- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a per se prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

I, the undersigned, in submitting the accompanying bid:

(Bid Number and Description)

in response to the invitation for the bid made by:

(Name of Municipality / Municipal Entity)

do hereby make the following statements that I certify to be true and complete in every respect:

5. For the purposes of this Certificate and the accompanying bid, I understand that the word "competitor" shall include any individual or organization, other than the bidder, whether or not affiliated with the bidder, who:
 - (a) has been requested to submit a bid in response to this bid invitation;

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

5. SCOPE OF WORK AND / OR SPECIFICATION

5.1 BACKGROUND AND WHY THE NEED TO SOURCE THE GOODS OR SERVICES

Johannesburg Water is mandated to monitor and ensure the quality of drinking water in compliance with the South African National Standard (SANS 241), which includes the analysis of trihalomethanes. In addition, Johannesburg Water is responsible for assessing wastewater treatment plant performance through the analysis of organic compounds in both influent and effluent streams. The organisation is further required to investigate potential surface water contamination as part of its industrial effluent monitoring programme.

These analytical requirements necessitate the use of a high-resolution Gas Chromatograph coupled with a Mass Spectrometer (GCMS), which is capable of accurately detecting and quantifying a wide range of organic constituents. Beyond routine compliance monitoring, such instrumentation also enables the analysis of emerging contaminants, including antiretroviral drugs (ARVs), petrochemicals, polycyclic aromatic hydrocarbons (PAHs), agrochemicals, and selected pharmaceutical compounds.

The laboratory's existing GCMS instruments have surpassed their operational lifespan and are no longer supported by the original equipment manufacturer, resulting in increased maintenance challenges and risks to analytical reliability. To ensure continuity of operations, maintain compliance with regulatory standards, and enhance analytical capabilities, Johannesburg Water requires the procurement and installation of new, modern GCMS instrumentation.
