

TECHNICAL EVALUATION

Technical Evaluation Requirement	Compliant	Non-Compliant
Mandatory Requirements are as follows:		
The supplier to provide valid manufacturer authorization letter. (Returnable – Authorization letter from manufacturer.)		
The supplier to provide training to the user with the operational training of the equipment and software. (Returnable – Training facilities and it will be checked during the site visit.)		
Does the company submitting the tender have a workshop that can able maintain/repair the equipment they are tendering on. Site visit to be conducted with supplier. _____ (Returnable – Company prospectus and manufacturer accreditation) Suppliers to provide the proof of residence and addresses.		
Does the receiver, antennae, software, and ancillary equipment integrate with national satellite system (e.g., TRIGNET, GLONASS, Galileo, etc.) (Returnable – Specifications Sheet of equipment tendering on)		
Is the software supplied with the GPS capable of: 1. Exporting captured, processed, and edited data to standard GIS and CAD formats? i.e., Bentley MicroStation, Excel, ASCII 2. Transferring data file to and from receivers, handheld data collectors, field/office computers and other conventional survey instruments? (Returnable – Specifications Sheet of equipment tendering on)		
REAL TIME KINEMATIC SURVEYING Single Baseline ± 30 km 1. Horizontal 8 mm + 1 ppm RMS 2. Vertical 15 mm + 1 ppm RMS RTK start-up time for specified precisions 2 to 8 seconds (Returnable – Specifications Sheet of equipment tendering on)		
Is the batteries capacity provided capable of keeping the receivers, antennae, and radios functional for at least 8 hours in use? (Returnable – Specifications Sheet of equipment tendering on)
