10.7 High risk insurance

In the event of the project being executed in a geological area classified as a "High Risk Area", that is an area which is subject to highly unstable subsurface conditions that might result in catastrophic ground movement evident by sinkhole or doline formation the following will apply:

10.7.1 Damage to the works

The **contractor** shall, from the **commencement date** of the **works** until the date of the **certificate of practical completion** bear the full risk of and hereby indemnifies and holds harmless the **employer** against any damage to and/or destruction of the **works** consequent upon a catastrophic ground movement as mentioned above. The **contractor** shall take such precautions and security measures and other steps for the protection of the **works** as he may deem necessary.

When so instructed to do so by the **principal agent**, the **contractor** shall proceed immediately to remove and/or dispose of any debris arising from damage to or destruction of the **works** and to rebuild, restore, replace and/or repair the **works**, at the **contractor's** own costs.

10.7.2 Injury to persons or loss of or damage to property

The **contractor** shall be liable for and hereby indemnifies and holds harmless the **employer** against any liability, loss, claim or proceeding arising at any time during the period of the contract whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever resulting from, arising out of or caused by a catastrophic ground movement as mentioned above.

	<u>SECTION No. 2 BILL No. 1 ALTERATIONS (PROVISIONAL)</u> For Preambles refer to "Department of Public Works: Specification Of Materials And Methods To Be Used - PW371". <u>ALTERATIONS</u> Tenderers are advised to visit the site prior to tendering and satisfy themselves as to the nature and extent of the work to be done, also to examine the condition of all existing buildings as no claim will be entertained on the grounds of ignorance of the conditions under which the work was to be executed. Old materials from alterations except where described to be re-used or handed over, become the property of the Contractor who must allow credit for same. Old materials from alterations except where described to be re-used or handed over, as well as rubbish, etc. must be regularly carted from the site and not be allowed to accumulate on or around the site and pricing thereof must be included in the Contractor's rates as no extras in this regard will be entertained. Items described as "removed" shall mean removed from the site. None of the old materials are to be used for new work except where specifically described as being set aside for re-use. Where certain materials or articles from alterations are described as to be handed over by the Contractor to the Principal Agent, such material or articles shall be properly stored by the Contractor until handing over thereof. The Contractor shall obtain an official receipt listing the materials or articles and dates of handing over. If the Contractor fails to submit the receipt when requested to do so it shall be deemed that the materials or articles are still in his possession and

he will be held liable to the Client for the full replacement value thereof which amount will be deducted from any monies due to the Contractor.

The Contractor is to take dimensions affecting the existing buildings on the site as he will be solely responsible for all new work being to the correct sizes.

The Principal Agent is to be notified immediately of any discrepancies between the drawings and the existing work and all work affected by these discrepancies is to be suspended until such time as the Principal Agent shall authorise its continuance.

Before commencing the alterations the Contractor shall comply with any regulations in force in respect of rodent extermination and he shall obtain the requisite Rodent Extermination Clearance Certificate and pay any fees in connection therewith.

Tenderers are advised that the adjoining buildings will be in occupation during the time that the works are in progress and due allowance must be made for the work being carried out at such times and in such a manner as will least interfere with the general routine of the occupants.

All floors, doors, windows, fittings, electrical and mechanical plant, etc., must be adequately protected from damage during the progress of the works and any damage resulting from the building work must be made good by the Contractor at his own expense.

The Contractor will be held solely responsible for any injury to persons, damage to property and for the safety of the structure throughout the duration of the Contract and must make good at his own expense any damage that may occur.

Any existing works damaged or disturbed through alterations, etc. shall be made good with all necessary new materials to match existing and left complete and perfect in every respect to the satisfaction of the Principal Agent.

All shoring, needling, or strutting required to ensure the stability of the premises, must be supplied, erected and maintained during the progress of the Works and removed on completion, or when directed. The shores, needles or struts must be constructed from suitable and substantial timber and any other suitable materials necessary and must be to the satisfaction of the Principal Agent.

Wherever and whenever necessary, or at the direction of the Principal Agent, the works must be well watered with a jet or spray from a hose sufficient to prevent any nuisance from dust.

The Contractor must not remove or interfere with any furniture, furnishings, fittings, or similar moveable articles belonging to the Client and must give adequate notice to the Principal Agent if the removal of any such articles from parts of the building to be altered are necessary, so that they may have same removed before the Contractor commences work.

The Contractor must conform to the instructions of the Principal Agent in carrying out any portion of the work, which in his opinion requires expediting, and the Contractor must give priority to such work as and when directed.

Prices

Prices are to include for carting away from site all materials not specifically mentioned as being stored on site for re-use or handed over to the Principal Agent and all rubbish, debris, etc., arising from the demolitions, alterations, etc., and for making good all work damaged or disturbed to the approval of the Principal Agent.

Prices are in addition to the above to include for the temporary removal and on completion setting back

FLOOR COATINGS

Special floor coatings are to be applied by approved specialists in strict accordance with the manufacturer's instructions to provide a hard high quality finish, free of all blemishes, of selected colours and all to the approval of the Principal Agent.

Floor coatings are only to be applied to screeded surfaces when the moisture content of the screed does not exceed five (5) percent as determined by a SABS approved moisture meter. Prior to the application of the special floor coatings the Contractor must obtain from the specialist applicators written approval of the screed surfaces and this approval must be deposited with the Principal Agent.

Prices are to include for all necessary preparation, stopping, filling and priming of surfaces in order to achieve a high quality finish with materials recommended by the manufacturers of the finishes as being suitable for use with their products. Prices are to include for all cutting in and masking required.

The Contractor will be required to provide sample panels of the various types of finishes for the approval of the Principal Agent and all finished work must be equal to the approved samples.

Prime surfaces and apply two coats non-slip self-levelling epoxy floor finish with anti-microbial additive having a finished thickness of 0,5mm minimum 25N/mm², free from laitance, dust and other contamination on:
