PASSENGER RAIL AGENCY  
OF SOUTH AFRICA

### SCM SUBMISSION: SPECIFICATION / SCOPE OF WORK

PURPOSE OF SUBMISSION	To seek approval to appoint a service provider to provide waste management services at various stations in Gauteng South Region.
DESCRIPTION OF GOODS / SERVICES / WORK	Provision of waste management services in Gauteng South Region for a period of 12 months.
REQUEST FOR PROPOSAL NUMBER	RFQ06-01/11/2024
DIVISION	PRASA CRES: Gauteng South Region
USER DEPARTMENT	Facilities Department
DATE SUBMITTED	09 October 2024
REVIEW DATES	09 October 2024

## 1. PURPOSE

The purpose is to procure 3 x service providers to provide quality waste removal services for the PRASA to comply with environmental and health legislation and public expectations. Waste management is governed by the Waste Management Act 59 of 2009 which has its main objectives as waste minimization and waste data collection.

The purpose of this scope is to align waste removal activities of PRASA Cres to those of National, Provincial and Local government and adhere to by-laws. As a utility of Government parastatal, PRASA can only lead by example and provide leadership in waste removal for commuters, business units in the buildings managed by the company and to potential investors.

The provision of a seamless waste management service by PRASA will profile the company as a quality orientated company that is committed to a clean and healthy environment. As a company that derives its income on attracting and recruiting commuters and tenants, cleanliness of our facilities is paramount from an aesthetic and presentation point of view.

## 2. OBJECTIVES

- Improve environmental cleanliness of the facilities and promote a healthy and safe environment.
- Profile the company as an environmental conscious company committed to the quality health and cleanliness.
- Improve aesthetics of facilities.
- Create an environment that will deter pests and rodents.
- Establish volumes and statistics of waste streams generated by the users of services.

## 3. THE PRIMARY OBJECTIVE OF THIS CONTRACT IS TO:

- Procure services of 3 x contractors who will be fully responsible for a provision **of skip waste bins and waste removal.**
- To contract for cost effective and effective and professional high-quality services

## 4. ACTIVITIES

The provision of a waste collection service will be informed by the waste generation of the facilities

involved. Approximately 70% of waste generated by the stations and depots operations is general waste with the rest being garden waste.

To support the use of these long-term assets, stations will require dedicated waste pickers or general workers that will ensure there is not windblown litter or scattered waste within the jurisdiction of the company sites.

5. **Scope of work**

- Skip rental and removal of waste and rubble for the below clusters
