

# **PIPING MATERIAL SPECIFICATIONS**

**REV. 01**

**TRANSNET PIPELINES**

**AUGUST 2013**

## **MATERIAL STANDARDS AND SPECIFICATIONS GUIDELINE**

### **PIPING**

- |                                 |  |
|---------------------------------|--|
| ASTM A106 Grade B for manifolds | - avoid using outside a depot boundary<br>- avoid using underground other than internal link lines eg. between tanks and manifolds in same depot.<br>- Seamless, dimensions to ASME B36.10M – Welded and Seamless Wrought Steel Pipe.        |
| API 5L X42 for feederlines      | - To requirements of Petronet Specification PL 401 latest except for grade.<br>- Minimum wall thickness as per Policy Document.<br>< 4mm for NPS 0 to 6" diameter<br>< 4,8 mm NPS 8" to 10" diameter<br>< 5,6 mm for NPS 12" to 16" diameter |
| API 5L X52 for mainline         | - Petronet specification PL 401 /latest.   |

### **FLANGES (WELD NECK)**

- |             |   |
|-------------|---|
| Material    | : ASTM A105   |
| Dimensional | : ASME B16.5 – Pipe Flanges and Flanged Fitting.  |
| Other       | : Weld neck and Raised face with concentric serrated grooves to ASME B16.5.<br>Slip on flanges may only be used by special concession from Technical Manager. |

### **STEEL BUTT WELD FITTINGS**

- |             |   |
|-------------|---|
| Material    | : ASTM A234 WPB   |
| Dimensional | : ASME B16.9 – Factory-Made Wrought Steel Buttwelding Fittings. |

### **WELDING**

- API 1104 or Section IX of the ASME Boiler and Pressure Vessel Code – Welding Procedures & Welder Qualifications.  
Petronet Specification PL804 /latest – mainly for pipeline welding.

### **STUDS & NUTS**

- |             |  |
|-------------|--|
| Material    | : Studs : ASTM A 193 Grade B7<br>Nuts : ASTM A194 Grade 2H   |
| Dimensional | : Sizing to ASME B16.5 – Pipe Flanges and Flanged Fittings<br>Heavy Hex Nuts<br>Threads to UNC to 1" and UN8 above 1".<br>Studs shall be of sufficient length to protrude no less than 1½ threads and no more than 3 threads through the nuts. |

### **GASKET MATERIAL**

For 150#, 300# and 600#, but NOT for insulating gasket purposes

Spiral wound gaskets as per Transnet Pipelines specification : GASKET SPECIFICATION - SPIRAL WOUND.

For 150#, but NOT for insulating gasket purposes

1,5mm sheeting

- KLINGERtop-graph-2000
- Novus 49 (Graftec)

### **THREADED FITTINGS – SOCKETS/COUPLINGS, NIPPLES, PLUGS ETC.**

Material : ASTM A105

Dimensional : ASME B16.11 – Forged Fittings, Socket-Welding and Threaded.  
Limited to less than 2".

Fitting shall be Class 3000 for threaded and Class 6000 for socket-welding.

Threads shall be pipe threads to ASME B1.20.1. – Pipe Threads, General Purpose (Inch)

### **PROPRIETY FITTINGS – WELD-O-LETS, SOCK-O-LETS.**

Material : ASTM A105

Dimensional : Sizing to be to ASME B36.10M – Welded and Seamless Wrought Steel Pipe. - Welding and Threaded.

Design of fitting to meet requirements of ASME B31.4 – Liquid

Transportation Systems for Hydrocarbons, Liquid Petroleum Gas, Anhydrous Ammonia, and Alcohols.

## 1 GENERAL NOTES

### 1.1 Line class notes

01	Size range is the size of the header and not the branch line. For branch line size please refer to the branch table
02	Size range is the size of the branch and not the header line. For header line size please refer to the branch table
03	Refer to MSS SP-95 for available reducing sizes
04	Refer to ANSI B16.9 for available reducing sizes
05	Only for instrument connections were required
06	
07	
08

### 3 CALCULATIONS

<b>ALLOWANCE FOR VARIATION FROM DESIGN PRESSURE</b>	10% of internal design pressure (ASME B31.4 sec 401.2.4)			
<b>TEMPERATURE USED FOR MATERIAL PROPERTIES</b>	40 °C (ASME B31.4 sec 401.3.1/402.2.1)			
<b>ALLOWANCES</b>	<b>TYPE</b>	<b>Allowance</b>	<b>Reason</b>	<b>Code</b>
	CORROSION	None	Pipes will be painted	ASME B31.4 sec 402.4.1
	THREADING	Depth of thread to be added to calculated wall thickness		ASME B31.4 sec 402.4.2
	WELD FACTOR	1	Seamless pipe will be used	ASME B31.4 Table 402.4.3
	VARIATION IN WALL THICKNESS	None	Compensated for in code	ASME B31.4 sec 402.3.1
<b>ALLOWABLE STRESS</b>	$S = F \times E \times SMYS \quad (1.1)$ (ASME B31.4 sec 402.3.1)			
	S	Allowable stress	173.52 MPa	Equation 1.1
	F	Design factor	0.72	ASME B31.4 sec 402.3.1
	E	Weld factor	1	ASME B31.4 Table 402.4.3
