#### C.3.10 Clarification of a tender offer

Obtain clarification from a tenderer on any matter that could give rise to ambiguity in a contract arising from the tender offer.

#### C.3.11 Evaluation of tender offers

The Standard Conditions of Tender standardize the procurement processes, methods and procedures from the time that tenders are invited to the time that a contract is awarded. They are generic in nature and are made project specific through choices that are made in developing the **Tender Data** associated with a specific project.

Conditions of tender are by definition the document that establishes a tenderer's obligations in submitting a tender and the employer's undertakings in soliciting and evaluating tender offers. Such conditions establish the rules from the time a tender is advertised to the time that a contract is awarded and require employers to conduct the process of offer and acceptance in terms of a set of standard procedures.

The CIDB Standard Conditions of Tender are based on a procurement system that satisfies the following system requirements:	
Requirement	Qualitative interpretation of goal
Fair	The process of offer and acceptance is conducted impartially without bias, providing simultaneous and timely access to participating parties to the same information.
Equitable	Terms and conditions for performing the work do not unfairly prejudice the interests of the parties.
Transparent	The only grounds for not awarding a contract to a tenderer who satisfies all requirements are restrictions from doing business with the employer, lack of capability or capacity, legal impediments and conflicts of interest.
Competitive	The system provides for appropriate levels of competition to ensure cost effective and best value outcomes.
Cost effective	The processes, procedures and methods are standardized with sufficient flexibility to attain best value outcomes in respect of quality, timing and price, and least resources to effectively manage and control procurement processes.

The activities associated with evaluating tender offers are as follows:

- Open and record tender offers received
- Determine whether or not tender offers are complete
- Determine whether or not tender offers are responsive
- Evaluate tender offers
- Determine if there are any grounds for disqualification
- Determine acceptability of preferred tenderer
- Prepare a tender evaluation report
- Confirm the recommendation contained in the tender evaluation report .

<p><b>C.3.11.1 General</b></p> <p>The employer must appoint an evaluation panel of not less than three persons conversant with the proposed scope of works to evaluate each responsive tender offer using the tender evaluation methods and associated evaluation criteria and weightings that are specified in the <b>Tender Data</b>.</p>	<p><b>C.3.14 Prepare contract documents</b></p> <p>C.3.14.1 If necessary, revise documents that shall form part of the contract and that were issued by the employer as part of the tender documents to take account of:</p> <ul style="list-style-type: none"> <li>a) addenda issued during the tender period,</li> <li>b) inclusion of some of the returnable documents and</li> <li>c) other revisions agreed between the employer and the successful tenderer.</li> </ul>
<p><b>C.3.12 Insurance provided by the employer</b></p> <p>If requested by the proposed successful tenderer, submit for the tenderer's information the policies and / or certificates of insurance which the conditions of contract identified in the <b>Contract Data</b>, require the employer to provide.</p>	<p>C.3.14.2 Complete the schedule of deviations attached to the form of offer and acceptance, if any.</p>
<p><b>C.3.13 Acceptance of tender offer</b></p> <p>Accept the tender offer; if in the opinion of the employer, it does not present any risk and only if the tenderer:</p> <ul style="list-style-type: none"> <li>a) is not under restrictions, or has principals who are under restrictions, preventing participating in the employer's procurement;</li> <li>b) can, as necessary and in relation to the proposed contract, demonstrate that he or she possesses the professional and technical qualifications, professional and technical competence, financial resources, equipment and other physical facilities, managerial capability, reliability, experience and reputation, expertise and the personnel, to perform the contract;</li> <li>c) has the legal capacity to enter into the contract;</li> <li>d) is not; insolvent, in receivership, under Business Rescue as provided for in chapter 6 of the Companies Act No. 2008, bankrupt or being wound up, has his/her affairs administered by a court or a judicial officer, has suspended his/her business activities or is subject to legal proceedings in respect of any of the foregoing;</li> <li>e) complies with the legal requirements, if any, stated in the <b>Tender Data</b>; and</li> <li>f) is able, in the opinion of the employer, to perform the contract free of conflicts of interest.</li> </ul>	<p><b>C.3.15 Complete adjudicator's contract</b></p> <p>Unless alternative arrangements have been agreed or otherwise provided for in the contract, arrange for both parties to complete formalities for appointing the selected adjudicator at the same time as the main contract is signed.</p>
	<p><b>C.3.16 Registration of the award</b></p> <p>An employer must, within twenty-one (21) working days from the date on which a contractor's offer to perform a construction works contract is accepted in writing by the employer, register and publish the award on the cidb Register of Projects.</p> <p><b>C.3.17 Provide copies of the contracts</b></p> <p>Provide to the successful tenderer the number of copies stated in the <b>Tender Data</b> of the signed copy of the contract as soon as possible after completion and signing of the form of offer and acceptance.</p> <p><b>C.3.18 Provide written reasons for actions taken</b></p> <p>Provide upon request written reasons to tenderers for any action that is taken in applying these conditions of tender but withhold information which is not in the public interest to be divulged, which is considered to prejudice the legitimate commercial interests of tenderers or might prejudice fair competition between tenderers.</p>

## T2.2.9 MBD 9: CERTIFICATE OF INDEPENDENT BID DETERMINATION

### NOTES

- <sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.
- <sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
- <sup>3</sup> Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

- 1.0 This Municipal Bidding Document (MBD) must form part of all **bids**<sup>1</sup> invited.
- 2.0 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or **bid rigging**).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3.0 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4.0 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid rigging.
- 5.0 In order to give effect to the above, the below **Certificate of Independent Bid Determination** must be completed and submitted with the bid.

## PART C3: SCOPE OF WORK

	<u>PAGE</u>
<b>C3.1 PROJECT DESCRIPTION AND SCOPE OF CONTRACT</b>	<b>98</b>

### **C3.1 BACKGROUND**

The Waterpark, commonly known as Wet 'n Wild, is one of the main attractions at uShaka Marine World. The Waterpark Pools and Slides are maintained and operated by means of Centrifugal Pumps coupled to Inductive Motors, which currently operate at a constant speed.

#### **Objective:**

To contribute to the onsite energy saving initiatives, the use VSDs (Variable Speed Drives) were considered for Pump application/s at the Waterpark. In addition to the energy saving potential brought about by the VSDs, the use of VSDs on the identified Pump Motors will also aid in process control, mechanical longevity of equipment, and energy demand management.

This Scope of Work defines the tasks, responsibilities, and deliverables required for the successful installation, automation, and commissioning of the New VSDs. The installation shall adhere strictly to the requirements outlined in the Technical Specification for VSD Installation detailed in Section C2.2 and Section C2.3.

The Service Provider is responsible for all activities necessary to achieve a fully operational VSD system, including, but not limited to, the following:

- Pre-Installation and Planning
- Installation and Wiring
- Automation
- Commissioning and Testing
- Project Closeout and Handover

#### **Automation and Control:**

A brief overview of the VSD control philosophy is as follows;

- The VSD shall be operated by means of Local and Remote Control
- The VSD shall be operated by means of an external Stop and Start Button
- At any given time, the VSD shall be de-energised by means of an external Emergency Stop command
- Local Control shall override all installed field devices and provide the operator with full control over the operation of the VSD
- Remote Control will enable the VSD to be ramped up and down by means of a digital input from the installed Through Beam Sensors (field devices)

- During 'Idle' Remote Operation, the VSD shall operate the Motor at a Predetermined Idle Speed (this speed must be adjustable by the operator, but password protected)
- When the Through Beam Sensor is triggered, the VSD must Ramp Up within 5 Seconds, increasing the speed of the Motor to a Second Predetermined Speed (this speed must be adjustable by the operator, but password protected)
- After 10 minutes of operation at the Second Predetermined Speed, the Motor must automatically Ramp Down to its Idle Speed, and remain at its Idle Speed until the Through Beam Sensor is triggered again.
