**TERMS OF REFERENCE (TOR): NETWORK POINTS INSTALLATION & REPAIRS**

## Purpose

The purpose of this RFQ is to ensure reliable, secure, and fully functional network connectivity across the designated offices by installing one new network point and repairing or replacing three existing critical network points. This work is essential to maintain operational efficiency and support uninterrupted network access for users and devices.

## Scope of Work

- Install a new network point.

- Provide cabling from the patch panel to the designated workstation area.

- Terminate, label, and test the network point to confirm full functionality.

- Repair or re-terminate 3 network cables.

## General Requirements

Perform testing using approved network testing tools

Ensure compliance with organisational cabling standards

## Enquiries

For further information, please contact the following QCTO staff members:

a) Mr M Shebambo: 012 003 1856, Shebambo.m@qcto.org.za

b) Mr V Chauke: 012 003 1829 chauke.v@qcto.org.za

## Site inspections

**NB:** It is important to note that site inspection and evaluation of the existing infrastructure is compulsory before sending through your quotation.
