DESCRIPTION: REQUEST FOR QUOTATION (RFQ) FROM SUITABLE QUALIFIED SERVICE PROVIDER(S) TO SUPPLY A SOLAR SPATIAL AND STATISTIC ANALYTIC DATASET(S)**SPECIFICATION****1. BACKGROUND**

The City of Johannesburg (CoJ) aims to conduct an internal research project to assess the current status quo of Photovoltaic (PV) coverage and output (in KiloWatts) within Johannesburg.

The research objectives are to:

- 1.1 Provide a spatialised assessment of actual PV coverage and output with regards to:
 - 1.1.1 Compare and evaluate the current actual PV coverage and output against maximum¹ demand forecasting potential coverage and output;
 - 1.1.2 Compare data of current actual coverage against a previous time period to establish an indicative trend in terms of rate of uptake and associated output.
 - 1.1.3 Compare output by land use (e.g. residential, commercial, industrial, agricultural and utility areas)
 - 1.1.4 Comment on potential impact, challenges and opportunities in terms of the City's financial sustainability and anticipated future revenue (i.e. bulk costs and sale of electricity).

2. OBJECTIVE

This is a Request for Quotation (RFQ) to procure a solar spatial and statistic analytic dataset(s) which will enable internal COJ researchers to conduct an analysis in order to successfully fulfil the research objectives outlined above.

3. DELIVERABLES

The solar spatial and statistic dataset should provide information related to solar energy and spatial distribution of actual solar installation coverage in Johannesburg. The data should be available per Enumerator Area (EA) polygon and cover all EAs within the City of Johannesburg and should therefore be aggregateable to other administrative boundaries. The data should be derived from satellite imagery based on machine learning and data modelling scripts. All dominant high-income residential areas, in Neighbourhood Lifestyle Index (NLI) or Lifestyle Standard Measure (LSM) 7-10, in the city should be completed and immediately available for delivery. EAs containing other NLI or LSM between 1 and 6 for residential areas, should be completed and delivered within 1 month of the Purchase Order (PO) being issued. Solar data for EAs of other landuse types, e.g. commercial, industrial, schools, etc. should be immediately available.

¹ while noting and considering the various conditions that may limit maximum output; such as weather/radiation/building orientation, capital outlay required/LSM/NLI of households, and grid capacity and storage constraints.

The data should contain variables such as the number of buildings with solar, number of households with solar, total kw output index, index for solar uptake potential, total kw output index per land use and index for solar uptake potential per land use among others. The data should be up to date for 2023.

The solar spatial and statistic analytic dataset(s) to be provided by the service provider should include:

- Current (2023) solar analytics information including spatialised Kw output index per land use
- Temporal Solar Analytics Data 2019² versus 2023
- Data to be provided in Excel format,³ inclusive of spatial identifier: e.g. Enumerated Area (EA) and/ or coordinates
- Access to a map viewer/ web interface version of the data
- Supply of additional spatial GIS data files format to be quoted

4. SCOPE OF WORK

- Provision of relevant existing analysis;
- Provision of supplementary datasets with additional information on households that install solar (neighbourhood lifestyle index (NLI) or LSM, socio-economic/ environmental risks profiles, etc.).
- Upgrades and/or updates to the dataset during the contract period;

5. TIME FRAME

In accordance with the Municipal Cost Containment Regulations (2019) the successful bidder will be appointed on a time and cost basis with specific start and end dates;

5.1 The duration for delivery will be thirty (30) days.

5.2 The full suite of data should be delivered to the CoJ within thirty (30) days of the Purchase Order being signed and collected.

5.3 The CoJ will make use of the dataset until 30 June 2024. All procured datasets must remain serviceable and accessible to the CoJ within this period, at least.

MBD9: CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

in response to the invitation for the bid made by:

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

10.
