1. INTRODUCTION

Grootvlei Power Station is situated close to the town of Balfour in Mpumalanga province. The Power Station consists of six units with a capacity of 200 MW each and the total installed capacity is 1200 MW. The first of six units was commissioned in 1969. Three of the units were mothballed in 1989 and the rest in 1990. Grootvlei was one of the power stations being recommissioned in the years between 2005 and 2010. The return to service of the first unit occurred during 2007 and all six units were recommissioned during 2010. The power station infrastructure is currently 61 years old.

2. SUPPORTING CLAUSES

2.1 SCOPE

The scope of works is for the structural repairs to the top rim of the South Smoke Stack, where the works are to be performed by the *Contractor*.

2.1.1 Purpose

The purpose of this tender technical evaluation strategy is to define the Mandatory Evaluation Criteria, Qualitative Evaluation Criteria and TET member responsibilities for tender technical evaluation. The technical evaluation strategy serves as basis for the tender technical evaluation process.

2.1.2 Applicability

This document shall apply to Grootvlei Power Station.

2.2 NORMATIVE/INFORMATIVE REFERENCES

Parties using this document shall apply the most recent edition of the documents listed in the following paragraphs.

2.2.1 Normative

- [1] 240-48929482: Tender Technical Evaluation Procedure
- [2] GVL 0567: Grootvlei Power Station: South Smoke Stack Repair Scope of Work

2.2.2 Informative

2.3 DEFINITIONS

2.3.1 Classification

Controlled Disclosure: Controlled Disclosure to external parties (either enforced by law, or discretionary).

2.4 ABBREVIATIONS

Abbreviation	Description
CIDB	Construction Industry Development Board
ECSA	Engineering Council of South Africa
SACPCMP	South African Council for the Project and Construction Management Professions
TET	Technical Evaluation Team

2.5 ROLES AND RESPONSIBILITIES

As per 240-48929482: Tender Technical Evaluation Procedure

2.6 PROCESS FOR MONITORING

N/A

2.7 RELATED/SUPPORTING DOCUMENTS

N/A

3. TENDER TECHNICAL EVALUATION STRATEGY

3.1 TECHNICAL EVALUATION THRESHOLD

Mandatory Technical Evaluation Criteria (gatekeepers) are 'must meet' criteria. These criteria shall not be weighted or point scored but shall be assessed on a Yes/No basis as to whether or not the criteria are met. An assessment of 'No' against any criterion shall technically disqualify the tenderer and shall not be further evaluated against Qualitative Criteria.

Qualitative Technical Evaluation Criteria are weighted evaluation criteria used to identify the highest technically ranked tenderer after determining that all the Mandatory Evaluation Criteria have been met. The Qualitative Evaluation Criteria are weighted to reflect the relevant importance of each criterion.

The minimum weighted final score (threshold) required for a tender to be considered from a technical perspective is 70%.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

3.2 TET MEMBERS

Table 1: TET Members

CONTROLLED DISCLOSURE

3.3 MANADATORY TECHNICAL EVALUATION CRITERIA

Table 2: Mandatory Technical Evaluation Criteria

	Mandatory Technical Criteria Description	Reference to Technical Specification / Tender Returnable	Motivation for use of Criteria
1	Has the tenderer submitted a Certificate with a minimum of CIDB 7GB Yes = 1 (Continue to qualitative criteria) No = 0 (No further evaluation)	GVL 0567: Grootvlei Power Station: South Smoke Stack Repair Scope of Work	The scope of work relates to the construction and repair of concrete works. A risk of using a contractor with the CIDB grading lower than specified is unacceptable.
2	Submission of CV and Qualification of Professionally Registered Engineer with ECSA (Pr Eng / Pr Tech) involved in the works (minimum 7 years post professional registration certificate)	GVL 0567: Grootvlei Power Station: South Smoke Stack Repair Scope of Work	Planning and execution of the works requires safe designs to eliminate and minimise potential structural failures.
3	Submission of CV and Qualification of SACPCMP professionally registered Construction Manager involved with the works (minimum 7 years post professional registration certificate)	GVL 0567: Grootvlei Power Station: South Smoke Stack Repair Scope of Work	Nature of the works requires planning and integration of various resources. Time constraints must be adhered to ensure the Tower is brought back on timeously.
