1 PURPOSE

The purpose of this document is to detail the Terms of Reference (ToR) for the appointment of a service provider to submit RFP for the Supply, Delivery of Cisco DNA Center appliance, related licenses, and Implementation.

2 OBJECTIVE

The Development Bank of Southern Africa (DBSA) has started a journey to digital transformation with aim to enable powerful network control and management dashboard that lets administrators take charge of the network, optimize the Cisco investment, and lower IT spending. Cisco DNA Center provides a single dashboard for every fundamental management task to simplify running the network. With this platform, IT can respond to changes and challenges faster and more intelligently.

DBSA had Cisco Prime Infrastructure (PI) solution that has reached its End of Life (EoL) and decommissioned, currently there are no heat Maps, and we will require plotting of Wireless Access Points (WAP) to the Floor Plans that will be uploaded as Heat Maps on our DNA-C solution. The required DNA-C solution should automatically discover and maps network devices to a physical topology with detailed device-level data.

3 SCOPE OF WORK

In order to meet the above objective, the following scope of work must be followed:

- Supply, delivery of Cisco DNA Center Appliances with related licenses and implementation of detailed below as per DBSA requirements.
- To ensure availability and reliability of the equipment supplied to warrant adequate accessibility as required by the DBSA.

SERVICE CATEGORY	HIGH-LEVEL REQUIREMENT
Network discovery	Automatically discovers and maps network devices to a physical topology with detailed device-level data.
Design	Design the network using intuitive workflows, starting with locations where the network devices are deployed.
Policy	Define user and device profiles that facilitate highly secure access and network segmentation based on business needs. Application policies allow your business-critical applications to provide a consistent level of performance regardless of network congestion.
Provision	Use policy-based automation to deliver services to the network based on business priority and to simplify device deployment. Zero-touch device provisioning and software image management features reduce device installation or upgrade time from hours to minutes and bring new remote offices online with plug-and-play ease from an off-the-shelf Cisco device. Additionally, the Cisco Secure Network Analytics (formerly Stealthwatch) service provisions network elements to send NetFlow and Encrypted Traffic Analytics (ETA) to the analytics service.
Assurance	Enable every point on the network to become a sensor, sending continuous streaming telemetry on application performance and user connectivity in real time. This, coupled with automatic path-trace visibility and guided remediation, means network issues are resolved in minutes — before they become problems. Automated NetFlow switch configuration for Cisco Secure Network

	Analytics provides detection and mitigation of threats, even when they are hidden in encrypted traffic.
Platform:	An open and extensible platform allows third-party applications and processes to exchange data and intelligence with Cisco DNA Center. This improves IT operations by automating workflow processes based on network intelligence coming from Cisco DNA Center.

4 EXPECTED DELIVERABLES, OUTPUTS AND TIMELINES

The service provider will ensure availability and reliability of equipment supplied to warrant adequate accessibility for use as required by the DBSA.

The service provider must conduct adequate training to the DBSA technical staff on the support and day-to-day operating of the supplied equipment.

5 COMPETENCY AND EXPERTISE REQUIREMENTS OF RESOURCES

The service provider should be an accredited Cisco Premier or Select SMME Partner. It is the responsibility of the service provider to ensure that staff allocated have the required knowledge, qualifications, and experience to undertake the work. All reviews must be conducted in strict accordance with the standards specified in the scope of work.

Qualifying criteria for the project include below resource/s requirements (CV/s to be attached).

- 3 years Expert knowledge and experience in the implementation of similar project
- 3 years Expert knowledge in Cisco DNA-C Network Monitoring tool deployment.
- Knowledge in Software Defined Networks (SDN).

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
