## **SECTION 1: BIDDING INFORMATION**

## **TERMS OF REFERENCE: MEGA / 2026 / 04**

**Bid for the appointment of a service provider to supply and install smart water and electricity meters at Ekandustria Industrial Park to ensure accurate measurement and billing of utility services consumption**

### **1. INTRODUCTION**

The Mpumalanga Economic Growth Agency, hereinafter referred to as “**MEGA**” is a schedule 3D entity of the Mpumalanga Provincial Government with a mandate of stimulating economic growth in the Province through inter alia:-

- (i) the provision of funding to SMMEs, Co-operatives and Agricultural enterprises, as well as the provision of housing loans to citizens of Mpumalanga within the gap market;
- (ii) proactively identifying investment opportunities within the Province, attracting investment into such opportunities through various trade and investment promotion initiatives, as well as facilitating that such investments into the province derive maximum development impact;
- (iii) delivering massive infrastructure within the Province;
- (iv) the development and management of property in the form of industrial parks which stimulate economic activity in the Province.

In exercising its powers and functions as articulated in the Act, [“the MEGA Act 1 of 2010”], the entity must continually broaden the participation of Mpumalanga citizens in all the sectors of the economy and accordingly contribute, whether directly or indirectly, to the alleviation of poverty, unemployment and inequality.

### **2. PURPOSE**

The Mpumalanga Economic Growth Agency intends to appoint a credible and experienced service provider for the provision of smart-meters and/or pre-paid meters within the context of a turn-key solution to ensure effective management of the measurement and billing for utility services consumption at Ekandustria Industrial Park.

### **3. BACKGROUND**

MEGA's property portfolio spans all three regions in Mpumalanga, namely Ehlanzeni, Gert Sibande and Nkangala. The Ekandustria Industrial Park represents the biggest concentration of MEGA's rental units under the portfolio. The industrial park is physically distressed due to decades of wear-and tear and minimal maintenance. To this end, MEGA has been unable to market the property portfolio as a prime location, thus offering the rental units at well below-market rates. This has had a severe negative impact on MEGA's rental revenue streams.

To remedy the situation, MEGA embarked on a multi-faceted property turnaround journey since 2022. This process culminated in the appointment of a facilities management company (responsible for Ekandustria Industrial Park) in April 2024. The property and facilities management company identified a need for MEGA to urgently replace all existing utilities meters with smart meters. The current meters are old, not always calibrated correctly, and are therefore prone to registering wrong readings which lead to incorrect billing information and dissatisfied clients.

### **4. SCOPE OF WORK**

The motivation behind installing prepaid water and electrical smart meters at Ekandastra Industrial Park stems from the need to foster a more efficient, sustainable, and financially responsible environment. These meters must also empower tenants by giving them direct control over their utility usage, encouraging more mindful consumption and reducing waste.

The system should also incorporate a prepaid element for smaller tenants that will ensure that costs are covered upfront, mitigating the risk of unpaid bills by smaller SMME tenants, and fostering financial stability for both the tenants and the park management. The installation of prepaid water and electrical smart meters at Ekandustria Industrial Park will have to serve multiple purposes aimed at enhancing resource management and efficiency. These smart meters should enable precise monitoring and control of utility consumption, allowing MEGA and stakeholders to manage their usage more effectively and avoid unexpected costs. By adopting a prepaid system, the industrial park can reduce the risk of unpaid bills and ensure that all tenants are accountable for their consumption.

Detailed consumption data provided by the smart meters must enable the identification of inefficiencies and promote informed decision-making for resource optimization.

The real time data provided by the meters should facilitate better planning and optimisation of resources, contributing to financial sustainability and operational cost savings, overall efficiency and transparency in the billing system.

*Table 1 below serves to indicate details pertaining meters required, specification, quantity and a guide on other services that may be required in their installation and as such have to be costed in the Bid.*
