

## QUESTIONS AND ANSWERS MWP2998GX

1. With reference to the above-mentioned tender if our medical items do not require cold chain storage during transit and we do not have an appointed Pharmacist as the company does not require one, will we be penalised in terms of Step 2 - Functionality (Mandatory Technical Evaluation Criteria)?

For us to be sure that we get proper product as per our orders and specifications there must be someone in a form of a pharmacist to make sure that all the requirements are met. Some medicine products need to maintain a certain temperature (cold chain) for it to be effective. If they lose their coldness they will lose their efficacy.

2. I just wanna find out in terms of supplying medical consumables and oxygen, don't you guys require suppliers to have a SAHPRA CERTIFICATE

For pharmaceutical wholesale and distribution one need to be registered with South African Pharmacy Council and yes with SAHPRA also as a regulatory body.
