### Definition of Reverse E-auctioning

CLASSIFICATION	Public	DATE	November 2023
FOR ATTENTION	Tenderer	ACTION REQUIRED	Reading
FROM	Annemarie Berry	CONTACT NUMBER	021 522 3310
SUBJECT	Reverse E–Auctioning		

#### WHAT IS REVERSE E-AUCTIONING?

Reverse e-auctioning means an electronic negotiation process that aims to achieve the most competitive prices for clearly specified items.

Reverse e-auctioning replaces the negotiation process, with an electronic negotiation process on price only, which provides the results of the tender process immediately.

Notwithstanding the above, Eskom reserves the right to award an order/contract to a supplier who may not be the highest scoring or highest-ranked supplier, only in accordance with Section (2)(1)(f) of the PPPFA.

Reverse e-auction, when applicable, will only be considered once the normal procurement process has progressed to the point that the responsive tenderers have been identified.

Tenderers will be trained on the reverse e-auction system. Responsive tenderers will receive login details in order to participate.

# The Eskom eAuction System

## User Guide for Prospective Bidders

Last updated: 2019\05\15

### Introduction

The Eskom eAuction site is a service in which external users and companies bid for products or services via the Internet. Eskom eAuction facilitate a competitive process between buyers and sellers in different locations or geographical areas.

Online auctions mirror traditional auctions and usually involve multiple bidder participation. In both scenarios, bidders and sellers buy and sell tangible and intangible products and services. Starting bids are at the Eskom reserve value but increase at steady rates to meet market demand and item popularity. The time span of an online auction ranges from one to 10 days for items.

Online auctions have become a widely accepted business model for the following reasons:

- No fixed time constraint
- Flexible time limits
- No geographical limitations
- Offers a highly competitive environment

Online auctions include business to business (B2B), business to consumer (B2C), and consumer to consumer (C2C) auctions.

The Eskom eAuction site enables Closed auction for both Eskom sales and Eskom purchases with Business Partners as well as open Auctions to the public where anyone can bid on an even basis for products.

Companies participating in Eskom eAuctions will be required to maintain their BBBEE score rating as Auctions are awarded on a point-based system that considers both Price and BBBEE rating.

## User Access

All users of the eAuction system must have their own login username and password. Users may not share this information as a shared username is more difficult to verify who made the bids.

## Registration Form

The screenshot shows the Eskom eAuction registration interface. At the top is the Eskom logo and 'eAuction' text. Below it is the instruction 'SIGNUP TO GET ACCESS.' The form contains five input fields: 'Email address' with a placeholder 'Enter email' and an envelope icon; 'Password' with a placeholder 'Password' and a lock icon; 'Retype Password' with a placeholder 'Retype Password' and a lock icon; 'Full Name' with a placeholder 'Your full name' and a person icon; and 'Company Code (as per email)' with a placeholder 'Company code' and a code icon. A blue 'Create account' button is positioned at the bottom of the form.

To register a user must enter their Email address and create a password of their choice.

**Passwords must be longer than 8 characters, have a mix of letters numbers and special characters, and include at least 1 capital letter and one lower case letter.**

The Company code field must be populated with the code as per the email to link the user to the company they may bid on behalf of. All users of the same company use the same company code to link their bids together.

*All bids in the system are linked to the user that made them as well as to the company the user is bidding on behalf of. The audit trail allows the system administrator to identify the user and the date and time the bid was made.*

## Auction Process

### Standard and Reverse

Auctions The eAuction system

supports:

- Open Auctions (Eskom is selling a product to the public);
- Standard Auctions (Eskom is selling a product) and • Reverse Auctions (Eskom is Buying a product or service).

In the case of a standard auction Eskom is selling a product and therefore each bid is required to be higher than the last bid. In a reverse auction where Eskom is buying a service or product each bid is required to be lower than the previous bid.

On the bidding screen the current auction type is displayed

**Eskom is trying to obtain the highest price for this sale.**

### Next Bid

The eAuction system indicates what the next bid is required to be. This value is based on the currently winning bid and a fixed bid increment that is applied. In a standard auction this is the lowest bid that can be made next, bids of a lower amount will be rejected, however bids of a higher amount can be made (The opposite applies in a Reverse Auction).

This has been implemented to prevent very small bid increments that have no material difference in the final price obtained.

### End time of an Auction

The End Time of an auction is the earliest time the auction can close. However, bids made close to the end time will extend the end time of the auction to give other bidders an opportunity to react to any bids made.

This has been implemented to ensure that all bidders have a fair opportunity to make the winning bid.

An example:

*eAuction for the sale of 10000 tons of Ash from Lethabo Power Station had an End Time of 10:00 in the morning. Bidder A makes a bid at 09:58, the Auction is therefore extended by 10 minutes to 10:08. At 10:04, Bidder B makes a new best bid and the auction gets extended to 10:14 to allow Bidder A an opportunity to react to Bidder B's bid. Bidder A makes a new bid at 10:05 and the auction gets extended to 10:15. Bidder B decides that the new bid by A cannot be beaten and does not make any further other bids. The auction then closes at 10:15 when no new bids have been*

received for the 10 minutes. (10 minutes is an example only and each auction can have their set to a different increment extension value).

### Winning an Auction

Bids made on an Auction are a financial commitment to deliver the product/services as expected at the price offered. It is a financially binding commitment. Please read the End user Agreement for more details on the legal aspects of making a bid.

The final bids are still subject to Eskom review as the final awarding of a contract is also influenced by other requirements such as BBBEE rating etc. To find out more about the impact of these ratings on the final awarding of the contract please speak to the procurement officer to get the details.

When an Auction closes all bidders will receive an email from the Eskom eAuction site indicating that the Auction has closed. Once the auction is closed no more bids can be entered and no opportunity is available to change your final bid.

The procurement officer will contact the winning bidder directly and finalise the contract.

### Screen Layout
