1. THE PURPOSE

The purpose of this tender is to appoint a service provider for the supply and delivery of Renal Dialysis Consumables including home based care solution to the Gauteng Department of Health institutions for a period of 3 years.

2. BACKGROUND

Dialysis is a treatment provided for patients who are in acute and chronic renal failure (kidney failure), these patients depend on dialysis to survive. Patients who are in chronic renal failure cannot pass urine and their kidneys cannot clear their bodies of harmful waste products (toxins), hence they depend on dialysis to do the functions their kidneys would have normally performed. There are two types of dialysis modalities Hemodialysis (in-hospital treatment) and Peritoneal Dialysis (home dialysis).

It is imperative that hospitals always have stock to be able to dialyze patients, one missed session of dialysis has an adverse effect on a patient's body and can result in death. The ordering process plays a key role in ensuring stock availability in the hospitals and also for the home care-based patients.
