## 1. BACKGROUND

Gauteng is a highly industrialised province with two (2) declared priority areas (Highveld and Vaal Triangle Airshed) and therefore the province is continuously required to report ambient air quality data to South African Air Quality Information System (SAAQIS) as required in terms of National Environmental Management: Air Quality Act (Act 39 of 2004). The reporting of ambient air quality data to SAAQIS also plays a significant role in the development of policies, guidelines and regulations related to air quality management. Furthermore, the national air quality framework as part of the National Environmental Management: Air Quality Act (Act 39 of 2004) outlines the need for ambient air quality monitoring stations to be managed and well maintained continuously to provide stable ambient air quality data.

However, in addition to work being done by various municipalities in Gauteng Province to ensure ambient air quality monitoring stations operational state, the Department of Agriculture and Rural Development (GDARD) identify monitoring stations on which the province would provide support on the monitoring stations maintenance on behalf of various municipalities so that the province would have stable and continuous ambient air quality data from the well-distributed, operational and reliable ambient air quality monitoring stations.

The support on the procurement, repair and maintenance of the monitoring stations will be for three (3) years. Upon expiry of the contract, the monitoring infrastructure will be handed over to various network owners to continue with the maintenance and management. Below is a List of air quality monitoring stations identified as part of the project.

## **2. PROBLEM ANALYSIS**

The commissioning of ambient air quality monitoring stations has been an immense investment by all spheres of government. Together with the capital investment required to procure the instruments, there is budget required for the operation and maintenance to keep the stations running. What has emerged over the years is that many municipalities have been unable to manage and maintain their monitoring stations at the required level in order to produce air quality data that is scientifically sound and that can be used for decision making primarily due to the fact that when purchasing these stations, the budget for maintenance and operation was not factored in, thereby leading to poor maintenance and to the collapse of the functioning of the stations. The factors affecting the inability of provinces and municipalities to optimally manage the stations include, amongst others, the following:

- Unavailability of budget to fund operational requirements;
- Lack of skills and capacity; and
- Lack of proper planning for management of stations.

In light of the challenges mentioned above with regards to the government-owned air quality monitoring stations across the province, GDARD will be taking over the operation, maintenance and the overall management for some of the municipal-owned stations for a period of three (3) years.

## **3. PROJECT AIM AND OBJECTIVE**

The purpose of this project is to take over the maintenance and management of the identified air quality monitoring stations (on behalf of the local authorities) for a period of three (3) years. The project aims to improve the conditions of all the identified air quality monitoring stations in order to obtain stable and continuous air quality data for the province. The following objectives shall be met throughout the project period:

- 3.1 Procurement of four (4) analysers/monitors for West Rand District Municipality;
- 3.2 Continuously maintaining the identified air quality monitoring stations in Gauteng Province for a period of three (3) years;

- 3.3 All identified stations to report air quality monitoring data live to SAAQIS to improve intervention on mitigation strategies for the province;
- 3.4 To ensure the sustainable management of the identified stations; and
- 3.5 To develop practical and theoretical skills in provincial air quality monitoring fraternity on the maintenance and management of ambient air quality monitoring stations within the province.

#### 4. STATUS QUO ANALYSIS

The above-mentioned air quality monitoring stations were identified to be part of the three (3) year project so that the province can provide support on the maintenance and management of such monitoring infrastructure on behalf of municipalities. Below is the accurate status quo for the identified stations:

**SBD 9****CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
