Any prospective bidders seeking to arrange individual meetings with the Contracting Authority during the bid period may be excluded from the bid procedure.

Any clarification of the bid dossier will be communicated simultaneously in writing to all bidders at the latest 11 calendar days before the deadline for submission of bids. No further clarifications will be given after this date.

Visits by individual prospective bidders during the bid period are not permitted other than the site visit for good reasons.

6. Submission of Bids

Bids must be submitted in English such that they are received before the deadline specified in the letter of invitation to bid.

Any infringement of these rules (e.g., unsealed envelopes) is to be considered a breach of the rules, and will lead to rejection of the bid.

The envelope should carry the following information:

- a) The address for submission of bid indicated above.
- b) The reference code of the bid procedure to which the bidder is responding.
- c) The words "Not to be opened before the bid opening sessions".
- d) The pages of the Technical and Financial offers must be numbered.

7. Alterations or Withdrawal of Bids

Bidders may alter or withdraw bids by written notification prior to the deadline for submission of bids. No bid may be altered after this deadline.

The envelope must be marked "Alteration" or "Withdrawal" as appropriate.

8. Costs for preparing Bids.

No costs incurred by the bidder in preparing and submitting the bid shall be reimbursable. All such costs shall be borne by the bidder including interviews of the proposed key members if required.

9. Ownership of Bids

The Contracting Authority retains ownership in all bids received (this excludes intellectual property for all but the successful bidder) under this tendering procedure. Consequently, bidders have no right to have their bids returned to them.

10. Evaluation of bids

a. Evaluation of technical offers

The quality of each technical offer will be evaluated in accordance with the evaluation criteria and the associated weighting as detailed in this bid dossier. No other award criteria will be used. The evaluation criteria will be examined in accordance with the requirements as indicated in the Terms of Reference.

b. Presentations / Adjudication

The Evaluation Committee may call for presentation by the short-listed bidders, after having established its written provisional conclusions but before concluding the technical evaluation.

The date and time of any such presentation will be confirmed or notified to the short-listed bidders at least seven days in advance. If a bidder is prevented from attending presentation by force majeure, a mutually convenient alternative appointment may be arranged with the bidder. If the bidder is unable to attend this second appointment, its bids will be eliminated from the evaluation process.

c. Evaluation of financial offers

The Financial Offer will be evaluated after the Technical Offer, if technical offers scored less than 60% the financial offer will not be considered.

d. Confidentiality

The entire evaluation procedure, from the drawing up of the shortlist to the signature of the contract, is confidential. The Evaluation / Adjudication Committee's decisions are collective, and its deliberations are held in closed session. The members of the Evaluation / Adjudication Committee are bound to secrecy.

The evaluation reports and written records, in particular, are for official use only and may not be communicated to neither the bidders nor to any party other than the Contracting Authority.

11. Ethics clauses / Corruptive practices

- a) Any attempt by a bidder to obtain confidential information, enter into unlawful agreements with competitors or influence the Evaluation/Adjudication Committee or the Contracting Authority during the process of examining, clarifying, evaluating, comparing and adjudication bid will lead to the rejection of its bid and may result in administrative penalties.
- b) The bidder must not be affected by any potential conflict of interest.
- c) The Greater Kokstad Municipality reserves the right to suspend or cancel funding to this project if corrupt practices of any kind are discovered at any stage of the award process or during the implementation of a contract, if the Contracting Authority fails to take all appropriate measures to remedy the situation. For the purposes of this provision, "corrupt practices" are the offer of a bribe, gift, gratuity or commission to any person as an inducement or reward for performing or refraining from any act relating to the award of a contract or implementation of a contract already concluded with the Contracting Authority.
- d) Bids will be rejected, or contracts terminated if it emerges that the award or execution of a contract has given rise to unusual commercial expenses. Such unusual commercial expenses are commissions not mentioned in the main contract or not stemming from a properly concluded contract referring to the main contract, commissions not paid in return for any actual and legitimate service, commissions paid to a payee who is not clearly identified, or commissions paid to a company which has every appearance of being a front company.

Failure to comply with one or more of the ethics clauses may result in the exclusion of the bidder or contractor from other Community contracts and in penalties.

12. Documentary evidence required from the successful Bidder.

The successful bidder will be informed in writing that its bid has been accepted (notification of award). Before the Contracting Authority signs the contract with a successful bidder, a successful bidder may be requested to provide additional information as deemed necessary by the Contracting Authority.

This evidence or these documents must carry a date, which cannot be more than 180 days in relation to the deadline for the submission of the bidder. In addition, a sworn statement shall be furnished stating that the situations described in these documents have not changed since then.

If the successful bidder fails to provide these documents or is found to have provided false information, the award will be considered null and void. In such a case, the Contracting Authority may award the bid to another bidder or cancel the bid procedure.

13. Signature of contract(s)

Within 7 days of receipt of the contract already signed by the Contracting Authority, the selected bidder shall sign and date the contract and return it to the Contracting Authority.

Failure of the selected bidder to comply with this requirement may constitute grounds for the annulment of the decision to award the contract. In such a case, the Contracting Authority may award the bid to another bidder or cancel the bid procedure.

The other candidates will be informed that their bids were not accepted, by means of a standard letter.

14. Cancellation of the Bids procedure

In the event of cancellation of the bid procedure, bidders will be notified of the cancellation by the Contracting Authority. If the bid procedure is cancelled before the envelopes of any bid has been opened, the unopened and sealed envelopes will be returned to the bidders.

15. Cancellation may occur when:

- The bid procedure has been unsuccessful, i.e., no qualitatively or financially worthwhile bid has been received or there is no response at all;
- The economic or technical data of the project have been fundamentally altered.
- Exceptional circumstances or *force majeure* render normal performance of the contract impossible.
- All technically compliant bids exceed the financial resources available.
- There have been irregularities in the procedure, in particular where these have prevented fair competition.

In no event shall the Contracting Authority be liable for any damages whatsoever including, without limitation, damages for loss of profits, in any way connected with the cancellation of a bid even if the Contracting Authority has been advised of the possibility of damages.

The publication of a procurement notice does not commit the Contracting Authority to implement the program or project announced.

F.2.18.1 Provide, on request by the Employer, any other material that has a bearing on the bid offer, the bidder's commercial position (including notarized joint venture agreements), preferencing arrangements, or samples of materials, considered necessary by the Employer for the purpose of a full and fair risk assessment. Should the bidder not provide the material, or satisfactory reason as to why it cannot be provided, by the time for submission stated in the Employer's request, the Employer may regard the bid offer as non-responsive *and may invoke the same remedy for potential additional costs as provided for under special condition F.2.17.3.*

F.2.18.2 *Accept the Employer's right, at his sole discretion, to appoint suitably qualified persons to report on the financial resources, standing with the South African Revenue Services regarding all taxes, management structure and ownership details of any tenderer and/or to verify the correctness of any information furnished to the Employer in terms of condition F.2.17.1. Comply with the Employer's request within the time stated in the request. F.3.2 Issue Addenda

If necessary, issue addenda that may amend or amplify the tender documents to each tenderer during the period from the date of the Bid Notice until seven days before the tender closing time stated in the Bid Data. If, as a result a bidder applies for an extension to the closing time stated in the Bid Data, the Employer may grant such extension and, will then notify it to all bidders who drew bid documents.

F.3.3 Return of bid offers

Return bid offers *withdrawn in terms of F.2.13.9* or received after the closing time stated in the Bid Data, unopened, (unless it is necessary to open a bid submission to obtain a forwarding address), to the bidder concerned.

F.3.4 Opening of bid submissions

F.3.4.1 Unless the two-envelope system is to be followed, open valid bid submissions in the presence of bidders' agents who choose to attend at the time and place stated in the Bid Data. Bid submissions for which acceptable reasons for withdrawal have been submitted will not be opened.

F.3.4.2 Announce at the opening held immediately after the opening of bid submissions, at a venue indicated in the Bid Data, the name of each bidder whose bid offer is opened, the total of his prices, preferences claimed and time for completion, if any, for the main bid offer only.

F.3.4.3 Make available the record outlined in F.3.4.2 to all interested persons upon request.

F.3.5 Two-envelope system

F.3.5.1 Where stated in the Bid Data that a two-envelope system is to be followed, open only the technical proposal of valid bids in the presence of bidders' agents who choose to attend at the time and place stated in the Bid Data and announce the name of each bidder whose technical proposal is opened.

F.3.5.2 Evaluate the quality of the technical proposals offered by bidders, then advise bidders who remain in contention for the award of the contract of the time and place when the financial proposals will be opened. Open only the financial proposals of bidders, who score in the quality evaluation more than the minimum number of points for quality stated in the Bid Data, and announce the total price and any preferences claimed. Return unopened financial proposals to bidders whose technical proposals failed to achieve the minimum number of points for quality.

F.3.6 Non-disclosure

Not disclose to bidders, or to any other person not officially concerned with such processes, information relating to the evaluation and comparison of bid offers, the final evaluation price and recommendations for the award of a contract, until after the award of the contract to the successful bidder.

F.3.7 Grounds for rejection and disqualification

F.3.7.1 Determine whether there has been any effort by a bidder to influence the processing of bid offers and instantly disqualify a bidder (and his bid offer) if it is established that he engaged in corrupt or fraudulent practices. *In addition, any such disqualification shall entitle the Employer, at its sole discretion, to impose a specified period during which bid offers will not be accepted from the offending bidder.*

F.3.7.2 *Communicate to other state bid boards, provincial bid boards or parastatal bid boards any bidder disqualified in terms of special condition F.3.7.1.*

F.3.7.3 *Consider rejecting any bid offers received from bidders who are involved in any form of litigation or legal proceedings by or against the Employer.*

F.3.8 Test for responsiveness.

Determine, on opening and before detailed evaluation, whether each bid offer properly received:

- a) meets the requirements of these Conditions of Bid,
- b) has been properly and fully completed and signed, and
- c) is responsive to the other requirements of the bid documents.

A responsive bidder is one that conforms to all the terms, conditions and specifications of the bid documents without material deviation or qualification. A material deviation or qualification is one which, in the Employer's opinion, would:

- detrimentally affect the scope, quality, or performance of the works, services or supply identified in the Scope of Work,
- change the Employer's or the bidder's risks and responsibilities under the contract, or
- affect the competitive position of other bidders presenting responsive bids, if it were to be rectified.

Reject a non-responsive bid offer, and not allow it to be subsequently made responsive by correction or withdrawal of the non-conforming deviation or reservation.

F.3.9 Arithmetical errors and imbalanced unit rates

Check responsive tender offers for arithmetical errors, correcting them in the following manner:

- Where there is a discrepancy between the amounts in figures and in words, the amount in words shall govern.
- If a pricing schedule (or schedule of quantities or schedule of rates) applies and there is an error in the line-item total resulting from the product of the unit rate and the quantity, the *unit rate* shall govern, and the *line item* shall be corrected. *However, where* there is an obviously gross misplacement of the decimal point in the unit rate, the unit rate will be corrected.
- Where there is an error in the total of the prices either because of other corrections required by this checking process or in the bidder's addition of prices, the total of the prices shall *be corrected*.

Check responsive bid offers for imbalanced unit rates and request bidders to consider amending and adjusting any rates declared imbalanced by the Employer while retaining the total of the prices derived after any correction made in terms of this condition to bid.

Consider the rejection of a bid offer if the bidder does not correct or accept the correction of his arithmetical errors *or amend/adjust an imbalanced unit rate* in the manner described above.

F.3.10 Clarification of a bid offer

Obtain clarification from a bidder on any matter that could give rise to ambiguity in a contract arising from the bid offer.

F.3.11 Evaluation of bid offers

F3.11.1 General

Appoint an evaluation panel of not less than three *duly qualified* persons. Reduce each responsive bid offer to a comparative offer and evaluate it using the bid evaluation method that is indicated in the Bid Data and described below.

Method 1: Financial offer	1) Rank bid offers from the most favourable to the least favourable comparative offer. 2) Recommend highest ranked bidder for the award of the contract unless there are compelling and justifiable reasons not to do so.
Method 2: Financial offer and preferences	1) Score bid evaluation points for financial offer. 2) Confirm that bids are eligible for the preferences claimed and if so, score bid evaluation points for preferencing. 3) Calculate total bid evaluation points. 4) Rank bid offers from the highest number of bid evaluation points to the lowest. 5) Recommend bidder with the highest number of bid evaluation points for the award of the contract, unless there are compelling and justifiable reasons not to do so.
Method 3: Financial offer and quality	1) Score quality, rejecting all bids offers that fail to score the minimum number of points for quality stated in the Bid Data. 2) Score bid evaluation points for financial offer. 3) Calculate total bid evaluation points. 4) Rank bid offers from the highest number of bid evaluation points to the lowest. 5) Recommend bidder with the highest number of bid evaluation points for the award of the contract, unless there are compelling and justifiable reasons not to do so.
Method 4: Financial offer, quality and preferences	1) Score quality, rejecting all bids offers that fail to score the minimum number of points for quality stated in the Bid Data. 2) Score bid evaluation points for financial offer. 3) Confirm that bidders are eligible for the preferences claimed, and if so, score bid evaluation points for preferencing. 4) Calculate total bid evaluation points. 5) Rank bid offers from the highest number of bid evaluation points to the lowest. 6) Recommend bidder with the highest number of bid evaluation points for the award of the contract, unless there are compelling and justifiable reasons not to do so.

Score financial offers, preferences, and quality, as relevant, to two decimal places.

F.3.11.2 Scoring Financial Offers

Score the financial offers of remaining responsive bid offers using the following formula:

N_{FO} = $W_1 \times A$ where:
 N_{FO} = the number of bid evaluation points awarded for the financial offer.
 W_1 = the maximum possible number of tender evaluation points awarded for the financial offer as stated in the Bid Data.
 A = a number calculated using either formulas 1 or 2 below as stated in the Bid Data.

Formula	Comparison aimed at achieving	Option 1	Option 2
1.	Highest price or discount	$A = (1 + \frac{(P - P_m)}{P_m})$	$A = P/P_m$
2.	Lowest price or percentage commission/fee	$A = (1 - \frac{(P - P_m)}{P_m})$	$A = P_m/P$

Where:

P_m = the comparative offer of the most favourable bid offer.
 P = the comparative offer of bid offer under consideration.

F.3.11.3 Scoring quality (functionality)

Score quality in each of the categories stated in the Bid Data and calculate total score for quality.

F.3.11.4 Scoring preference

Score preferences claimed in the responsive bids offered according to the method stated in the Bid Data.

F.3.11.5 Scoring total quality, financial and preference offers

Score total of the quality, financial and preference offers in accordance with method 4 of clause F.3.11.1.

F.3.12 Insurance provided by the Employer.

If requested by the proposed successful bidder, submit for the bidder's information the policies and / or certificates of insurance which the Conditions of Contract identified in the Contract Data, require the Employer to provide.

F.3.13 Acceptance of bid offer

F.3.13.1 Accept bid offer only if the bidder satisfies the requirements stated in the Bid Data, *including the legal requirements.*

F.3.13.2 Notify the successful bidder of the Employer's acceptance of his bid offer by completing and returning one copy of the form of offer and acceptance before the expiry of the validity period stated in the Bid Data or agreed additional period. Providing the form of offer and acceptance does not contain any qualifying statement, it will constitute the formation of a contract between the Employer and the successful bidder as described in the form of offer and acceptance.

F.3.15 Prepare contract documents.

If necessary, revise documents that shall form part of the contract and that were issued by the Employer as part of the bid documents to take account of:

- a) addenda issued during the bid period,
- b) inclusion of some of the returnable documents,
- c) other revisions agreed between the Employer and the successful bidder, and
- d) the schedule of deviations attached to the form of offer and acceptance, if any.

F.3.16 Issue final contract.

Prepare and issue the final draft of contract documents to the successful bidder for acceptance as soon as possible after the date of the Employer's signing of the form of offer and acceptance (including the schedule of deviations, if any). Only those documents that the Conditions of Bid require the bidder to submit, after acceptance by the Employer, shall be included.

F.3.17 Complete adjudicator's contract

Unless alternative arrangements have been agreed or otherwise provided for in the contract, arrange for both parties to complete formalities for appointing the selected adjudicator at the same time as the main contract is signed.

F.3.18 Provide copies of the contracts

Provide to the successful bidder the number of copies stated in the Bid Data of the signed copy of the contract as soon as possible after completion and signing of the form of offer and acceptance.

F.3.19 Delegation of authority

The Employer may delegate any power vested in him by virtue of these Conditions of Bid to an officer or employee of the Employer, provided that such delegation shall be in writing setting out the general or specific powers delegated.

T2.1.6. CERTIFICATE OF INDEPENDENT BID DETERMINATION (MBD 9)

1. This document (MBD 9) forms part of all *bids invited.
 2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding or *bid rigging. Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.
 3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the Greater Kokstad Municipality or municipal entity or has committed any improper conduct in relation to such system: and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
 4. This MBD serves as a certificate of declaration that would be used by Institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
 5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid.
- * all bids: includes price quotations, advertise competitive bids, limited bids and proposals
- * Bid rigging (or collusive bidding) occurs when business, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to complete.

C3.1.2.7. Backfilling

In trenches containing one or more medium voltage cables the approved fill material must be placed in the trench. Should the project specification require a layer of protective concrete slabs or plastic warning tape, this must cautiously be centred over the medium voltage cable after the first layer of approved uncompressed fill material.

C3.1.2.8. **Transport of Cable Drums**

Cable drums must be carefully transported to prevent damage to the cables and to prevent disturbing the cables. Damaged cables will be rejected. Drums may not be off-loaded by simply allowing them to roll off the back of the truck onto the ground. Drums may only be rolled in the direction as indicated by the arrow painted on the drum by the manufacturer. (This will ensure that the correct tension is maintained and prevent the cable from damage later). Every drum may only have one cable length on it. Proper attention must be given to where the drums are to be off-loaded in order to prevent unnecessary moving thereof, eg. at joint locations.

C3.1.2.9. **Handling of Drums on Site**

Note: It is recommended that a correctly designed spreader must be used to load and unload the drums with a crane.

Every drum must be mounted on jacks or on a cable-drum trailer with a horizontal supporting beam of suitable size and strength to handle the width and weight of the drum. The drum may not be allowed to rotate freely when the cable is rolled off. (Free rotation causes the cable to twist and loosen the windings, which can cause the inside armouring/insulation of the cable to be stretched). The cable must enter the trench from the top of the reel. All cables ends including that left on the drum or in a trench must be sealed to prevent the penetration of moisture into the cable. The free cable end on the drum must be fastened to the side of the drum.

C3.1.2.10. **Pulling of Conductors**

The conductor may be pulled by hand or by a wrench, but the maximum tension in the conductor as specified by the manufacturer, may not be exceeded. A conductor grip must be used to pull the conductor, but if specified by the project specification, while connecting cables a loop connected to the cable cores and sheathing must be used. A twist connection must be used between the loop and the rope used to pull the cable. In cases where cables have to be drawn around corners, well lubricated skid-plates or special corner rollers must be used. Skid-plates and rollers must be firmly secured and must be inspected regularly throughout the cable laying process to ensure that they work properly.

C3.1.2.11. **Ambient Temperatures during Cable Laying**

A cable may not be installed at an ambient temperature that:

a) in the case of paper insulated cables, is lower than 10 °C; OR

b) in the case of PVC-insulated cables, is lower than 0 °C.

In situation where the ambient temperature is continuously at a low a temperature, the cable may be installed, with the written approval of the Engineer. Special arrangements are made to keep the cable temperature above the minimum temperature for at least 24 hours before installation.

C3.1.2.12. **Cable Bends**

No cable bend may have a smaller radius than the minimum radius specified by the cable manufacturer. This radius shall never be less than the radius prescribed by the relevant SABS specification.

C3.1.2.13. **Electrical Tests**

Acceptance tests must consist of the following.

a) Phase identification test

A test must be done to determine if the connections between the end points are correct. All cables must be phased out before connected to the switchgear.

- b) Certificate of compliance should be filled in to detail based on the test done while commissioning.

All medium voltage cables with a rated voltage of up to 22 000 V must be tested according to SABS 540 at the applicable voltages given in table 4 of SABS 97.

The results of tests (b) above must be noted down on test certificates and special attention must be given to thoroughly note down any leakage current during the test in (b) above.

C3.1.2.14. Electrical Ground point or Earthing

Earthing must be done in compliance with SANS 10142-1 and SANS 10142-2 "The Wiring of Premises". The earth mat must be 1.0 m x 1.0 m (minimum) constructed from 70mm² solid copper conductor with 100mm grid spacing, connected to the power supply earth bar. Earth rods will be installed at the four corners, if the measured resistances do not meet the earthing requirements. All equipment shall be earthed with 50 x 3mm copper bars to the earth bar.

C3.1.3. COMPLIANCE WITH ACT

The complete installation shall be in accordance with the Occupational Health and Safety Act (Act 85, 1993). The Contractor's attention is drawn to the requirements of SANS 10142 Part 2 and the Contractor must have a registered person in employment to act as his Engineer and sign off the required documentation.

C3.1.3.1. Testing

The Engineer shall test the electrical equipment in the factory and all equipment necessary to test the performance and operation of the equipment must be provided. The detailed test procedures and requirements are given in the relevant sections.

After completion of the installation and putting into proper operation of the substation, the Contractor will be required to make suitable arrangements for the testing of the switchgear supplied under this contract, in the presence of the Engineer or his representative, so as to determine whether they are in compliance with the guaranteed figures submitted by the Contractor. The installation must be in operation for at least a week before this handing over inspection will take place.

Before the Engineer is called to witness any testing, in the factory or on site, the Contractor must test/commission the equipment/installation on his own. In the case of commissioning, the results of the commissioning must be handed to the Engineer prior to the taking over inspection. The Contractor must submit his commissioning reporting format to the Engineer for comment/approval and the Engineer must accept the completed report with commissioning results before arrangements for hand-over inspection will be made.

The contractor must make provision in his pricing for these factory tests, commissioning tests, as well as the hand-over tests.

C3.1.4. DRAWINGS

C3.1.4.1. Drawings

The drawings submitted to tenderer is for information purposes only but not limited to. The Contractor will have to price in their tender submission pricing to undertake the design drawings for construction purposes in MicroStation drawing format including retic master voltage drop simulation studies unless otherwise stated by the Client/ Engineer. All the information produced/supplied by the Tenderer/Contractor shall be the intellectual property of the Client. All drawing information shall be supplied to the Engineer in Microstation drawing dgn format version V8i and the voltage drop simulation studies in retic master format in version

22. The pricing shall also include any necessary survey works in picking the existing infrastructure on site including any field work and any other design work required to produce the above-mentioned required info for Construction and as per Engineer's requirements.

C3.1.5. AS-BUILT DRAWINGS AND INFORMATION

All information in possession of the contractor that is required by the Engineer in order to complete the as-built drawings (A0 colour hard copies x 3 sets with back ground image, soft drawings in pdf and Microstation drawing dgn format), all test certificates, inspections & quality checking info as per Eskom & Client requirements and to prepare a completion report for the employer must be submitted to the Engineer before a Certificate of Practical Completion will be issued for the works.

C3.2. PROCUREMENT

C3.2.1. SUB-CONTRACTING

As required by Clause 8 - 4 of the Conditions of Contract, the contractor shall be responsible for all work carried out by sub-contractors (whether nominated by the employer or selected by the contractor) on his behalf. The engineer will not liaise directly with any sub-contractor, nor will he become involved in any problems and / or disputes related to payments, programming, workmanship etc, unless provided for in the Conditions of Contract. Such problems and / or disputes shall remain the sole concern of the contractor and his sub- contractors.

C3.3. CONSTRUCTION

Some of the items in the Schedule of Quantities may not be covered by the Standard Specifications. These items are detailed on the drawings or described in the Schedule of Quantities. The rates tendered must include all labour material etc. No additional payments will be considered.

C3.4. HEALTH AND SAFETY SPECIFICATIONS

C3.4.1. CLIENT RESPONSIBILITIES

The health and safety specifications are prepared to discharge the client's responsibilities in terms of the Occupational Health and Safety Act, Act No. 85 of 1993 (OSHACT) and the attendant regulations. The most noteworthy of these regulations are the Construction Regulations (GNR 1010 of 18 July 2003), the General Administrative Regulations (GNR 929 of 25 June 2003) and the General Safety Regulations (GNR 1031 of 30 May 1986 and subsequent amendments).

A health and safety specification is a documentation of all the health and safety requirements pertaining to the construction works so as to ensure health and safety of affected persons.

In terms of the Construction Regulations attached to the OSHACT the client is responsible for:

- Preparing a documented health and safety specification for the construction work and provide any principal contractor who is making a bid or appointed to perform construction work for the client with the same.
- promptly providing the principal contractor and his or her agent with any information which might affect the health and safety of any person at work carrying out construction work.
- appointing each principal contractor in writing for the project or part thereof on a construction site.
- taking reasonable steps to ensure that each principal contractor's health and safety plan is implemented and maintained on the construction site: Provided that the steps taken shall include periodic audits at intervals mutually agreed upon between the client and principal contractor, but at least once every month.

- stopping any contractor from executing construction work which is not in accordance with the principal contractor's health and safety plan for the site or which poses to be a threat to the health and safety of persons.
- ensuring that where changes are brought about, sufficient health and safety information and appropriate resources are made available to the principal contractor to execute the work safely.
- ensuring that every principal contractor is registered and in good standing with the compensation fund or with a licensed compensation insurer prior to work commencing on site; and
- ensuring that potential principal contractors submitting tenders, have made provision for the cost of health and safety measures during the construction process.

The contractor shall discuss and negotiate with the principal contractor the contents of the health and safety plan and thereafter finally approve the health and safety plan for implementation.

The contractor shall ensure that a copy of the principal contractor's health and safety plan is available on request to an employee, inspector or contractor.

No client shall appoint a principal contractor to perform construction work unless the client is reasonably satisfied that the principal contractor that he or she intends to appoint has the necessary competencies and resources to carry out the work safely.

The client may appoint an agent in writing to act as his or her representative and where such an appointment is made, the responsibilities as are imposed by these regulations upon a client, shall as far as reasonably practicable apply to the person so appointed.

No client shall appoint any person as his agent, unless the client is reasonably satisfied that the person he or she intends to appoint has the necessary competencies and resources to perform the duties imposed on a client by these regulations.

C3.4.2. OCCUPATIONAL HEALTH AND SAFETY SPECIFICATIONS

C3.4.2.1. The purpose of the Occupational Health and Safety Specification

The purpose of the Occupational Health and Safety Specification (OHSS) is to assist contractors to achieve compliance with the Occupational Health and Safety law, in order to reduce incidents and injuries. The OHSS will be implemented during the construction of this project or any construction activity that the Employer has control over.

The OHSS is a performance specification to ensure that the Employer and any bodies that enter into formal agreements with the Employer viz. Agents, Consultants, Principle Contractors and Sub-Contractors achieve an acceptable level of OHS performance. No advice, approval of any document required by the OHSS such as hazard identification and risk assessment action plan or any other form of communication from the Employer shall be construed as an acceptance by the Employer of any obligation that absolves the Contractor from achieving the required level of performance and compliance with legal requirements. Further, there is no acceptance of liability by the Employer which may result from the Contractor failing to comply with the OHSS, i.e. the Contractor remains responsible for achieving the required performance levels.

C3.4.2.2. Implementation of the Occupational Health and Safety Specification

This OHSS forms an integral part of the Contract, and Contractors are required to make it an integral part of their Contracts with Sub-Contractors and Suppliers. It will be disseminated by the Employer to persons responsible for the design of the infrastructure works, who will

ensure that it is included in the Tender Document(s) issued to prospective Contractors. The prospective Contractors shall incorporate the requirements of the OHSS in their submission of tenders to the Employer. Some of the requirements of the OHSS are detailed in Annexure A.

This specification must be read in conjunction with the Occupational Health and Safety Act, Act No 85 of 1993 (as amended), the Regulations as published in Government Notice No R 1010 of 18 July 2003, the General Administrative Regulations as published in Government Notice No R 929 of 25 June 2003, as well as the General Safety Regulations published in Government Notice No. R 1031 of 30 May 1986, as amended. If blasting is to be conducted on site the Explosives Regulations published in Government Notice No. R 109 of 17 January 2003, would become applicable. It is noted that blasting, at the time of tender, will not be required.

These documents are obtainable as one publication entitled "Occupational Health and Safety Act and Regulations, 85 of 1993 (Full Version) Third Edition" published by Lexis Nexis Butterworths, 215 North Ridge Road, Morningside, 4001, Durban, KwaZulu-Natal.

C3.5. ENVIRONMENTAL MANAGEMENT PLAN FOR THE CONSTRUCTION PHASE

C3.5.1. CONSTRUCTION PHASE MANAGEMENT PROGRAMME

The management criteria, objectives and actions are organized in this document according to generic groups of activities that are similar in nature. In reality, some of these may vary with different activities and environmental aspects.

C3.5.1.1. Site Establishment and Method Statements

The Engineer and Contractor shall discuss the site establishment. The Contractor shall plan the site layout and establishment in detail, including the production of a sketch plan showing the construction site layout designed to avoid the impacts discussed further on. This plan must be approved by the Engineer prior to construction commencing. Thereafter, the Contractor shall provide all method statements detailing the construction programme, methods and associated plant. These details must be approved before construction commences. Any changes to a proposed method that could have significant environmental consequences shall be agreed upon with the Engineer first, before proceeding with the change.

The boundaries of each individual active construction areas are to be determined and pegged at the initial site meeting. Since portions of construction will occur in a populated rural area, it is important to ensure that the active construction areas are fenced/barrier taped to prevent unauthorized access to the construction site. Local residents must be informed of the proposed development and the potential dangers associated with the construction i.e. open excavations, wet cement, construction materials. Similarly, construction personnel are to be informed that encroachments into surrounding lands will carry severe penalties.

C3.5.1.2. Transport of Materials, Equipment and Staff to Site

This section of the EMP covers the issues associated with the transport of construction material, equipment and staff to and from the site. The aim of this component of the EMP is to ensure that the transport activities associated with the project do not impact significantly on the environment and the surrounding residents.

- Access to the construction sites will be via existing roads. The contractor will monitor the condition of the road in the vicinity of the construction areas and should the road be damaged due to construction activities, the road will be repaired within two days of detection/complaint/notification.

- Equipment lay-down areas and material storage areas must be discussed and agreed to with the neighboring landowners and specified in the Site Establishment Plan for each individual construction site.
- Lay-down and material storage areas must be located away from the banks of rivers to avoid any contaminated stormwater runoff from entering the rivers. In addition, stormwater diversion berms or cut-off trenches must be constructed around the lay down areas.
- All potentially hazardous materials i.e. fuels, oils and chemicals, will be stored in an acceptable manner. In addition, all hazardous material storage areas will be bunded, with a minimum of sandbags.
- In the event of a spill of construction material, either hazardous or non-hazardous, the material must be contained in an area as small as possible. The split material must then be removed and disposed of in a legally acceptable manner. In the event of hazardous material spillage and cleanup, a safe disposal certificate will be required. In the event of a spill the Engineer must be notified immediately. Drivers will reduce speed and exercise caution due to pedestrians and other road users, especially in the vicinity of the construction site.
- The majority of the construction will take place adjacent to existing roads and, as such are utilized on a regular basis, throughout the day and night, by local residents. The contractor must ensure that the roads adjacent to construction areas are kept clear at all times and not blocked by construction vehicles or equipment. Should a road closure be required during the contract this must be discussed with the Department of Transport and the local community.

C3.5.1.3. Excavation and Storage

This section of the EMP deals with the earthworks to be undertaken during the construction period. The aim of this component of the EMP is to ensure that the area of impact due to construction is minimized and all material excavated during construction is stockpiled in an appropriate manner.

- The area of disturbance for the laying of pipes should be limited to 3m. Where possible woody vegetation must be trimmed back instead of removed and the pipelines must be diverted around large trees. The area of disturbance for construction of the reservoir is to be limited to the minimum extent necessary.
 - The topsoil (top 30mm of the soil) must be excavated and stockpiled separately.
 - The subsoil excavated and stockpiled adjacent to the trench.
- The stockpiles must be positioned away from the banks of rivers and streams to prevent soil-laden run-off from draining directly into the watercourses. Long-term stockpiles must be stabilized to at least a 1:4 slope that are not longer than 20m.
- Any blasting or jackhammer operation will be limited to times when air movement is minimal and site operating hours (at present no blasting is anticipated, however it may be necessary in areas with rocky substrates).
- The flow of water in any river must not be stopped during construction. Any activity requiring a temporary stoppage in the flow of water must be discussed in detail at the preliminary site meeting and a detailed method statement provided. Under normal construction conditions the water must be diverted around the construction site.

- Material that is excavated may either be used in final site rehabilitation or must be disposed at a suitable spoil area. The Contractor, in consultation with the Site Engineer, will identify a suitable spoil area.

C3.5.1.4. **Construction**

This section of the EMP deals with the construction and associated activities on the site. The aim of this component of the EMP to manage all possible impacts that may arise during the construction of the trash trap.

- All activities for construction e.g. concrete production will be located away from riverbanks with cut-off trenches or stormwater diversion berms constructed to ensure that any contaminated run-off does not drain directly into rivers.
- Water required for construction activities may be obtained from the river, however no water for domestic use may be abstracted from the river due to the risk of cholera in the area.
- All waste i.e. construction and general, generated by activities on the site will be disposed of in a waste disposal area to be designated in the Site Establishment Plan. The area is to be equipped with suitable containers i.e. skips or bins, of sufficient capacity. The contents of the skips/bins will be disposed of at a permitted waste disposal facility when they have reached capacity.
- No fires will be allowed on site. All cooking undertaken on the site must be done on gas equipment.
- The Contractor will provide temporary ablution facilities i.e. chemical toilets, for construction workers for the duration of the contract. These toilets must be located away from the river. Workers must be warned that severe penalties will be imposed if they do not utilize the facilities provided.
- The construction site is to be kept neat and tidy i.e. good housekeeping practices to be implemented.

C3.5.1.5. **Site Rehabilitation and Re-vegetation**

This section of the EMP deals with the site rehabilitation and re-vegetation after construction is complete.

- On completion of construction, all unused material and waste must be removed from the site.
- All erosion protection and prevention measures must be implemented as per the design requirements.
- All excavated material not utilized during the rehabilitation process must be disposed of at an appropriate spoil site.
- Disturbed area where construction or related activities have occurred will be re-vegetated, where appropriate. These will be ripped and scarified before rehabilitation commences. The following grassing specification must be used during the re-vegetation of the site:
 - fertilizer - Standard 2:3:3 (N:P:K) fertilizer shall be used on the site
 - - Rate of Application – 200kg/hectare
 - grass seed mix - Eragrostistef (Teff) (5kg/ha)
 - - Eragrostiscurvula (Weeping lovegrass) (10kg/ha)
 - - Chlorisgayana (Rhodes grass) (10kg/ha)

- Contractor Witness 1 Witness 2 Employer Witness 1 Witness 2

C3.5.1.6. **Working Hours**

Portions of the construction site is located within populated rural areas, therefore all activities in the areas will be limited to between 07h00 and 17h00 during weekdays. Any work to be undertaken on weekends will be subject to the standard conditions a laid down in the contract document. These working hours will be strictly enforced and no loitering of Contractor's staff will be allowed after hours, except any security personnel appointed by the Contractor.

Due to the remote location of the site accommodation may be provided. The method for the hiring of labour, if required, will be confirmed during the facilitation process.

C3.5.1.7. **Complaints**

A procedure for lodging of complaints must be established and this must be communicated to the surrounding residents.

- Within 24 hours the Contractor will report to the Project Manager the occurrence or detection of any incident at the site, or incidental to the operation of the site which has the potential to cause, or has caused water pollution of the environment, health risks or nuisance conditions or which is a contravention of the authorization conditions.
- Within 7 working days (or a shorter period of time) from the occurrence or detection of any incident, an action plan will be submitted, with a detailed time schedule giving measures taken to:
 - Correct the impacts of the incident.
 - Prevent the incident from causing any further impacts; and
 - Prevent a recurrence of a similar incident.

An incident report and complaints register is to be kept and made available to the site engineer.

C3.5.1.8. **Compliance with Environmental Specification**

The contractor is deemed not to have complied with the Environmental Specifications if:

- Within the boundaries of the site, site extensions and access roads there is evidence of contravention of clauses.
- Environmental damage occurs due to negligence.
- The contractor fails to comply with corrective or other instructions issued by the Project Manager or Clerk of Works within a specified time period.
- The contractor fails to respond adequately to complaints from the public.

Application of a penalty clause will apply for incidents of non- compliance. The penalty imposed will be per incident. Unless otherwise stated in the project specification, the penalties imposed per incident or violation will be as follows:

<i>Incident/ Violation</i>	<i>Penalty</i>
Failure to stockpile material correctly	R 1 000
Pollution of water bodies	R 3 000
Failure to control stormwater runoff	R 1 500
Failure to provide adequate sanitation	R 3 000

Failure to provide adequate waste disposal facilities and services	R 5 000
Failure to reinstate disturbed areas within specified time period	R 3 000
Failure to rehabilitate disturbed areas within 3 months of completion	R 5 000
Any other contravention of the environmental specification	R 1 000
