

Provision of Yellow Plant:

<u>QUESTION</u>	<u>ANSWER</u>
1. For the BOQ may we only focus on the power station that we are intending to offer our plant only?	The suppliers are allowed to tender only for at least one BOQ but in full for them to be eligible for the tender, the specific BOQ must be filled in full. The supplier can choose one site or two or all the sites to send returnables for the tender.
2. Will the technical evaluation only focus on the power station we are tendering for; e.g do not we need to include certificates for machines which are only required for the power station(s) we are focusing on?	The functionality has an indication of the number of points per plant you will be awarded in terms of the tender returnables, please pay particular attention on that in terms of points. You can include the certificates of the plant in terms of your targeted site, should you wish to only tender for one site.
