The award of the tender is subject to the signing of a Service Level Agreement (SLA) between the successful bidder and Stellenbosch Municipality.

10 Inclusion as a standard clause in the tender specification documents where any asset is constructed (delete which ever is not applicable)

On practical completion date, a report or certificate should be issued indicating the total costs of the project attributable to each significant component as identified within the lowest asset hierarchy level (4) as specified within the infrastructure catalogue or Annexure A of the Stellenbosch Municipality's asset management policy as approved in 2014, if not contained in the catalogue.

Where a tender runs over more than one financial year (therefore not concluded by 30 June of a year) the following provision must be included in the consultant's project management agreement – it therefore forms part of the consultant's responsibilities:

Inclusion in contract with consultants

If construction is still in progress over the year-end period of the Stellenbosch Municipality, being 30 June of each year, the Municipality should be furnished with a report / certificate at year-end (30 June), which details (a) The cumulative expenditure incurred up to 30 June for the project. (b) any details if the project is taking a significant longer period of time to complete than expected, including reasons for any delays. (c) details where construction or development has been halted either during the current or previous reporting period(s), including reasons for halting the construction or development of the asset/project.

PART B – SPECIFICATIONS AND PRICING SCHEDULE

14. SPECIFICATIONS

Specification for the establishment of an Integrated Infrastructure Asset Management Plan (IAMP) comprising four service-specific volumes

NB: Service providers are required to read and study the specifications, the general conditions of the contract, as well as the instructions very carefully before submitting their offers.

Non- compliance with specifications will invalidate your offer.

1. BACKGROUND

Municipalities are not only responsible for the provision of essential engineering services that include potable water supply, sanitation, electricity reticulation, the provision of roads and stormwater, and solid waste collection and disposal, but also for housing and shared community assets like cemeteries, parks, sports grounds, libraries, etc. Whilst municipalities also have obligations towards governance, community safety and health, and development services, the success or failure of a municipality is substantially measured by the availability and quality of infrastructure services. As such, a municipality is an asset-intensive business.

The introduction of Generally Recognised Accounting Practice (GRAP) within local government focussed attention on asset management, and National Treasury additionally issued various asset management practices and reporting requirements. These requirements include identifying, componentising, valuing, and tracking the health of the municipal-owned assets, establishing programmes, providing resources to care for those assets, and reporting the status recorded of existing and new assets for the current and future. Stellenbosch Municipality requires the services of a qualified and experienced professional service provider that can assist the Municipality to achieve the requirements of the said documents for unbundling of its existing and new infrastructure assets.

2. SCOPE OF WORK

Stellenbosch Municipality would like to appoint a competent service provider for the Unbundling of Infrastructure Assets completed in the financial years 2026/2027 up to 2028/2029. The duration of this contract is thus estimated to commence on 01 July 2026 and end on 30 June 2029. The service provider will be required to takeover and unbundle some historic work of the financial year 2025/2026, which may have been completed in the latter part of the financial year and were not able to be unbundled in the preceding similar contract due to its expiry date. Similarly, the unbundling of assets completed in the latter part of the financial year 2028/2029 may require to be handed over to the next contract should the municipality make that decision.

The service provider will be issued with the current Work In Progress register (WIP) which lists all infrastructure projects with assets in the implementation stage. The service provider will be required to regularly update this WIP register by adding and verifying new projects, and identifying completed projects to be unbundled.

As per set policies and regulations, all municipalities must do the unbundling of infrastructure assets for all new and historical assets presented in the corporate asset register.

During this unbundling process, the requirements of MFMA, MSA, Generally Recognised Accounting Practice (GRAP) with specific reference to GRAP 17 (Property Plant and Equipment), and the latest GRAP improvements aligned with IPSAS 45 and 46 regarding Measurement and Infrastructure, must be met. Furthermore, adherence to mSCOA (Municipal Standard Chart of Accounts) segments for financial reporting is mandatory to ensure seamless integration between the asset register and the general ledger.

The service provider must comply with the 2024 editions of ISO 55000, ISO 55001, and ISO 55002. Other applicable technical standards, such as NRS 093-1:2009 and GIAMA (Government Immovable Asset Management Act) for land-related infrastructure, must be adhered to as applicable

3. OVERVIEW OF SPECIFICATION

This work is for the unbundling of Infrastructure Assets of historic works completed in the financial year 2025/2026 and works that will be completed in the financial years 2026/2027 up to 2028/2029.

This will include the Infrastructure Services Departments, specifically:

- Water & Wastewater
- Electricity
- Roads & Stormwater
- Solid Waste
- Pedestrian Infrastructure

The works of this contract will also include the unbundling of the historical and Work-In-Progress (WIP) assets from the Stellenbosch Municipality’s Infrastructure Assets. The Infrastructure Assets identified by the Municipality include all components and systems associated with the departments listed above.

3.1 DETAILED SPECIFICATION FOR ASSETS UNBUNDLING

- 3.1.1 Perform detailed asset verification, assessment condition classification, and componentisation of all assets in the financial years 2026/2027 up to 2028/2029. This will include clearing the backlog of historical WIP assets.
- 3.1.2 Perform asset condition classification and componentisation of all infrastructure assets as per their requirements on a quarterly basis until the end of the financial year 2028/2029.
- 3.1.3 Review useful life and residual values of all infrastructure assets according to GRAP 17 and other applicable GRAP publications, including the new guidance on assessing the impact of deferred maintenance on asset lifespan. This work must also be done in accordance with other applicable technical standards such as NRS 093-1:2009.
- 3.1.4 Data collection, compiling of a working infrastructure asset register and devising of a working system that will allow continuation of unbundling and updating of future municipal infrastructure assets.
- 3.1.5 Verification (of the current and historic assets) and updating of the existing infrastructure asset register to include new additions and assets currently in the implementation stage.
- 3.1.6 Identification and recording of possible impairment losses in a verifiable and systematic way, specifically identifying assets where under-maintenance has led to a significant decline in service potential.
- 3.1.7 Preparation of reconciliations between the asset register and general ledger ensuring all asset are correctly classified against the appropriate mSCOA functions and cost centres.
- 3.1.8 Calculate and report the estimated cost for rehabilitation or replacement of each infrastructure asset, regardless of the remaining design life span or current life-span determined from the assessment of its current condition.

- 3.1.9 Recording of all disposals and reasons for disposing of.
- 3.1.10 Preparation, listing, and proper referencing of annexures of all work done.
- 3.1.11 Transfer of skills to the Municipal officials by means of a training programme over the next three financial years.
- 3.1.12 The service provider must produce quarterly reports that forecast upcoming unbundling milestones and provide actionable business process recommendations; these recommendations must be used to annually review and update the Infrastructure Assets Management Unbundling Policy (IAMUP) to ensure the Municipality’s regulatory framework evolves alongside its operational improvements.
- 3.1.13 The service provider must attend to audits of infrastructure assets queries/findings raised by the Auditor General (AG) for the financial years of the duration of this contract. This includes addressing findings related to historical work that remain unresolved at the time of appointment. The primary objective is to reduce the volume of audit queries through the submission of a corrected and verified asset register to the Municipality.
- 3.1.14 The service provider shall prepare and present detailed quarterly progress reports to Municipality.
- 3.1.15 The table provides a brief list of expected deliverables and their expected delivery dates.
