The majority of Free State towns are characterized by high levels of unsightly environmental pollution in the streets such as litter, rubble that accumulates after building projects that are not cleared resulting into optical pollution and hazards to the environment and blocked drainage systems due to littering and illegal dumping sites as well as unmanned dumping sites. This has resulted diminished aesthetics of the environment and the rise of health hazards such as rat infestations, increase in incidents of disease etc.
- 1.2. Municipalities amongst other constitutional obligations are expected to ensure that communities are leaving in an environment that is healthy and safe.
- 1.3. The Executive Committee resolved that initiatives should be made towards achieving a clean environment within the Free State.
- 1.4. To that effect, a cleanest and greenest Municipal competition was launched on the 4th of December 2023 as means to ensure that Municipalities in the Free State are encouraged and motivated. In the Free State there will be 19 municipalities participating and this involves 80 towns in these municipalities. Programmes such as the Community Work Programme (CWP) that employs about 54 000 participants will be utilized in the programme. It should be indicated that the CWP also has a limitation on the availability of tools that will be utilized in the programme. Municipalities have already being workshopped on this competition through different means. Other related programmes of stakeholders such as one from the Department of Forestry, Fisheries and the Environment have already been initiated in other municipalities.
- 1.5. With the existence of CWPs, limited availability of resources by municipalities particularly small municipalities will inhibit participation in the competition. It is for this reason that the Department of Cooperative Governance and Traditional Affairs (COGTA) saw a need to procure tools for the cleanest and greenest Municipality Competition in the Free State.
