Tender # IEC/ICT-09/2025

APPLICATION SYSTEMS TESTING AND ASSURANCE SERVICES

1 Introduction

The Electoral Commission seeks to appoint a panel of most five (maximum 5) service providers to provide independent application systems testing and assurance service that will provide a comprehensive evaluation of its IT application systems, software, and processes to ensure they meet functional requirements, quality standards, performance requirements, application security requirements, and regulatory compliance.

The scope of services includes, but is not limited to, code review, functional, integration, regression, end-to-end, security, and performance testing (including stress and load), as well as advising on user acceptance testing (UAT). This applies to applications and systems developed and running on platforms such as Microsoft Windows, Linux, SharePoint, Power Platform, Azure, Google Maps, Geographic Information System (GIS), and custom .NET applications.

Given that the Electoral Commission's ICT environment is primarily built on Microsoft technologies to support critical business processes, the appointed service providers will provide comprehensive quality assurance. These resources must be proficient in executing testing services to ensure system stability, compliance, and performance.

Bidders must print the tender documentation from the IEC's website (eProcurement system) and then complete and submit all the required documentation before the due dates as specified in this document. The tender requires the manual completion of the documentation and submission thereof.

2 Background Information

The Electoral Commission has made significant investments in ICT to enable the efficient delivery of a free, fair, and secure electoral process. This initiative forms part of the Commission's commitment to maintaining a high-performing ICT landscape that adheres to industry standards, best practices, and technology governance frameworks.

The Electoral Commission regularly develops and deploys applications and systems built primarily on Microsoft and other technologies. Quality assurance through testing is a crucial phase in ensuring the reliability, security, and functionality of these systems. The Electoral Commission seeks to appoint bidders that can deliver experienced skilled testers (manual and automation).

3 Technical Specifications

The technical specifications for the required service provider are detailed below. It must be noted that these specifications represent the minimum requirements; submissions will only be accepted where they meet or exceed the specified criteria for the provision of testing services.

The Electoral Commission is seeking the services of service providers to deliver structured testing services that will provide comprehensive assurance of the functionality, quality, reliability, and compliance of its systems and applications. The successful bidders will be responsible for testing all selected applications that are built on Microsoft platforms and other platforms. The tests will provide an assurance that the applications function correctly, securely, and in accordance with business requirements and technical specifications. These services are critical to minimizing the risk of system failures, ensuring business continuity, and maintaining the integrity of critical electoral systems.

The bidders will support the Electoral Commission's commitment to quality assurance and adherence to internal quality frameworks and standards, thereby maximising operational reliability while mitigating risks associated with application deployment and use. The following listed requirements provide an overall view of what's needed, but the actual work will be defined per project and based on each application.
