2. BACKGROUND

AgriSETA is committed to enhancing its internal audit function to ensure effective governance, risk management, and control processes. In line with the Global Internal Audit Standards, particularly Standard 10.3, there is a recognised need to procure specialised internal audit software. This software will support the internal audit process by improving efficiency, effectiveness, and compliance with international best practices.

Standard 10.3 states:

“The chief audit executive must strive to ensure that the internal audit function has technology to support the internal audit process. The chief audit executive must regularly evaluate the technology used by the internal audit function and pursue opportunities to improve effectiveness and efficiency.”

When implementing new technology, the chief audit executive must implement appropriate training for internal auditors in the effective use of technological resources. The chief audit executive must collaborate with the organisation’s information technology and information security functions to implement technological resources properly.”

The short-term mission of the Internal Audit Function to advance the vision of the Function includes the following key elements:

- Provide continuous assurance over processes instilled by AgriSETA to meet the 8 objectives of the SETA. This is part of a continuous and real-time audit of the predetermined objectives of the SETA.
- Move away from traditional audit processes towards more agile audits, encompassing the adoption of computer-assisted audit tools (CAATs) and data analytics.
- To be a high-performing IAF that meets the expectations of our stakeholders and adheres to GIAS and the attributes of high performance recognised by leading IAF.
- This will enable us to be a trusted assurance and advisory provider, recognised as a driving force behind a culture of governance, accountability, compliance, and execution that helps in the achievement of AgriSETA’s objectives.

The above is further supported by the support initiatives highlighted in the Strategy, which include: (1) The utilisation of a computerised audit tool that will assist in conducting audit follow-ups on corrective action plans on Auditor General findings; and (2) Explore using computerised audit tools to analyse large volumes of data, identify issues, and communicate with clients.
