Dear Sir/Madam

TILING OF BURNERS, DUCTS AND MILLS AT MAJUBA POWER STATION FOR FIVE YEARS AT MAJUBA POWER STATION FOR A PERIOD OF 60 MONTHS.

ENQUIRY NO: MPMAJ11481GX

MAJUBA POWER STATION

Herewith requests for clarification, together with Eskom's responses:

Question:

1. Price List:

- The price list does not provide pricing for tiling in terms of tilers or square meters to be tiled....
- Which consumables are to be provided by the contractor and which are to be provided by Eskom, e.g. grout, welding studs, silicon, epoxy, tiles, etc.
- No provision for pricing is made for of epoxy, grout, silicon and tiles in terms of application (area m2) or quantities...

2. Scope of work

Under Milling Plant scope, material to be provided by the contractor is stated without quantities or square meters. However under Item 6. Material, it is stated that all material will be provide by Eskom...

Answer:

The contract is activity based.

Eskom will be supplying tiles only. From the spec of the tiles the supplier should know that Eskom is using grout and welding studs.

All the information is on the scope of work

Question:

Can you please confirm that the site-establishment, de-establishment, stud-welders, and tilers are not involved in this boq.

and if not, how will the provision for the above be considered/covered?

Answer:

the contract is activity based.

the service provider should note the spec of the tiles from the scope, the tillers should know how to tile these types of tiles including dealing with the studs.

Question:

I have a query about the nec3 pricing, there is no accommodation on the pricing and also no hours to calculate the total. can you please give me clarity on how you want the pricing is it only rates you want?

Answer:

This is activity-based contract.

Question:

- Concerning the abovementioned tender, are we allowed to come on site to see the areas were the work will be done?
- On the price list on the nec there seems to be no tilers and assistants. please confirm if the resource list is complete as it appears on the nec.

Answer:

it not possible to see the plant as we only open during outages, currently all the units are boxed up the systems are running. estimates are available (ducts and mills) on the scope as well as the specific components (burners)

Please note that the revised price list has been loaded (Tilers and Assistants are added on the price list)

Yours faithfully,

Morena Molefi
Officer Procurement
