- **SPECIFICATION FOR A CABLE FAULT PIN-POINTER AND TABLET**

The CABLE FAULT PIN-POINTER AND TABLET must be used, in conjunction with a surge generator, to pinpoint the location of an underground power cable fault. The system must use an electromagnetic field and acoustic sound combined technique, together with an intuitive user interface, to allow the user to quickly and precisely pinpoint the location of the fault.

The tablet must have two modes; the Operator mode must provide an intuitive indication of the position of the cable, with an arrow showing the position of the fault relative to the user's position. The Waveform Analysis mode must allow the user to diagnose the fault position from the magnetic field and audio waveforms.

The equipment must be complemented by a pair of noise-cancelling earphones to assist the user in hearing the sound of the discharge at the fault position in a noisy environment.

The surge generator, connected at one end of a faulty cable, generates periodic high voltage surges which cause flashovers at the fault point. This produces a transient electromagnetic field along the cable, together with an acoustic sound caused by the fault breakdown. The unit must detect both signals and measure the time delay between them to determine the proximity of the pin-pointer to the fault point. The electromagnetic field must be measured by two pick-up coils, arranged in an orthogonal manner, which also provide information about the position of the pin pointer with respect to the cable. This information, together with the time delay information, must allow the user to track the fault location quickly and precisely.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
