		Effective Date	01 April 2023		
		Review Date	April 2026		

To whom it may concern	Date	03 July 2026
	Enquiries	Addendum 1 – E1126SSERI
	E-mail address	Various Suppliers

Dear Sir/Madam

Request for Enquiry Number	E1126SSERI
Description / Project Title	Assessment Of Eskom Rotek Industries Soc Ltd.'S Fixed Assets Register (FAR)
Tender Questions Closing Date	10 working days before the deadline for tender submission refer to 2.16 of ITT (07 July 2026)

Item	Questions	Answers	Clarity Published Dates
1.	ERI Asset class I'm looking at through at the Excel spreadsheet in relation to the asset class Excel spreadsheet. Would that be the total number of assets to be inspected? And is there an expectation that we break down the components, the assets, to component level? is it the 82,000 components or are there more?	Yeah, thank you for that question, So that listing that you have is as of the end of May. So that is an up-to-date number and that's what you're going to be working off. From A componentization perspective	07 July 2026
2.	OHS Requirements My question is directed to the OHS.	ERI is looking for the baseline risk assessment from your side as a contractor to say how are you going to go about identifying the risk as on the perspective of the baseline risk assessment.	07 July 2026

	where the baseline risk assessment is concerned. I just wanted clarity on that one. Are we not supposed, as the service provider, to submit an issue-based risk assessment and then a baseline risk assessment is sitting with the client?	Thereafter, the client one is the one that we prepared on our site, but we don't know how do you perceive the risk at the site of the contractor. So, yes, we are deliberately looking for the baseline risk assessment of which it will incorporate your issue based. but we keep firm to say on your activities that you are thinking will be involved whilst carrying out this activity. You need to show us how are you going.	
3.	Location information for all Assets Apologies, Chair. Just another question on the data. Will we probably be provided with the location information for all these assets, rather the lat-long data, not just simply the location in terms of province?	Certainly the successful tender will be provided with all the required information.	07 July 2026
4.	Asset Management system or software Thank you. Thank you very much, Chair. Forgive me if I've omitted this part, but my question now is, does this assessment, will it require the service provider to use an asset management system or software whereby photographic evidence will be required? or is there a different approach or thinking behind it? Thank you	Like we indicated in the earlier slides, you know, the tools that one would require to do the assessment, you know, would be very critical in performing the exercise. So it could entail a number of things. And I'm not Going to be prescribing, but sorry, photographic, yeah, as part of the assessment, absolutely, but I'm not going to be prescriptive, and one would hope that an experienced assessor does this using, you know, the utilizing the Required tools to complete the exercise.	07 July 2026

5.	Please may you clarify the discrepancy between the scopes presented in the NEC3 short contract and Annexure V scope of work and confirm which version we should rely upon?	Please note the Annexure V : Scope of work is the Correct Document SOW document as per the enquiry, Misalignment was on Scope of Work Embedded on the NEC draft versus the signed Annexure V scope of work document and as such amendments were made to the NEC draft and aligned with Annexure V and reloaded on both National Treasury portal & Eskom Tender bulletin Website.	07 July 2026
6.	Please may you clarify the discrepancy between resourcing requirements in technical evaluation criteria vs pricing schedule (1 vs 2 Pr.Eng requirement)	As minimum, we are requiring the x3 skills on the team. Amendments have been made on the Pricing Schedule and both Technical & Pricing Schedule documents aligned and reloaded on both National Treasury portal & Eskom Tender bulletin Website	07 July 2026
7.	Please clarify breakdown of the weight of each qualification in relation to the total 20% weighting for resource capabilities (i.e. % attributable to CA(SA)s vs Pr.Eng etc.) Vivagan to advice	Split is equal across the types	07 July 2026
8.	Please clarify whether international equivalent qualifications/degrees will be accepted.	(1) Pr. Eng is internationally recognised as a designation for professional engineers in SA (2) Chartered Accountant (SA)	07 July 2026
9.	Please confirm the required assessment/valuation effective date (valuation date) for the FAR assessment.	Effective date would be from date of appointment	07 July 2026
