## 1. Background

Sekhukhune District Municipality (SDM) was established in December 2000 and is situated within the south of Limpopo Province, about 300 Kilometers north of Johannesburg. It is bordered by Gauteng Province to the south, Mpumalanga Province to the east as well as Waterberg towards the west. Sekhukhune is relatively accessible with the use of its relatively extensive road network system. It is characterized by a scattered pattern of human settlement and contains a large number of rural villages 764<sup>1</sup> which lack both economic infrastructure and opportunities and services of a reasonable standard. Overall, it covers approximately 13 264 kilometers with only 5% of the district's population estimated to live in urban areas.

SDM consists of four local municipalities namely: Fetakgomo Tubatse, Elias Motsoaledi, Makhuduthamaga and Ephraim Mogale. There are 121 wards in the district. The total population of the district is estimated at 1 169 762<sup>2</sup>. Groblersdal, Marble Hall, Burgersfort, Jane Furse, Ohrigstad, Steelpoort and Driekop constitute the main urban centres. It should be noted that Sekhukhune is a predominantly rural district.

Sekhukhune District cuts across the north-eastern part of the Bushveld Complex, an immense geological structure that contains the largest reserves of platinum group metals (PGM) in the world. The district has 22 operating mines and a number of prospecting projects/mines. The major mining activity in the district occurs within the Dilokong Corridor, which stretches largely across Tubatse and Fetakgomo. Mining contribution to Sekhukhune Gross Geographic Product is estimated at between 15-20%<sup>3</sup>.

Besides mining, the district is endowed with good soils and climatic conditions for farming. The town of Groblersdal in Elias Motsoaledi Local Municipality, and Marble Hall in the Ephraim Mogale Local Municipality, are found in what is referred to as the Loskop Valley. The large commercial agricultural schemes in the valley are serviced by the Loskop Dam, built in 1938 especially for this purpose. The area has large commercial agricultural estates which should participate in empowering SMME's and Cooperatives. The district also has retail and industry sector and tourism potential.

The 2019 SDM LED Strategy identified Agriculture and Agro-Processing as strategic intervention number 3. The objective of this strategic intervention is to add value to agricultural activities through establishing Agri-Park linkages, local manufacturing, and processing plants which utilise local raw materials and resources as primary inputs. Amongst the projects identified in the 2019 LED Strategy under this strategic intervention

is Establishment of Poultry Abattoir Facility.

## **Problem Statement**

Limpopo Department of Agriculture and Rural Development has assisted 5 farmers with the establishment of 7 environmentally and semi- environmentally controlled houses for 5 farmers over the period from 2008 to 2017 with a capacity to produce 300 000 broilers. Over and above the 7 broiler houses mentioned above there is 34 farmers/cooperatives in the district with broiler houses with an average production capacity of 3000 per farm. These farmers sell live chickens to hawkers and households. The challenge is that if the chickens are sold at above 40 days they eat into their profit by consuming additional feeds.

The 7 environmentally and semi- environmentally controlled houses have sporadically been under production through contract growing with several poultry Abattoirs around Mpumalanga and Gauteng Provinces. The sporadic production of the broiler houses led to challenges in terms of maintenance of the infrastructure due to inconsistent income generation. It is therefore imperative for the district to conduct a feasibility study on the establishment of a Poultry Abattoir facility to rescue this dire situation.

## **2. Purpose**

This project seeks to establish a feasibility to develop a poultry abattoirs facility located in Groblersdal Agri Hub site that will stimulate and support other developments, and lead to the development of infrastructure, job creation, and possibly an increase in the value of the land. The establishment of the abattoir is relevant to the Agri-Parks programme. The chicken will go through various processes in order to be transformed into a value-added product such as fillets, mince or frozen pieces. The main processes involved consist of slaughtering, scaling, defeathering, grading, weighing and packing etc. If feasible the facility will yield the following benefits:

- Food security and its contribution to the national GVA
- Stimulate the development of supporting enterprises such as feed production, processing, packaging and logistics

## **3. Objectives**

The objectives of conducting the feasibility study on the establishment of Poultry Abattoir Facility is to establish if there are enough chickens to put the abattoir facility on a profitable basis in the district. That Groblersdal Agri Hub Site is a suitable place to establish the facility or that there is an alternative place where an abattoir could be established that is not much farther than 100 kilometres drive from most of the potential users.

The feasibility study will examine and evaluate the expected economic viability (costs and benefits) of creating Poultry Abattoir Facility in the district. It will analyse and quantify the potential magnitude of the economic and socio-economic benefits associated with the establishment of a Poultry Abattoir Facility.

#### **4. Scope of Work**

In meeting the objectives, the consultancy should take a few factors into account. These include but are not limited to:

- Assess market demand for poultry meat from the district and neighbouring regions, as well as the expected trade benefits of establishing such a facility.
- Consider the options and requirements (including investments) to mainstream smallholder farmers into the poultry value chain so that they can benefit from market access. This should include attention to possible options to connect large commercial farmers to small holders through a more integrated poultry value chain approach.
- Consider environmental aspects and impacts related to the establishment of a poultry abattoir facility from an environmental conservation point of view (e.g., Environmental pollution etc.)
- Identify and pay attention to relevant political, economic and other factors/risks (e.g., current business environment, limited organization of smallholders, international embargo and access to international markets), which are likely to influence the establishment of such a poultry abattoir facility in the district and consider possible mitigation strategies.
- Clearly identify the inputs (human resources, logistics, infrastructure, etc.) related to upfront and ongoing costs to establish and effectively maintain a poultry abattoir facility
- Attach a list of all the persons consulted/interviewed, as well as a bibliography of documents consulted
- Discuss the draft feasibility study with relevant public and private sector stakeholders in the district. Based on comments and suggestions received, revise the feasibility study as necessary.
- The possibility of as a pork abattoir - from receiving live hogs to delivering refrigerated or frozen meat at the store section of the building.
- Assess available competition on the proposed site and alternative site if applicable.
- Determine other sources of business to augment the income of the Abattoir.
- Evaluation of present and the future potential of establishing the facility
- Conduct a survey of poultry farmers to establish the current production capacity
- Provide future growth direction.

### **CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

**<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.**

**<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.**
