1. BACKGROUND

In a quest to reduce the risks associated with delayed project delivery and the need to enhance project performance, Construction services has resolved to source and enter into term service contracts with interested service providers for various key project scopes to reduce non performances on projects. The identified item is the provision service contracts for Stringing and Regulating of Overhead Powerlines with the relevant service providers on an as and when required basis for 36 months.

2. SCOPE OF WORK

PROVISION OF SERVICE OF CONTRACTS FOR STRINGING AND REGULATING ON AN AS AND WHEN BASIS FOR 36 MONTHS

Eskom Rotek Industries require service for the Stringing and Regulating of Overhead powerlines. This requirement will be applicable on the current and future projects as and when required:

- Experienced and reputable service providers to be able to do Stringing and Regulating on various key overhead powerline projects.
- The service provider must have capacity to supply its human resources from labour, semi skills and site management.
- The service provider must be able to run and complete successfully any section allocated in any project on time.
- The service provider must aim to help and support Eskom Rotek Industries Powerlines to be able to improve performance and deliver projects on time.
- The service provider must be able to deal with local employment demands.
- The service provider must be able to deal with the stability requirements in all projects
- The service provider must be prepared to work together with Eskom Rotek Industries Powerlines in all the projects and in any activities that will require support to enhance performance.

The contractor must be independent and be able to run a sectional work area of any magnitude.
