-------------	---

Score financial offers, preferences and quality, as relevant, to two decimal places.

F.3.11.2 Scoring Financial Offers

execution of the Work described in accordance with the provisions of the Scope of Work, and shall cover the cost of all general risks, liabilities, and obligations set forth or implied in the Contract Data, as well as overhead charges and profit. These prices will be used as a basis for assessment of payment for additional Work that may have to be carried out.

6. It will be assumed that prices included in the Bill of Quantities are based on Acts, Ordinances, Regulations, By-laws, International Standards and National Standards that were published 28 days before the closing date for Tenders. Those parts of the contract to be constructed using labour-intensive methods have been marked in the Bills of Quantities with the letters "LI" in a separate column filled in against every item so designated. The works, or parts of the works so designated are to be constructed using labour-intensive methods only. The use of plant to provide such works, other than plant specifically provided for in the scope of work, is a variation to the contract. The items marked with the letters LI are not necessarily an exhaustive list of all the activities which must be done by hand, and this clause does not over-ride any of the requirements in the generic labour intensive specification in the Scope of Works.
13. Payment for items which are designated to be constructed labour-intensively (either in this schedule or in the Scope of Works) will not be made unless they are constructed using labour-intensive methods. Any unauthorised use of plant to carry out work which was to be done labour-intensively will not be condoned and any works so constructed will not be certified for payment.

NB: For pricing of items for which description in the BoQ differs from that of the specifications; the description in the specifications shall take precedence.

CONSTRUCTION OF ABLUTION FACILITIES AT EHLANZENI AND BOHLABELA DISTRICTS OF MPUMALANGA PROVINCE

PART A: GENERAL

PS 1 PROJECT DESCRIPTION

CONSTRUCTION OF ABLUTION FACILITIES AT EHLANZENI AND BOHLABELA DISTRICTS OF MPUMALANGA PROVINCE

The Construction of Ablution Facilities in the Ehlanzeni and Bohlabela Districts of Mpumalanga Province forms part of the Department of Agriculture, Rural Development, Land and Environmental Affairs' (DARDLEA) programme to improve infrastructure at agricultural production sites. The project entails the construction of ablution facilities at selected agricultural gardens across the four districts to provide safe, hygienic and accessible sanitation for farmers, workers and visitors.

Many agricultural gardens currently operate without adequate sanitation infrastructure, exposing users to health and environmental risks while limiting compliance with food safety requirements. The provision of these ablution facilities will support improved hygiene practices, promote occupational health and safety, and enhance the overall working environment within agricultural production areas.

The project is further intended to ensure compliance with the South African Good Agricultural Practices (SAGAP) requirements, which require agricultural producers to provide adequate sanitation and handwashing facilities as part of good agricultural and food safety practices. Compliance with SAGAP improves the marketability of agricultural produce, facilitates access to formal markets, and contributes to sustainable agricultural production.

2. PURPOSE

The Department of Agriculture, Rural Development, Land and Environmental Affairs (DARDLEA) hereby invites prospective bidders for the construction of 36 ablution facilities across various districts in Mpumalanga Province.

3. SCOPE OF WORK

The scope of works generally includes:

- Construction of ablution facilities at identified agricultural gardens in Ehlanzeni and Bohlabela districts.
- Construction of conservancy tanks and soakaways **where municipal sewer infrastructure is unavailable.**
- Installation of plumbing systems, water storage tanks and associated reticulation.
- Provision of handwashing facilities and water supply.
- Associated excavation, concrete works, and site reinstatement.
- Completion of all works in accordance with applicable SANS standards, Occupational Health and Safety requirements, and environmental legislation.

CONSTRUCTION OF ABLUTION FACILITIES AT EHLANZENI AND BOHLABELA DISTRICTS OF MPUMALANGA PROVINCE

Upon completion, the project is expected to improve sanitation services at agricultural gardens, strengthen compliance with SAGAP standards, protect public health, support environmental sustainability and enhance the productivity and sustainability of agricultural enterprises throughout the Mpumalanga Province.

NB: Items in Bill of Quantities are re-measurable, meaning contractor will only be paid for what is installed on site which will be measured by an Engineer on progress claims and final account, thus no wastage claim/s will be entertained. Therefore, contractor shall not use the items in Bill of Quantities to place equipment or materials orders and procurement but is expected to physically measure every actual material/s quantity required for the project prior to placing orders.

The following figures are applicable for Clause 50(5) of the Special Conditions of Contract:

INFORMATION SOURCE: WRC Report 1994

RAINFALL STATION: Mpumalanga Province

PERIOD:

CONSTRUCTION OF ABLUTION FACILITIES AT EHLANZENI AND BOHLABELA DISTRICTS OF MPUMALANGA PROVINCE

Rainfall station:					
Period: 1938 – 2006					
Month	N _n	R _n	Month	N _n	R _n
January			July		
February			August		
March			September		
April			October		
May			November		
June			December		
Annual average:					

N_n = Average amount of days on which a rainfall of 10 mm or more has been recorded.

R_n = Average monthly rainfall in mm

Extensions of time in respect of Clause 5.12 in the General Conditions of Contract for Construction Works (2015) in respect of abnormal rainfall shall be calculated using the following formula for each calendar month or part thereof:

$$V = (N_w - N_n) + \frac{(R_w - R_n)}{X}$$

Where:

V = Extension of time in calendar days in respect of the calendar month under consideration.

N_w = Actual number of days during the calendar month on which a rainfall of 10 mm or more has been recorded.

N_n = Average number of days in the relevant calendar month, as derived from existing rainfall records, on which a rainfall of 10mm or more has been recorded for the calendar month.

R_w = Actual average rainfall in mm recorded for the calendar month under consideration.

R_n = Average rainfall in mm for the calendar month as derived from existing rainfall records as stated in the Site Information.

X = 20mm

For purposes of the Contract N_n, R_n and N_n shall have those values assigned to them in the table above based on figures from the WRC report 1994.

If V is negative and its absolute value exceeds N_n, then V shall be taken as equal to minus N_n.

The total extension of time shall be the algebraic sum of all monthly totals for the period under consideration, but if the total is negative the time for completion shall not be reduced due to subnormal rainfall. Extensions of time for part of a month shall be calculated using pro rata values of N_n and R_n.

This formula does not take account flood damage which could cause further or concurrent delays and will be treated separately as far as extension of time is concerned.

The factor (N_w – N_n) shall be considered to represent a fair allowance for variations from the average in the number of days during which rainfall exceeds 10 mm. The factor (R_w-R_n) shall be considered to represent a fair allowance for variations from the average in the number of days during which the rainfall did not exceed 10 mm but wet conditions prevented or disrupted work.

For the purpose of applying the formula, accurate rain gauging shall be taken at a suitable point on the Site and the Contractor shall at his own expense, take all necessary precautions to ensure that rain gauges
