The application shall not be submitted later than 7 (seven) working days before the date of tender closing given in Tender Data clause C.2.15, or as extended by an addendum sent to all tenderers.</p> <p>The replacement of specified construction items like pipes, in situ culverts, kerbs and channels with similar products constructed of different materials (e.g. plastic products or pre-cast construction) are generally not acceptable as alternatives because construction using such alternative products would have been considered during the design stage and not selected as appropriate and because the Employer is able, post-award, to make proposals to or receive proposals from the contractor. However, if such alternative materials are considered acceptable by the employer's agent as giving the tenderer a financial advantage and/or not transferring risk, the qualification must be recorded on returnable schedule A4: Schedule of Deviations or Qualifications by Tenderer.</p> <p>Also, not acceptable as alternative offers are the submission of alternative key persons, alterations to contingency pay items provided in the bill of quantities (pricing schedule), fixed prices for individual items or a fixed price contract.</p> <p>If an alternative proposal is confirmed to be acceptable, calculations, drawings and all other pertinent technical information and characteristics as well as proposed modification of, or alternative to, the Pricing Data must be submitted with the alternative tender offer to enable the Employer to evaluate the efficacy of the alternative and its principal elements, to take a view on the degree to which the alternative complies with the Employer's standards and requirements and to evaluate the acceptability of the pricing proposals. Calculations must be set in clear and logical sequence and must clearly reflect all design assumptions. Pricing Data must reflect all assumptions in the development of the pricing proposal.</p> <p>Should an alternative structural design be proposed, the proposed alternative Pricing Data shall include an amount equal to 3% of the amount tendered for the alternative offer to cover the Employer's costs of confirming the acceptability of the detailed design before it is constructed. If the alternative offer is accepted, this amount will serve as a negative prime cost sum under Part C section C1.2 to be deducted from the contractor's payment certificates. The Employer undertakes to provide full accounting of the amount expended for this contingent sum and if exceeded, no further payments shall be deducted. Failure by a tenderer to include the required amount for confirming the alternative design may render his alternative tender as non-responsive.</p> <p>Acceptance of an alternative offer will mean acceptance in principle of the offer. It will be an obligation of the contract with the tenderer, in the event that the alternative is accepted, to accept full responsibility and liability that the alternative offer complies in all respects with the Employer's standards and requirements.</p>

CONTRACT SANRAL R.101-080-2019/1  
FOR THE IMPROVEMENT OF NATIONAL ROAD R101 SECTION 8 FROM BELA BELA (KM 0.0) TO  
MODIMOLLE (KM 26.8)

**Note to Tenderer:**

**The tenderer is required to prepare and submit a site lighting design in the form of a simulation report utilizing the simulation criteria listed below. The design simulation report shall be used by the evaluation panel to determine Luminaire compliance.**

Luminaires should be photometered according to the C-Gamma system as detailed in CIE Publication No. 27. For LED luminaires with non-replaceable LED modules, the intensity values shall be given in candela. The results should be published in an intensity distribution table, indicating the intensity in cd/klm at each horizontal and vertical angle. This intensity distribution table should be converted by an accredited test facility or luminaire supplier (or both) into a suitable electronic format for use with any of the commercially available street lighting computer programs. (Reference clause 7.4 ARP 035:2014).

The Tenderer shall supply an electronic copy of the photometric files (preferred format: ldt/ ies) on Flash drive and a printed copy of the simulation report of the proposed luminaires. Suppliers to also provide brochures detailing the technical specifications of the proposed luminaires.

It is vital that valid and readable photometric files are submitted at time of tender. Valid and readable files will be used to carry out simulation reports to verify paper copy simulation reports submitted.

Photometric files will also be tested by the client to verify that luminaires are compliant. The luminaire simulation report shall be done on any reputable Windows based commercially available streetlighting computer program (the latest DIALux software packages preferred) and submitted in paper copy at time of tender. The simulation results are to comply with the criteria in SANS10098-1:2007.

Only offered luminaires compliant with the minimum requirements will be further considered.

Luminaires are to be suitable for use as per design criteria below. Failure to submit this information may render the Tenderer non-responsive. Proof must be submitted in the simulation report that the photometric files meet either SANS 10098 or CIE Publication minimum requirements.

## **(A) DESIGN CRITERIA**

Maintenance factor of 0.9 (maximum) shall be used in all lighting simulations

*A1 -	Class A1 Roadway, without Median, for speed limits not exceeding 90km/h, and maximum traffic volume of 600 vehicles per hour per lane at night
*A1 -	Class A1 Roadway, with Median, for speed limits not exceeding 90km/h, and maximum traffic volume of 600 vehicles per hour per lane at night

### **NOTE**

- (a) The values apply to straight sections of the road, and to curves and intersections
- (b) The luminance values apply to dry road surfaces of any material
- (c) Ln = Minimum average luminance, cd/m<sup>2</sup>;  
Uo = Overall luminance uniformity, min;  
UL = Longitudinal luminance uniformity, min; and  
TI = Threshold increment, %, max.
- (d) d) Maintenance Factor

The Maintenance Factor of an LED luminaire is to be derived from the product of light source lumen depreciation (LLD), luminaire survival factor (LSF) and luminaire maintenance factor (LMF) i.e.  $MF = LLD \times LSF \times LMF$ .

LLD - Lamp lumen depreciation factor is information provided by the luminaire supplier.

LSF - lamp survival factor. A factor of one (1) to be used for tender purposes.

LMF - luminaire maintenance factor is dependent on the ingress protection of the luminaire, pollution category of the street and the cleaning interval of the luminaire. A clean, in-land environment with a twelve (12) month cleaning cycle to be considered for the dirt depreciation factor for tender purposes.

Maximum maintenance factors referenced are to be adhered to. Note these are maximum values and are NOT default values for all luminaires.

**Maintenance factor of 0.9 (maximum)** shall be used in all lighting simulations issued for tender. Tenderers achieving higher MF values to be submitted for information purposes.

## **(B) LUMINAIRE SPECIFICATION SCHEDULE**

 FOR THE IMPROVEMENT OF NATIONAL ROAD R101 SECTION 8 FROM BELA BELA (KM 0.0) TO  
 MODIMOLLE (KM 26.8)

**Note to Tenderer:**

The information provided for the two tables as requested below, shall be used by the evaluation panel to determine the Life Cycle cost over a fifteen-year period. The total for maintenance (Table 1) shall be added to the total for Installation and energy consumption (Table 2). Use Excel files to calculate, thereafter transfer information onto tables below.

Should the best Life Cycle Costs not be from the lowest offer (price and preference) then the difference between the lowest offer and the offer being considered shall be compared to the best savings offered.

**E6/1: LIFE CYCLE COSTS – TYPE L1 LUMINAIRE (SIM-1 Simulation)**

L1 Costs are to be shown for 1 km of Class A1 Roadway, with a Median, for speed limits exceeding 90km/h, and maximum traffic volume of >600 vehicles per hour per lane at night to SANS 10098 and shall comply with  $L_n \Rightarrow 1.5 \text{cd/m}^2$  ,  $U_o \Rightarrow 0,4$  ,  $U_l \Rightarrow 0,7$  ,  $T_l \Rightarrow <20\%$  for a road width of 22.8m. Mounted on a 18m lighting mast.
