SCOPE OF WORK

I. Background

Sentech is a state-owned company and is the largest broadcasting signal distributor in South Africa. Sentech is a licensed Electronic Communications Network Service provider in South Africa. It currently operates many telecommunication networks for Satellite, Television, Radio, Broadband services and more. As such, Sentech is a global enabler of broadcasting and digital content delivery.

Sentech regional Transmitter sites face daily threats of vandalism, break-ins, thefts and to some extent possible attacks on staff conducting maintenance or any other network related duties at the sites. This is aggravated by the time the vandalizers have at their disposal to complete their mission due to lack of proactive security systems and dilapidated perimeter fences at some of the sites offering no resistance to site invasions. Some of the sites are also situated within and around nature reserves where possible attacks by wild animals is eminent

Due to the challenges and threats faced by the transmitter sites and the ever-changing modus operandi by criminals it is prudent and critical that Sentech ramps up its security provision to these Transmitter sites to protect the assets of Sentech and life of the staff providing maintenance and other duties to these sites.

It is evident that the incidents of vandalism and theft are some of the contributing factors to Sentech not meeting the SLA and ultimately paying penalties. One of Sentech KPI's is ensuring that the weighted average of 99.8% service availability is met. To achieve this KPI, the Operations Division needs to ensure that mitigation measures are put in place to ensure that the site does not become completely off and affect all the services. Such measures include appointment of service providers that can assist with the safeguarding and escorting of staff to the sites during times of duress or emergency or where due to the threat level permanent security guards are deployed on such sites. This vandalism and theft incidents happen at any site, at any time of day irrespective of whether it is a weekend or holiday. While Sentech intends to appoint service providers under Framework Agreements, it is imperative to state that Sentech promises no quantum of work to any successful bidder.
