T2.2 Returnable schedules

Important information for completing returnable schedules

1. T2.1 shows all the returnable schedules which need to be completed and returned for tender evaluation and contracting purposes. This list includes both document-standard and project-specific schedules. List T2.1 should be used as a checklist by the tenderer to verify that all returnable schedules have been duly completed, to avoid the tender being rejected as non-responsive due to an incomplete submission.
2. Each returnable schedule is numbered, starting at Schedule 1 and following a consecutively incremented whole number sequence through the tender document to the final schedule number assigned, as per the returnable schedules list.
3. Although all returnable schedules are numbered and follow in numeric sequence, they are not all grouped together in a single location in this tender document. Returnable schedules are divided into 2 groups:
 - i. Tender Schedules
 - ii. Contract Schedules

The first group of schedules (Tender Schedules) follows directly from here on forward in Part T2.2, with the remainder (Contract Schedules) following in various sub-sections of Part C of this tender document. Contract Schedules become part of the contract document after tender award. Schedules can be quickly located by their document page number given in the list of returnable schedules T2.1.

4. The tenderer must furnish all the information required for each returnable schedule with the indicated amount of detail to ensure compliancy of the tender with responsiveness criteria. Please note: If any returnable schedule or part thereof is not applicable to the tenderer, that schedule or part thereof must be clearly marked "Not Applicable" (N/A), and not simply left blank. Schedules left blank without any indication of response by the tenderer to the requested information in the schedule, will be taken as an omission of the requested information.
5. Some schedules may either require, or have as an option, additional pages of information to be appended by the tenderer when submitting the tender. In each case the exact number of additional pages must be indicated in the space provided on that schedule, or indicated as NIL if no additional pages are appended. All appended pages must be clearly marked with the schedule number to which they belong.
6. All returnable schedules require the signature of the tenderer's authorised signatory where indicated and the date. Unsigned schedules, unless they are clearly marked "Not Applicable" by the tenderer, will render your tender invalid.

4.1. In terms of Regulation 4(2); 5(2); 6(2) and 7(2) of the Preferential Procurement Regulations, preference points must be awarded for specific goals stated in the tender. For the purposes of this tender the tenderer will be allocated points based on the goals stated in table 1 below as may be supported by proof/ documentation stated in the conditions of this tender:

4.2. In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 or 90/10 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of:

- (a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used

to determine the applicable preference point system; or
(b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system,

Table 1: Specific goals for the tender and points claimed are indicated per the table below.

Part C2: PRICING DATA

INDEPENDENT DEVELOPMENT TRUST

DEMOLITION OF EXISTING UNITS AND CONSTRUCTION OF NEW PREFABRICATED HOUSING UNITS AT THE HAWQUA AND OBIQUA CORRECTIONAL CENTRES AT ALLANDALE MANAGEMENT AREA

C2.1 Pricing Instructions

C2.1.1 Pricing Instruction to the contractor

1. The Agreement is based on the Option A Price Contract with Activity Schedule. It includes core and secondary option clauses, the schedules of cost components, and contract data
2. It will be assumed that prices included in the Activity Schedule are based on Acts, Ordinances, Regulations, By-laws, International Standards and National Standards that were published 28 days before the closing date for tenders. (Refer to www.stanza.org.za or www.iso.org for information on standards).
3. The prices and rates in these Activity Schedule shall be fully inclusive prices for the work described under the items. Such prices and rates shall cover all costs and expenses that may be required in and for the execution of the work described in accordance with the provisions of the Works Information, and shall cover the cost of all general risks, liabilities, and obligations set forth or implied in the Contract Data, as well as overhead charges and profit.
4. Bidders are to take note that the contract price adjustments are not applicable to this contract. Bidders should therefore make provision in the Contract Sum, schedule of rates, etc. for possible price increases during the contract period, as no claims in this regard shall be considered/entertained.
5. An item against which no price is entered will be considered to be covered by the other prices or rates in the Activity Schedule. A single lump sum will apply should a number of items be grouped together for pricing purposes.
6. Tenderers are reminded that some of the works are to be undertaken under restrictive site conditions, over protected environments.
7. Tenderers are reminded and hereby given the opportunity to allow for and price all costs related to the abnormal working conditions referred to herein as no claims for additional costs will be entertained for any omission on the part of tenderers.
8. Tenderers are given the option to include the above mentioned additional costs in their tender amount as a lump sum amount in item under a section in the **Activity Schedule**. Alternatively, Tenderers tendered rates or amounts shall be deemed to include for all such costs.
9. The tenderer is to acquaint himself as to the specific requirements of this tender. **No claim will be entertained due to the failure of the tenderer to allow for these requirements.**

C2.1.2 Function of the Activity Schedule

Clause 54.1 in Option A states: "Information in the Activity Schedule is not Works Information or Site Information". This confirms that specifications and descriptions of the work or any constraints on how it is to be done are not included in the Activity Schedule but in the Works Information. This is further confirmed by Clause 20.1 which states, "The *Contractor* Provides the Works in accordance with the Works Information". Hence the *Contractor* does **not** Provide the Works in accordance with the Activity Schedule. The Activity Schedule is only a pricing document.

C2.1.3 Link to the programme

Clause 31.4 states that "The *Contractor* provides information which shows how each activity on the Activity Schedule relates to the operations on each programme which he submits for acceptance". Ideally the tendering contractor will develop a high level programme first then resource each activity and thus arrive at the lump sum price for that activity both of which can be entered into the *activity schedule*.

C2.1.4. Preparing the activity schedule

Generally, it is the tendering contractor who prepares the *activity schedule* by breaking down the work described within the Works Information into suitable activities which can be well defined, shown on a programme and priced as a lump sum.

C2.1.5. Assumptions

It is assumed that in preparing his *activity schedule* the *Contractor*:

- Has taken account of the guidance given in the ECC3 Guidance Notes pages 19 and 20;
- Understands the function of the Activity Schedule and how work is priced and paid for;
- Is aware of the need to link the Activity Schedule to activities shown on his programme;
- Has listed and priced activities in the *activity schedule* which are inclusive of everything necessary and incidental to Providing the Works in accordance with the Works Information, as it was at the time of tender, as well as correct any Defects not caused by an *Employer's* risk;
- Has priced work he decides not to show as a separate activity within the Prices of other listed activities in order to fulfil the obligation to complete the *works* for the tendered total of the Prices.
- Understands there is no adjustment to the lump sum Activity Schedule price if the amount, or quantity, of work within that activity later turns out to be different to that which the *Contractor* estimated at time of tender. The only basis for a change to the Prices is as a result of a compensation event.

Important Notes to the Contractor:

Activity Schedule relates to a programme where each activity is allocated a price and interim payments are made against completion of each activity. Its advantage is that it simplifies the administration of the interim payment process.

The **Activity Schedule** is submitted together with a contract programme as part of the tender. It is important that all the activities priced add up to the tender sum and that major sub-contractors participate in the allocation of prices against their programmed activities.

The **Activity Schedule** shall covers all the main activities required, separating each element of work that is sub-contracted. Some preliminaries, such as site offices, need a separate price bar for set up, operational use and dismantling activities. Other preliminaries such as staff and electrical consumption will be part of a constant bar.

Bars that are longer than a month then have their bar line split by defining more accurately the piece of work completed in that period. A time-defined period is acceptable in the case of preliminaries. The price allocated to each total element of work is then proportionately split to match the more defined elements.

The bidder must ensure that the pricing of the **Activity Schedule** is not unduly front-loaded and fairly reflects normal cash-flow curves associated with building projects.

The programme must show how the activities on the **Activity Schedule** are programmed. The programme and the **activity schedule** need not show exactly the same activities, but there should be correlation between them.
