1. PURPOSE

The Department of Public Works and Infrastructure (DPWI) requires the appointment of an experienced service provider with multi-disciplinary structural and steel engineering capability to design, fabricate/manufacture and deliver modular steel bridges components. This should be supported by providing on-site technical support during construction; as built drawings and signing-off completed bridge structures on completion in Eastern Cape and Free State Provinces. This tender is for a term contract over 36 months period, on an as and when required basis.

2. BACKGROUND

The Department of Public Works and Infrastructure (DPWI) and the Department of Defence (DoD) signed the Memorandum of Agreement (MoA) to collaborate in the construction of Modular Steel bridges in order to improve on accessibility of rural communities. The MoA signed is valid for a period of 5 years and renewable. Subsequently, there are six respective Provincial Departments with the mandate for construction of roads and bridges entered into the MoA with DPWI.

According to the Memoranda of Agreement signed, the DPWI is to ensure that labour-intensive methods are used during construction enabling the employment of participants from the local communities under EPWP and also the procurement of construction materials including the hiring of tools and equipment and provision of materials testing laboratory services.

The South African Army Engineer Formation (SAAEF) is to provide skilled manpower and expertise during construction of the bridges, including bridge footings and embankment designs and construction supervision. Provincial Departments are the Client and provides funding for implementation of the Modular Steel bridges.

In the course of this collaboration, about 95 bridges per year are planned for implementation across the six identified Provinces over the MTEF 2023/24 to 2025/26. The six provinces identified are the Eastern Cape, Kwa-Zulu Natal, Limpopo, Mpumalanga, North West and Free State. These provinces are clustered to form three tenders into kwaZulu Natal and Mpumalanga; Eastern Cape and Free State; and Limpopo and North West.

3. PROBLEM STATEMENT

The historical past of South Africa led to the lack of integrated infrastructure planning especially in the rural areas. Social amenities were constructed without proper consideration of bulk services and road connections. This resulted in social amenities e.g. schools, clinics, police stations, hospitals, courts being far off from communities and villages they seek to services.

The situation has been worsened by the global warming which causes severe climate conditions such as cyclones, storms and floods which have become more frequent, their intensity is becoming more and more severe.

Amidst the effects of global climate change, the situation is not expected to improve as more erratic weather patterns are set to emerge. Recent floods and associated fatalities sadly confirmed that the infrastructural shortfalls extend critically into the availability of bridges providing safe road access for rural communities to basic services such as schools, clinics, police station and other social service providers (e.g. SASSA) and lack of access to economic opportunities which consequently leads to increased poverty levels.

4. SCOPE OF WORK

The tender is for Provision of Modular Steel Bridges and related components necessary for construction of Modular Steel bridge structures. These structures are required for both vehicular and pedestrian bridges. The tender involves the following:-

- a) The design of modular steel bridges to carry traffic loading in accordance with TMH7 Code of Practice for the Design of Highway Bridges and Culverts in South Africa.
- b) The fabrication of Modular Steel bridge components and delivery thereof to bridges construction sites within Eastern Cape and Free State Cluster of Provinces;

- c) Produce bridge installation manual and provide technical support to the construction teams during construction;
- d) Conduct site inspections and provide technical support including training on the assembling of modular bridge structures during construction.
- e) Sign-off completed bridges for public use and issuing of completion certificates for handing-over of completed bridges to Client departments.
- f) Delivery of modular steel bridge components from manufacturing workshop to site. The shortest road distance from manufacturing facility within Eastern Cape and Free State Cluster of Provinces to bridge sites will be used for payment of deliveries. Should the bidder not have the manufacturing facility within the cluster of provinces, the shortest road distance from the South African border of the respective Province to each bridge site will be used for payment of deliveries.

5. SPECIFICATIONS FOR THE APPOINTMENT OF THE SERVICE PROVIDER WITH MULTI-DISCIPLINARY ENGINEERING CAPABILITY TO DESIGN, FABRICATE/MANUFACTURE AND DELIVER MODULAR STEEL BRIDGES AND ASSOCIATED COMPONENTS, PROVIDE ON-SITE TECHNICAL SUPPORT DURING CONSTRUCTION, AS BUILT DRAWINGS AND SIGNING-OFF OF COMPLETED BRIDGES ON COMPLETION INCLUDING THE ISSUING OF CERTIFICATION FOR PUBLIC USE IN PROVINCES.

- a) Bridge components will be ordered per bridge per site through the issuing of an official instruction by the Project Manager on an as and when required basis. The sizes, configuration and specific specification will be communicated with each instruction.
- b) The right is reserved to order quantities indicated as and when required per bill quantities. Service provider must indicate the cost of each item and total cost as required in the bill of quantities.

- c) Bridges to be erected are located in rural areas across Eastern Cape and Free State Provinces of South Africa. Bridge components should be delivered to the construction site address to be indicated by the Project Manager. The cost for delivery of bridges shall be measured on the shortest road distance from the manufacturing workshop to site.
- d) All components of the modular steel bridges shall be hot dip galvanized. The DPWI reserves the right to request for inspection and/or testing of components before or after delivery of components to bridge sites.
- e) All components must be fully integrated into the Modular Steel Bridge System to allow configuration upgrades or downgrades while the system is in-situ; and must be in accordance with the design and specification to be issued by the Structural Engineer appointed by prospective tenderer as part of this tender.
- f) Tenderers must submit the manufacturing schedule indicating the lead-time to manufacture individual modular bridge structures as per the sizes indicated in the bill of quantities. Refer to Section 3 and Section 4 of the Bill of Materials for list of required Modular Steel bridges sizes.
