Anver

As discussed:

1. If the water is extracted from a natural resource such as a river or stream or any natural resource, The service provider must be in posession of a water use license of the source where the water is extracted from.
2. If the water is extracted from a municipal source proof of payment for that water from the municipality must be provided.
3. Water Quality to comply with the requirements of SANS 241-1 and SANS 241-2
4. The bottling process shall comply with the regulations relating to bottled waters (R718, Foodstuffs, Cosmetics and Disinfectants Act 54 of 1972)

Statement to be included: All related environmental legal requirements shall be complied with at all times.

I hope this is sufficient.

Kind regards
