mist over 2 or 4 square metres of floor (coverage 1 000 sq. metre per litre). Pass machine briefly over the sprayed area to spread chemical, then systematically cover area. Two or three passes over same area should leave it clean and dry, with shine restored. Use this technique without spraying if the floor has been mopped with wash and wax type detergent.

### DAMP MOP

(Used on resilient and hard floors)

E - Single or double mobile bucket and wringer system. Mop handle and heavy duty mop head or flat/butterfly mop or variant.

P - Floor to be pre-swept.

C - Warm water solution with either neutral or wash and wax type detergent or disinfectant.

A - Dip mop into solution and wring dry. Cover floor with flowing sweeps exerting pressure to remove marks. Insert mop in solution and wring dry frequently.

### **DAMP WIPE**

(Used on non-porous or washable surfaces)

E - Bucket, lint free cloth.

C - Usually a neutral detergent, but disinfectant cleaner or purpose made detergents also acceptable.

P - Surfaces should be dusted.

A - Use warm water, cloth to be squeezed or wrung out until only damp, but not dripping. Use systematic wiping motion and additional pressure on stubborn soilage. Re-immers cloth in detergent solution frequently and squeeze dry.

Change the solution at appropriate intervals to ensure dirt is not reapplied.

### **DISINFECTANT**

(Used on non-porous or washable surfaces)

E - Bucket and mop (for floors) and lint free (for other surfaces) or spray bottle.

C - Chlorine, quaternary ammonium or other disinfectant.

P - Surfaces must be cleaned before disinfecting.

A - Apply disinfectant diluted to manufacturers specification applicable for the surface, using mop, cloth or spray bottle as appropriate. Apply liberally and allow 10 minutes reaction time, then vacuum, mop or wipe dry.

### **DUST**

(Used on any washable or non-washable, porous or non-porous surface that will not be damaged by dry wiping)

M - Vacuum cleaner and attachments.

E - Duster, brush or dusting tool.

P - Surfaces must be dry.

A - Use a vacuum to remove dust, or reverse airflow to blow dust from inaccessible areas to where it can be collected and removed. Use cloth, brush or dusting tool gently to remove loose dust, taking care not to re-distribute the dust into other areas.

NOTE: Damp wiping is often a better option.

### **DUST MOP**

(Used on any porous or non-porous hard floor)

E - Mop sweeper or disposable cloth sweeper.

P - Surface must be dry. Mop head must be clean or fitted with unused disposable cloth.

A - Push the tool in straight lines or work backwards using a figure 8 movement if the tool design allows. Maintain the same leading edge, as reversing the direction will cause dirt to fall off. Keep the tool flat on the floor throughout the exercise. Fit new disposable cloths or wash mop heads frequently.

## **INTERIM CLEANING**

(Used on hard floors)

More intensive than daily cleaning, but less costly and disruptive than restorative cleaning.

NOTE: These interim cleaning systems work well on cut pile carpets, but have limited benefits on looped or needle punch carpets.

A - Pad system: Cover lightly soiled areas or the entire area with impregnated Pad fitted to rotary.

## **POLISHING**

(Used on wooden, sealed wood or laminated furniture and fittings)

E - Soft dusting cloth.

C - Silicone or cream based, petroleum wax or synthetic, past liquid or aerosol.

A - Apply diluted stripper with a mop or watering can; allow to lie on the floor for ten minutes or more, scrub floor with machine, use doodle bug for awkward areas ("look after the edges, the middle will look after itself"), vacuum slurry

ensuring it does not dry out on the floor, rinse the fresh water and vacuum, mop with fresh water, ensure floor is dry and apply two or three coats of floor dressing (as per manufacturer's specification).

## **RESTORATIVE CLEANING**

(Used on carpets)

Usually a damp/wet process requiring time and labour.

M - Standard speed rotary floor machine with solution tank and carpet shampoo brush, or purpose built carpet shampooer and/or hot water extraction machine (loosely termed "steam cleaner").

C - Dry foam shampoo (6% moisture content in use), detergent for use in extraction machine, de-foamer for extraction machine.

P - Carpets to be vacuumed at outset and free of litter.

A - Shampoo a small area (about 4 sq. m) in one direction and then again at 90 degrees, ensuring that the carpet is not too wet. For carpets that are only lightly soiled, use the extraction machine as a dry vacuum (or a wet and dry vacuum with a carpet tool) to remove foam and dirt residue. For heavily soiled areas and traffic lanes, spray warm water on carpets with extractor and then suck up residue. The extractor machine may be used without first shampooing.

## **SPOT CLEAN**

(Any surface)

Remove any spillage or marks immediately that appear (preferably within a day or two of their appearance) using appropriate methods

## **SPRAY CLEAN**

(Hard and resilient floors)

Same technique as described under BURNISH, except that machines are at slower speed (between 165 and 400 r.p.m.) and the pad is red.

## **STAIN REMOVAL**

(Used on any surface)

"The difference between a spot and a stain is about 10 days". See notes under SPOT REMOVAL. For marks that do not respond to normal cleaning techniques, consult a specialist stain removal guide.

Empty machine hoppers regularly; if using a broom, leave manageable piles of litter for collection.

**VACUUM**

(Any surface, floors, upholstery etc.)

Use commercial or industrial equipment either, of the drum or upright type.
