Definition of pricing structures

For the purpose of this bid the following explanations are provided:

1. Firm prices

Firm prices mean prices which are only subject to adjustments in accordance with the actual increase or decrease resulting from the changes, imposition, or abolition of customs or excise duty and any other duty, levy, or tax which, in terms of a law or regulation is binding upon the contractor and demonstrably have an influence on the prices of any supplies, for the execution of the contract.

Firm prices linked to fixed period adjustments, i.e. three tier prices (Firm 1^{st,} firm 2nd, and 3rd year prices), only subject to the variables indicated in the above paragraph.

Kindly note that the cost of labour does not fall within the parameter of the above paragraph.

The increased cost of labour must therefore be projected into the 2^{nd} and 3^{rd} year pricing as no increase will be granted in this regard during the contract period.

Note: Any advantage due to a more profitable exchange rate, must be passed on to the Province.
