1. Introduction

A technical works scope for Camden Power Station was developed to provide a technical scope of work for the establishment of ash plant maintenance contracts. This tender technical evaluation strategy document is for the procurement process for the Ash Plant maintenance contracts.

An invite will be issued calling for interested parties to participate in the tender process for the maintenance of the coal and ash handling plant at Camden Power Station. The maintenance contract will be placed for a period of 18 months.

The complete scope of work is detailed in the scope of work document, 240-161702513 Maintenance of Ash and Coal Plant Equipment.

This document sets out the method and criteria that will be used to evaluate the tenders/proposals that will be received from the Open Enquiry process.

2. Supporting Clauses

2.1 Scope

This strategy defines the Technical Evaluation Team (TET), their responsibilities and the criteria to be used to evaluate the Maintenance of Ash and Coal Plant Equipment tender.

2.1.1 Purpose

The purpose of this tender technical evaluation strategy is to define the Mandatory Evaluation Criteria, Qualitative Evaluation Criteria and TET member responsibilities for tender technical evaluation. The technical evaluation strategy serves as the basis for the tender technical evaluation process.

2.1.2 Applicability

This document shall apply to Camden Power Station

2.1.3 Effective date

This document is effective from the date of authorization.

2.2 Normative/Informative References

Parties using this document shall apply the most recent edition of the documents listed in the following paragraphs.

2.2.1 Normative

- [1] Maintenance of Ash and Coal plant Equipment Scope of Work - 240-161702513
- [2] ISO 9001: Quality Management Systems.

CONTROLLED DISCLOSURE

[3] QM 58: Supplier Contract Quality Requirements Specification

[4] 240-48929482: Tender Technical Evaluation Procedure

2.2.2 Informative

[5] 240-83539994: Standard for Non-Destructive Testing (NDT) on Eskom Plant

[6] Occupational Health and Safety Act 85 of 1993 (OHS-Act)

[7] Pressure Equipment Regulations (PER)

2.3 Definitions

Definition	Description
Maintenance	Performance monitoring, Repair and replacement of components to ensure the reliable operation of the plant and conformance to statutory requirements. This include engineering advice and recommendations on performance improvements.

2.3.1 Classification

Controlled Disclosure: Controlled Disclosure to external parties (either enforced by law, or discretionary)

2.4 Abbreviations

Abbreviation	Explanation
CIDB	Construction Industry Development Board
CV	Curriculum Vitae
ITP	Inspection and Test Plan
NCR	Non-Conformance Report
PSR	Plant Safety Regulations
SAMTRAC	Safety Management Training Course
TET	Technical Evaluation Team

2.5 Roles and Responsibilities

The roles and responsibilities are as per those defined in the Tender Technical Evaluation Procedure [4].

CONTROLLED DISCLOSURE

2.6 Process for Monitoring

N/A

2.7 Related/Supporting Documents

Refer to Section 2.2.

CONTROLLED DISCLOSURE

3. Tender Technical Evaluation Strategy

3.1 Technical Evaluation Threshold

In order to be eligible for evaluation, the tenderer shall meet all the mandatory requirements.

The minimum weighted final score (threshold) required for a tender to be considered from a technical perspective is 70% for each of desktop and site assessment reviews.

Insert text here.

3.2 TET Members

The full time core technical evaluation team that will be reviewing the Maintenance Contract/ Procurement process will consist of the team members in Table 1 (in-line with Technical Evaluation Procedure 240-48929482):

Table 1: TET Members

TET number	TET Member Name	Designation
1	Yamkela Mgwebi	Engineer
2	Ranwedzi Mukhodobwane	Senior Engineer
3	Nosipho Mjelo	Senior technical Advisor – Maintenance
4	Giel Kruger	Senior technician– Maintenance (Ash Plant)
5	Davy Mthimunye	Senior technician– Maintenance (Coal Plant)

3.3 Mandatory Technical Evaluation Criteria

The information listed in Table 2 below must be included in the tender submission. Failure to provide the information will result in automatic disqualification of the tenderer.

Table 2: Mandatory Technical Evaluation Criteria

Ref no.	Mandatory Technical Criteria Description	Reference to Technical Specification / Tender Returnable	Motivation for use of Criteria
MR1	CIDB level 8 ME	CIDB certificate	To ensure the contractor has enough financial resource and experience

CONTROLLED DISCLOSURE

All TET members shall independently evaluate and score each Mandatory Evaluation Criteria for each tenderer in accordance to Table 2.

3.4 Qualitative Technical Evaluation Criteria

During the tender evaluations Table 3 shall be used by the TET members to score each criterion on a scale of 0 to 5.

Table 3: Qualitative Evaluation Criteria

Score	Percent (%)	Definition
5	100	COMPLIANT Meet technical requirement(s) AND; No foreseen technical risk(s) in meeting technical requirements.
4	80	COMPLIANT WITH ASSOCIATED QUALIFICATIONS Meet technical requirement(s) with; Acceptable technical risk(s) AND/OR; Acceptable exceptions AND/OR; Acceptable conditions.
2	40	NON-COMPLIANT Does not meet technical requirement(s) AND/OR; Unacceptable technical risk(s) AND/OR; Unacceptable exceptions AND/OR; Unacceptable conditions
0	0	TOTALLY DEFICIENT OR NON-RESPONSIVE
Note 1: The scoring table does not allow for scoring of 1 and 3.		
Note 2: Foreseen acceptable and unacceptable risk(s), exceptions and conditions shall be unambiguously defined in the relevant Tender Technical Evaluation Strategy		

As per the procedure a clarification shall be required if an evaluators score falls 1 point outside the average which equates to 20% outside the average scoring. Table 4 indicates the qualitative technical evaluation criteria that shall be used by the technical tender evaluation team.

3.6 Foreseen Acceptable / Unacceptable Qualifications

It is anticipated that various risks, exceptions and conditions will be identified during the clarification and negotiation process. Each of those risks will be considered and evaluated individually to determine whether they are acceptable, unacceptable or whether suitable mitigation measures can be agreed upon.
