**Subject: T&SS Procurement of Empty 210 L Steel Oil Drums. (white and Blue, close top/open top)**

### **1 INTRODUCTION**

T&SS is an essential and strategic link in the service provision of Eskom, who has the responsibility to operate and maintain an ever-increasing fleet of generation, transmission, and distribution assets. T&SS provides essential and strategic repair, maintenance, refurbishment, and related engineering services, both on site as well as at our workshop facility in Rosherville. The Empty Steel Oil Drums will be used for the transporting, and storage of transformer oil. Our Oil depot requires enabling contract of empty drums to execute more projects efficiently.

### **2 SCOPE OF WORK**

We require the supply, and delivery of steel oil drums as required by oil depot. This will be done via a four-year contract. This will include delivery to Rosherville T&SS Oil Depot. The steel oil drums shall be capable of storing Transformer Oil at the temperature ranging from 0 degrees Celsius to 100 degrees Celsius.
