3. TERMS OF REFERENCE OF THE PROJECT

3.1 PURPOSE OF THE ASSIGNMENT

The SHRA aims to appoint a service provider to develop a project technical feasibility model from an existing model specifically for social housing projects, (both brownfield and greenfield developments). The Consolidated Capital Grant (“CCG”) application process requires applicants to complete the existing Project Technical Viability Model (“QSB”).

The QSB model evaluates a project's technical feasibility by examining key considerations such as land rights, town planning requirements, and bulk infrastructure capacity. These indicators and supporting documents are assessed internally by the SHRA and externally by independent assessors. The assessment results form the basis for decision-making, enabling the SHRA to approve technically ready projects.

Changes have occurred in the sector over time such as amendments to the target market, adjustments to the grant quantum, specification and introduction of the norms and standards. These changes have necessitated the development of an updated model.

Additionally, the updated model needs to align with the financial viability tool (“QSC”), be user-friendly for applicants, and conform to industry standards. This comprehensive approach ensures that only technically and financially sound projects receive approval, enhancing the overall quality and effectiveness of social housing initiatives.

3.2 SCOPE OF WORK

It is critical that social housing projects are well packaged and are technically ready giving the SHRA comfort that project construction would commence within six (6) months upon signing a CCG agreement as this has a direct impact on the SHRA’s mandate.

1. Real rights to the land.
2. Purchasing the land or acquiring an option to purchase the land.
3. Location of the project in a gazette Restructuring Zone (“RZ”).

- 2: Weak, less than acceptable. Insufficient for performance requirements
- 3: Satisfactory should be adequate for stated element
- 4: Very good, above average compliance to the requirement
- 5: Exceptional mastery of the requirement should ensure extremely effective performance.

The percentage allocated for functionality is 100%. Minimum acceptable score for functionality is 70%.

5. EVALUATION PROCESS

All bids duly lodged will be examined to determine compliance with bidding requirements and conditions. Bids with obvious deviations from the requirements/conditions, will be eliminated from further adjudication.

FUNCTIONALITY EVALUATION

All remaining bids will be evaluated as follows:

The functionality calculation will be done based on the defined criteria and weighting thereof. Functionality will be scored out of a 100. If it is deemed necessary, presentations may be held with Bidders who have met the minimum functionality criteria. If presentations are held, the functionality score will be adjusted whereby 80 percent will be awarded to during the bid evaluation and 20 percent will be for presentation score. **If a bidder fails to score a minimum of 70% out of 100% for functionality, the bid will be disregarded from further consideration.**

ELIMINATION OF BIDS ON GROUNDS OF FUNCTIONALITY

Bids that score less than 70% of the 100% available for functionality will be eliminated from further consideration. Points will therefore not be awarded for their cost bids or for specific goals.

The percentage scored for functionality should be calculated as follows:

Each bidder shall award values for each individual criterion on a score sheet. The value scored for each criterion shall be multiplied with the specified weighting for the relevant criterion to obtain the marks scored for the various criteria. These marks should be added to obtain the total score. The following formula should then be used to convert the total score to a percentage for functionality:

$$Ps = \frac{So}{Ms} \times Ap$$

where

Ps = percentage scored for functionality by bid/bid under consideration

So = total score of bid/bid under consideration

Ms = maximum possible score

Ap = percentage allocated for functionality

The percentages of each panel member shall be added together and divided by the number of panel members to establish the average percentage obtained by each individual bidder for functionality.

After calculation of the percentage for functionality, the prices of all bids that obtained the minimum score for functionality should be taken into consideration.

6. PRESENTATIONS
