BID NAME

QUOTATION FOR THE REMOVAL OF BEES FROM THE CITY OF TSHWANE INFRASTRUCTURE IN ALL SEVEN REGIONS

BID NUMBER

(Q25-2023-2024)

1. INTRODUCTION AND PURPOSE

Quotation for the Removal of Bees from municipal infrastructure and re-establishment of the bees outside the residential areas on agriculture property or nature reserves for the City of Tshwane in all seven regions.

This service does not include bees which have established hives on private property, inside Telkom infrastructure, inside and fibre network infrastructure or ESKOM infrastructure.

2. BACKGROUND

Bees are an integral part of the survival of many plant species and critical for the pollination of fruit trees.

It would be ideal if the bees would nest only in natural areas and on agricultural farms, but this does not happen. Bees will create a beehive wherever they want and where they feel secure. Due to this fact bees form hives all over the city and especially in infrastructure belonging to the City of Tshwane.

This causes problems in the city when infrastructure cannot be repaired or maintained. In many cases the water and electrical metres cannot be read causing unhappiness with paying customers.

In many cases the bees cannot be removed and the only way out is to terminate the beehive with chemicals. There are however many situations where beehives

can be rescued and relocated to nature reserves or agricultural farms outside of the urban residential boundaries.

However, this can be a longer and more complicated process to remove the bees but it will have its own environmental benefits for society in the future.

The essential service will be procured over a period of 1 year or while funding is available, on an as and when required basis. The service will be required by most departments of the city requiring the bees to be removed from the municipal infrastructure managed by them.

The Department is seeking one bidder to provide the service on the quote for a period of 1 year across all 7 regions.

3. PROJECT SCOPE

The bidders must comply with all the specifications of the quote to be able to qualify as well as the general specifications, conditions and mandatory requirements.

The quote is only for the conservation of the bees, meaning the removal of the beehive and re-establishment of the hives outside of the Tshwane residential boundaries.

The bidder must be committed to the saving and re-location of the beehives. A service provider who only provides a pest control service will not be suitable for this service.

In many cases it is impossible to save the bees as they are in a place where the queen bee cannot be reached, or the bees are invader bees and by law need to be destroyed. In situations where the beehive must be destroyed this will then be carried out by the City of Tshwane.

3.1 Qualifications of Pest Control Operators

The following certificates are required to be able to bid. If the bidder does not provide proof of the following certificates, their bid will not be considered.

The Beekeeper must be in possession of a membership certificate of South African Bee-Farmers' Co-operative Limited as in accordance with the Agriculture Pests Act, 1983 (Act No. 36 of 1983), Control measures relating to Honeybees.

Service Required	Certificate
The removal and re-establishment of bees	membership certificate of a bee keeping association or registration as a beekeeper.

3.2 Vehicles, Spraying Equipment and personnel required.

- 3.2.6 The bidder must be in possession of a bee's keepers suit; the whole body must be covered from head to toe, gloves and hat with a veil, so that the person is protected.
- 3.2.7 The bidder must be in possession of signage that can be placed on site warning the public that there is a pest control action in process and that they must not enter the area – DANGER - BEE REMOVAL IN PROGRESS
- 3.2.8 The bidder must have access to long extension ladders (10 to 12 feet) as sometimes the bees may be high up in a tree or on the side of a building or roof and even a chimney.
- 3.2.8 The Department requiring the bee removal must supply a cherry picker, if one is required to remove the bees and coordinate with the service provider on the time and availability of this equipment.

3.3 Work hours and Operational arrangements.

- 3.3.1 The bidder may carry out work after the bees have settled in for the night and before they leave the hive in the morning as during the day up to a third of the bees in the colony are out foraging and will not effectively be removed.
- 3.3.2 Work must be completed within the time limits specified under the heading: Description of sites and operational procedures. The following factors will extend the time limits:
 - (a) Rain, wind and other unfavorable weather conditionsThis progress information must be communicated to the project manager within 24 hours after receiving the spraying order.
- 3.3.3 Note that most of the City of Tshwane department's offices hours vary between 07:00 and 16:00. Work in buildings may be required to be done only after 16:00. Arrangements will need to be made between the bidder and the contact person from the building or depot manager to gain access to the property.

3.4. DESCRIPTION OF VARIOUS SITES AND OPERATIONAL PROCEDURES

The bidder will be required to carry out work orders on various sites and follow different operational procedures.

A bee suite, gloves and hat with facial covering must be worn at all times by the beekeeper.

Time limit: Reaction time is within 24 hours after receiving the request from the Department.

In cases where catch boxes are to be used then the process may take more than 10 days from the time of the instillation of the catch boxes on a site.

In all the above situations the bees can either be smoker out, vacuumed out or catch boxes can be used to entice the hive into the box.

In all situations signage must be installed and barrier tape to keep people away and from getting hurt.

The site must be cleaned up afterwards of all honeycombs, dead bees and any other materials used on the site. The area must be sterilized with Jeyes fluid afterwards.

Process of removing the bees where electricity is involved:

- No bidder may try to control the bees without a person from the Electricity Department being present. If the substation or electrical meter box has to be opened and the power has to be switched off, this can only be done by an electrician of the Electricity Department.
- No liquid may be sprayed into an electrical box; only smoke may be used.
- The bidder must make arrangements with Electricity Department for a time to meet for them to un-lock the substation or metre box or for the power to be cut. The cost of the City of Tshwane electrician is for the City of Tshwane and it will be in many cases the Electricity Department which will need to respond. Sometime there are electrical boxes and electrical kiosks inside other department's grounds.
- The outside area must be sprayed with jeyes fluid afterwards to sterilize the area so that the bees do not return.
- The removal of honeycombs and bees may only be done in the presence of an electrician of the Electricity Department who has switched off the power and declared the area safe. If the area is not safe, then clean up only what is

outside of the box or pole.

3.5 COMPLAINT PROCEDURES

This service will operate as follows.

- The City of Tshwane will receive the complaints from the public. Details of where the bees are, will be obtained. CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
