

HOACES PRC 52144: FOR THE PROVISION AND DELIVERY OF HIGH AND MEDIUM PRODUCTION TAMPERS FOR THE COAL ANNUAL SHUTDOWN.

1. Clarifications:

With reference to T2.2-6 Due Diligence – Operational Risk OHTE (100% mandatory)

Please note the evaluation form is for OHTE machines, the RFP is for Tamping machines and therefore not comply to the 100% of the operational risk for an OHTE machine.

Will a new T2.2-6 for Tampers be issued or shall we enter N/A on items specifically relating to OHTE machines only.

Response: T2.2.6 Operational Risk for OHTE (100%) was removed from RFP HOACES PRC 52144.

Please refer to addendum no.1

2. Clarifications:

With reference C2.2 the Price List. We note 3 different Price Lists for 1 machine each of the different types of machines requested, they will therefore have different totals.

With reference to C1.1 Form of offer and acceptance. We note only 1 form of offer and acceptance.

Please provide guidance how to complete the form of offer and acceptance. Must the 3 Price List be added and carried over with one final total. How will TFR evaluate the Form of Offer and Acceptance for the supply of 1 machine vs 3 machines if the offers are added.

Response

Each C2.2 Price list must be price separately then added together for the form of offer.

Where bidders quoted only for one machine, evaluation will be done per machine as per price list
